Acknowledgments

Data collection and dataset preparation for the *1999 Department of Defense Surveys of Active Duty Personnel and Spouses* were performed by Data Recognition Corporation (DRC) under contract DASW01-98-C-0062. Contributing staff at DRC in the Survey Division include the Federal Government Team (Mary Latta, Heidi Koelker, Dawn Nelson, Michelle Tostenson, and Mary Ellen Hartmann). They were supported at DRC by the staffs of Comment Processing, the Call Center, Survey Operations, Clerical Operations, Print Services, Inserting, and Warehousing.

DMDC is indebted to numerous people for their assistance in the design of these surveys. In the initial design stage, we convened a group of subject matter experts within the Office of the Under Secretary of Defense for Personnel and Readiness to discuss desirable elements for the survey. Those who participated had the opportunity later to review and provide comments on the survey outline developed at the meeting as well as throughout the design phase. We also wish to thank the General Accounting Office (GAO) who assisted in the conduct of pretests and offered helpful suggestions as the instrument underwent revisions. Among those contributing were William Buesse, Kurt Burgeson, Jack Edwards, and John Pendleton. We especially thank Edward Akers (Consortium Research Fellows Program), Tanya Guthrie, Robert O. Simmons, and Jacqueline Scarville (Defense Manpower Data Center) for facilitating pretests and helping with question design. Data processing and production of some analytic variables were performed by Westat under contract M67004-98-D-0002/0011. Contributing staff at Westat include Beth MacDougall and Katie Hubbell. They were supported at Westat by Dawn Williams, Brad Johnson and David Rockwell.

We extend special thanks to the Service members who helped with our pretesting of the instruments: Major Evans (Ft. Belvoir VA), Staff Sergeant Terry Silvers (Ft. Belvoir VA), Major Rainey (Ft. Meade MD), Senior Chief Gary and Lieutenant Commander MacMillian (Patuxent River Naval Air Station MD), Sheila Johnson (Naval Recruiting Command, Millington TN), Airman Maching (Andrews Air Force Base MD), and Linda Blakemoore (Quantico Marine Corps Base). Members of the Inter-Service Survey Coordination Committee were particularly helpful in providing Service-specific perspectives: Morris Peterson (Army Research Institute), Major Doug Marr (Headquarters, U.S. Marine Corps), and Charlie Hamilton (Air Force Personnel Center).

1999 SURVEY OF ACTIVE DUTY PERSONNEL: ADMINISTRATION, DATASETS, AND CODEBOOK

Executive Summary

At the request of the Office of the Deputy Assistant Secretary of Defense for Personnel Support, Families, and Education, the Defense Manpower Data Center (DMDC) conducted the survey to assess perceptions of military life issues. After an extensive survey development process in which focus group research played a significant role, the *1999 Survey of Active Duty Personnel* (Form A) was administered from August 1999 through December 1999. It was fielded to a nonproportional stratified, single stage random sample of 66,040 DoD Service members DoD and the Coast Guard. The (weighted) response rate was 51%, which is typical for large-scale surveys of DoD military personnel. This codebook documents survey development, sample design and allocation, survey administration procedures, and datasets that resulted from the survey.

The survey's items can be grouped broadly into several categories: assignment information; career information; military life; programs and services; family information; economic issues; and background information.

Data were collected by mail with procedures designed to maximize response rates. Beginning in late August 1999, an introductory letter explaining the survey and soliciting cooperation was sent to members. The introductory letter was followed about 3 weeks later by a package containing the questionnaire and instructions for completing and returning the survey. A third letter was sent to thank individuals who had already returned the questionnaire and to ask those who had not completed and returned the survey to do so. At approximately 3 weeks, 6 weeks, and 9 weeks after the initial survey mailing, second, third, and fourth questionnaires with letters stressing the importance of the survey were mailed to individuals who had not responded to previous mailings. The field closed on 4 January 2000 with all surveys received by that date.

The population of interest for the ADS Form A consisted of all active-duty Army, Navy, Marine Corps, Air Force, and Coast Guard members (including Reservists on active duty) below the rank of admiral or general, with at least 6 months of service at the time of survey mailings. The sample frame included only members who were on active duty in May 1999.

Nonproportional stratified, single stage random sampling procedures were employed to ensure adequate sample sizes for subgroups (domains) of particular interest. The sampling design considered requirements for analyses by Service, marital status, paygrade, occupation, gender, and location.

The sample for the ADS Form A consisted of 66,040 individuals, of whom 63,250 were ultimately determined to be eligible members of the target population, with eligibility conditional on also being on active duty in September 1999. When the survey fielding closed in December 1999, 33,189 usable surveys had been received from 36,100 Service members. The overall weighted response rate was 51%. Details of determining response rates and calculating non-response adjustments were reported by Flores-Cervantes and Valliant (2000).

Data were weighted to reflect the population of interest. The weights reflected (a) the probability of selection for that member, (b) a nonresponse adjustment to minimize bias arising from differential response rates among demographic subgroups, and (c) a poststratification factor for September 1999—the month in which questionnaires were first distributed.

The preparation of analysis files balanced two needs: public access to data with sufficient information for accurate estimates versus participants' and nonparticipants' rights to privacy and anonymity.

1999 SURVEY OF ACTIVE DUTY PERSONNEL: ADMINISTRATION, DATASETS, AND CODEBOOK

Introduction

The 1999 Active Duty Surveys (ADS) continues a line of research begun in 1969 with a series of small-scale surveys administered approximately every two years. These surveys were expanded in 1978 to provide policymakers with information about the total population directly involved with active duty military life (Doering, Grissmer, Hawes, & Hutzler 1981). The Department of Defense (DoD) also conducted large-scale active-duty surveys in 1985 (Hunt et al., 1986) and 1992 (Westat, 1993, 1994a, 1994b). The 1999 ADS are a set of mail surveys sponsored by the Office of the Assistant Secretary of Defense for Force Management Policy (OASD[FMP]) with particular interest in analysis by the Offices of the Deputy Assistant Secretaries of Defense for Military Community and Family Policy (ODASD[MCFP]) and for Military Personnel Policy (ODASD[MPP]).

There are two 1999 ADS instruments: the 1999 Survey of Active Duty Personnel (Form A), and the 1999 Survey of Spouses of Active Duty Personnel (Form B). This codebook documents survey development, sample construction and allocation, survey administration procedures, and datasets that resulted from the Form A survey of members. The Form B survey of spouses will be documented in a later volume (Wright, Williams, & Willis, 2000).

In formulating policy, the DoD relies on both administrative data and survey data. The administrative data contain personnel-related information collected from individuals, or maintained about them. These data are largely automated and readily available for policy research and formulation purposes (e.g., to determine amounts of military compensation, eligibility for various forms of health and program benefits, and performance assessments) (LaVange et al., 1986b).

Survey data can be used to supplement administrative data, as well as to address issues that cannot be studied from the administrative data. Especially when collected periodically, these data can serve as a basis for assessing the response of military personnel to policy changes and for identifying areas for future policy action.

DMDC has performed military personnel surveys of active-duty personnel approximately every seven years since 1978. In 1985, it began fielding a spouse questionnaire in addition to the member form. These earlier surveys allow policy makers to view trends in high-interest areas. Information from previous surveys illustrate the wide variety of uses found for active-duty survey data. For example, previous surveys have been used to study: the effects of Operation Desert Shield/Desert Storm on the family, how attitudes on the military way of life change over time, the effect of separation and deployment on the family, and how military couples deal with military life. Information from the earlier surveys was used in congressional reports (on topics such as military members qualifying for food stamps) and data have been used extensively by the Quadrennial Reviews of Military Compensation.

Overview of Report

The next section of this report describes the procedures used to develop the instrument, design the sample, conduct the survey, process the data and prepare analysis weights. Along with Appendices A and B, the methods section is the documentation of how the survey was conducted.

The third section of the report describes the survey analysis file layout and key variables. This section and the remaining appendices (C-J) address issues in the analysis of the survey data. Conventions for variable naming and construction are introduced in this section with details given in Appendices C (annotated questionnaire), D (explanation of coding), and I (explication of key analytic variables). Explanations for the groupings of variables seen in the positional list of variables in Appendix F.¹ are discussed in this section as well as a description of information available in Appendix G for each variable. Appendix G contains details for variables in the same order that the variables are listed in Appendix F. In addition to the variables available on the public-release file, Appendix G contains details for the confidential variables that had to be suppressed to preserve the privacy of survey respondents and nonrespondents. Confidential variables are identified and listed in Appendices E and F. Key concepts required for the analysis of complex survey data and the structure of records in the survey analysis files are introduced in this section. Examples of analyses are given in Appendix J. The SAS code used to construct the analytic variables are included in Appendix I. Appendix H provides the record layout for the public-release flat file.

¹ An alphabetical list is at Appendix E.

Method

Survey Instrument

A copy of the 20-page *ADS Form A* questionnaire is provided in Appendix A. The survey instrument can be grouped into seven sections:

- *Assignment Information* – includes questions on hours worked, permanent duty station (PDS), satisfaction with characteristics of the PDS, permanent change of station moves, and time away from the PDS for military duties;
- *Career Information* – includes questions on career intent, reasons for joining, obligation and retention, satisfaction with occupational specialty, and satisfaction with aspects of military service;
- *Military Life* – includes questions on importance of military activities, thoughts of leaving the military, civilian vs. military opportunities, and overall satisfaction;
- *Programs and Services* – includes questions on the availability and use of on-base and off-base services, facilities, and programs;
- *Family Information* – includes questions on marital status, spouse occupation and education, dependents, childcare arrangements, and military health care;
- *Economic Issues* – includes questions on non-military income, total monthly income and expenses, savings and debt, service and retirement benefits; and
- *Background* – includes information on gender, race/ethnic status, education, duty status, Service, paygrade, and time served.

Survey items were adopted, adapted, or generated from one or more of the following sources:

- the 1985 and 1992 Surveys of Officer and Enlisted Personnel and Spouses;
- concerns identified by personnel from OASD(FMP), particularly ODASD(MCFP) and ODASD(MPP);
- the Survey of Consumer Finances (2000) for financial items;
- U.S. General Accounting Office; and
- focus groups conducted with military personnel similar to those in the sample.

Because focus group research played such a significant role in the development of the survey instrument, it warrants in-depth discussion. The large number of new and modified items in the ADS Form A required developing and pretesting iterative versions of the questionnaire. Focus groups were conducted with Army, Navy, and Marine Corps, and Air Force members and spouses. Approximately 120 service members participated in 14 focus groups that were conducted at eight installations located throughout the United States. To ensure the applicability of the items for the population of inferential interest, versions of the survey were pretested on

officer and enlisted members from all four Services. The layout of the surveys used in the pretests closely approximated that found in the final instrument.

In the 1- to 2-hour focus group sessions, participants were asked to imagine that they had received the survey in the mail and to complete it accordingly. Also, participants were instructed to write notes on the survey where they had concerns about items, alternatives, or instructions so that these issues could be discussed after the survey was completed. Survey completion typically took from 35 to 50 minutes. After everyone had completed the survey, the focus group facilitator reviewed the instrument section-by-section, asking for specific comments on each section. For certain portions of the survey, facilitators probed to see if all respondents were interpreting the instructions, items, and contexts similarly. After the section-by-section review was completed, focus group participants were asked to give general comments about the survey (e.g., survey length and whether respondents would feel free to answer the questions honestly). At the end of the session, facilitators gathered questionnaires to preserve the notes that participants had written.

DMDC and GAO researchers moderated and observed the focus groups and met after the groups to identify problems and make recommendations for revisions. Revisions were incorporated into later version of the survey. In subsequent focus groups, facilitators probed to determine whether the revisions had corrected the problems or whether additional modifications were warranted.

The final version of survey instrument was printed by National Computer Systems (NCS) on a machine-readable optical-scan form. The survey instrument has a unique lithographed (litho) code number printed on each sheet.

Sample

Overview

The population of inferential interest for the ADS Form A consisted of all active-duty Army, Navy, Marine Corps, Air Force, and Coast Guard members (including Reservists on active duty) below the rank of admiral or general, who had served at least 6 months of service at the time of survey mailings. Flag and general officers were excluded because they are such a small group that their confidentiality could not be assured. The sample frame included only those members who were on active duty in May 1999, with eligibility conditional on also being on active duty in September 1999.

The initial sample for the ADS Form A consisted of a non-proportional stratified, single stage random sample of 66,040 individuals, of whom 63,250 were determined to be eligible members of the target population. The sample design considered requirements for analyses by Service, service component, gender, racial/ethnic group membership, paygrade groups, pilots, joint marital and single parent designators, on-base or off-base residences, and location. Details of the sample design and expected precision levels are reported by George, Wright, and Elig (2000) and are summarized below.

Stratification Variables

The sampling frame was constructed using the five stratification variables listed in Table 1. Cell sizes were too sparse in some cases for the fully crossed stratification. For this reason, sex and location were collapsed within some strata for Army, Navy, Marine Corps, and Coast Guard. Some junior officer groups were also collapsed within Navy, Air Force, and Coast Guard.

Constructing the Frame and Drawing the Sample

DMDC's May 1999 Active Duty Master File (ADMF) provided information for developing the sampling frame, constructing strata, and determining the sample size and allocation. The previously specified definition of the population resulted in a sampling frame with 1,419,269 eligible members. A non-proportional stratified, single stage random sample of 66,040 members was selected to receive the ADS Form A. Table 2 presents a summary of the sample allocation by Service.

Table 1.
Stratification Variables

Dimension of Stratification	Levels
Joint Marital Status	Married to civilian or other non-joint service member Active joint service member (member married to active duty member or AGR member) Unmarried
Service	Army Navy Marine Corps Air Force Coast Guard
Gender	Male Female
Paygrade Group	E1 to E3 E4 E5 to E6 E7 to E9 WO1 to WO5 O1 to O3 O4 to O6
Location	CONUS OCONUS

Researchers identified subgroup breakouts (i.e., domains) that would be important when survey results were provided to policy officials. These reporting domains were defined by using the 12 demographic variables shown in Table 3. For four demographic characteristics, multiple versions of variables were created that differed in the level of detail. Less detailed variables were used to define domains for analyses within the five Services than were used to define domains at the DoD level.

Next, researchers determined the number of people who would be sampled for each stratum using a sample-planning tool developed for DMDC (Kavee & Mason, 1997). A formal mathematical procedure (Chromy, 1987) based on Karush-Kuhn-Tucker theory is used in the sample-planning tool to determine an optimized sample size and allocation—a sample that would achieve at minimal cost the precision levels required for each analytic domain. The Kuhn-Tucker theory provides an optimal solution to satisfy precision constraints (e.g., ± 5 percentage points) imposed on estimates of prevalence rates in key reporting domains. Researchers iteratively modified the inputs to the sample-planning tool to arrive at acceptable precision levels for reporting domains that would be of particular interest to policy officials.

Officer Occupation Areas	General Officers and Executives, N.E.C. Tactical Operations Officers Intelligence Officers Engineering and Maintenance Officers Scientists and Professionals Health Care Officers Administrators Supply, Procurement and Allied Officers Non-Occupational
Pilot/Navigator (rated)	Pilot/Navigator(rated) Other
Race/Ethnic Category 1	(Non-Hispanic) White (Non-Hispanic) Black Hispanic Native American & Alaskan Native Asian & Pacific Islander Other

Factors	Levels
Race/Ethnic Category 2	Non-Hispanic White (non-minority) Other (minority)
Living on or off base (BAQ variable)	Living on-base (not receiving BAQ) with dependents Living on-base (not receiving BAQ) without dependents Living off-base (receiving BAQ) with dependents Living off-base (receiving BAQ) without dependents
Component	Active Duty AGR (National Guard/Reserve)
Single parent	Single and has a child or children Other

Respondents

Overview

When the survey fielding closed in 4 January 2000, DMDC had received 33,189 usable surveys. Another 2,911 individuals were determined to be ineligible because they were ineligible in DEERS after the sample frame was constructed, or the member reported they were not on active duty in Question 107, or the member told the survey processing center they were permanently ill, not in the military, or ineligible for some other reasons. After making adjustments in accordance with industry standards (Council of American Survey Research Organizations, 1982) for eligibility and differential sampling rates across the various subgroups, the observed response rate was 56.2% and the weighted response rate was 50.7%.

Individuals for whom response status and eligibility were determined were weighted to ensure that the answers from respondents represented the population of interest. The weights reflected (a) the probability of selection for that member, (b) a nonresponse adjustment to minimize bias arising from differential response rates among demographic subgroups, and (c) a poststratification factor for September 1999—the month in which the survey form was first distributed. Summing across all 36,100 individuals for whom response status and eligibility were determined, the final weights summed to 1,403,423—the number of service members on active duty (including Reservists) below an O-7 in September 1999. Summing the final weights across the 33,189 eligible respondents gives a weighted estimate that 1,303,750 of these members had been on active duty at least six months and were thus eligible for the survey. Details of determining response rates and calculating non-response adjustments were reported by Flores-Cervantes, and Valliant (2000) and are summarized below.

Table 4 shows the demographic characteristics² of the 33,189 respondents, while Table 5 shows the population estimated by these respondents.

² The demographic characteristics in these tables are primarily based on self-reports; and to varying extents, they differ from similar variables on the administrative files.

Table 4.

Determining Response Status

Table 6 shows the number of sample members selected for the survey, the numbers determined to be ineligible by administrative record data and by self-report, the number not located, and the number of non-respondents. The first row of Table 6 shows that a worldwide sample of 66,040 was selected from a population of 1,419,269 active duty members from the four Services and Coast Guard. This population total is the actual frame count as of September 1999 and the base weights of the sample sum to this amount. With the exception of the frame-based population total of 1,419,269, numbers in the population counts are estimated from the sample. The percentages shown for the population are the weighted estimates of the counts that would have occurred if the entire population had been selected for the sample—they differ from the percentages shown for the sample because the sample was not drawn in proportion to the population.

Table 5.
Weighted Estimates of the Eligible Population

	Total	Army	Navy	Marine Corps	Air Force	Coast Guard

CONUS	1,088,238	358,876	294,295	131,334	273,763	29,969
OCNUS	211,562	92,702	41,762	19,116	56,783	1,199
Unknown	3,951	1,687	1,059	308	875	21

Losses from the sample are displayed hierarchically in Table 6. A total of 5,186 (7.85%) of the members was lost from the sample because of ineligibility. Members were lost from the sample for three main reasons: (1) ineligibility in DEERS; (2) promoted above an O-6; and (3) self-reported or other ineligibility for the survey. Over 50% of the ineligibles (2,790) occurred when eligibility status and mailing addresses were updated using the end of September 1999 Defense Enrollment Eligibility Reporting System (DEERS) file.³ Of the DEERS ineligibility losses, most occurred because the member was not shown as being on active duty. Approximately 46% (2,380) of the ineligibles occurred when people either sent a letter or fax to Data Recognition Corporation (DRC), the operations contractor, to indicate they were ineligible or returned a completed survey indicating they were not serving on active duty and/or in the Guard Reserve (Question 107). Elimination of 5,186 known ineligibles resulted in decreasing the eligible sample to 92.15% (N=60,854) of the drawn sample size.

³ The database for the sample was constructed using information from the May 1999 ADMF and RCCPDS. Information in the database included social security numbers, names, addresses, eligibility status, stratification variables, etc. The names and social security numbers were then matched against the data in a more current database, DEERS, and used to verify the eligibility and addresses of the sampled members at the time of the first survey mailing, September 1999.

Table 6.
Frequency Counts and Percents of the Final Usable Sample Relative to the Drawn Sample

	Sample counts		Weighted estimates of population	
	n	%	n	%
Drawn sample & population	66,040	100.00%	^a1,419,269	100.00%
Ineligible in DEERS (master files)	2,790	4.22%	68,355	4.82%
Promoted above an O-6	16	0.02%	165	0.01%
Self-reported ineligible	2,380	3.60%	44,881	3.16%
Total: Ineligible	5,186	7.85%	113,401	7.99%
Eligible sample	60,854	92.15%	1,305,868	92.01%
Total: Not located	1,099	1.66%	26,889	1.89%
Located sample	59,755	90.48%	1,278,979	90.12%
Nonresponse				
Returned blank	62	0.09%	1,087	0.08%
Skipped key questions	55	0.08%	3,935	0.28%
Skipped Question 107	175	0.26%	1,165	0.08%
Did not return a survey	25,900	39.22%	624,409	44.00%
Total: Nonresponse (unknown eligibility only)	26,192	39.66%	630,595	44.43%
Skipped key questions (eligible respondents)	374	0.57%	7,621	0.54%
Total nonresponse (unknown and eligible nonrespondents)	26,566	40.23%	638,216	44.97%
Usable Responses	33,189	50.26%	640,763	45.15%

Notes. Percentages reported for usable responses represent the yield of usable responses from the survey procedures, but not response rates as typically reported for surveys.

^aThis is both the population frame count and the sum of base weights from the sample.

Approximately 1.7% (n=1,099 of 66,040) of the drawn sample was lost because the sample members could not be located. Personnel records for this 1.7% of the sample had either an incomplete or out-of-date address, and other steps designed to obtain addresses were not successful. Sending surveys to military members and their family is complicated because they are very mobile. Relative to their civilian counterparts, military families move much more frequently, often to or from foreign locations. This fact, coupled with the size of the military population (approximately 1.5 million active-duty members) makes it difficult to maintain up-to-date addresses. As a result, DMDC incorporated an address-update procedure developed by DMDC and DRC to minimize the number of people who would be lost from the survey because of outdated addresses. (This procedure is explained in a later section that describes the survey control system.)

Sixty-two individuals returned surveys that were entirely blank. Another 55 individuals returned surveys but left key items blank. These surveys were treated as nonrespondents when at least one item in each of the Questions 39, 50, and 52 were not answered. A third group of 175 individuals returned surveys but did not complete Question 107 and was considered nonrespondents.

All sampled members who (a) were not assigned to an earlier loss category and (b) did not return usable surveys were placed in the category, “Did not return a survey.” This nonresponse group (n=25,900) was composed of those individuals who had been sent at least one survey without it being returned to DRC and for whom no information (on ineligibility or a completed survey) had been obtained.

At the conclusion of the survey fielding, 33,189 eligible personnel had returned usable questionnaires.

Location, Completion and Response Rates

Varying operational definitions of response rates can lead to problems when interpreting the results of a survey. To lessen this problem, the Council of American Survey Research Organizations (CASRO, 1982) recommended guidelines for standardizing the operational definitions of response rates. Beginning in 1995, DMDC standardized its methods for calculating response rates and completion rates, using procedures patterned after those advocated by CASRO. More specifically, the DMDC procedures most closely follow CASRO’s Sample Type II design.

As discussed by CASRO, the overall response rate has two components: the rate at which individuals can be located (location rate) and the rate at which located individuals complete the survey (completion rate). CASRO recommended that nonrespondents for whom eligibility has not been determined be distributed to eligibility and ineligibility status using the eligibility rate among those for whom a determination could be made. In the ADS Form A, an assumption has been made that all master file ineligibles were identified and therefore are excluded from the ineligibility rate used to estimate unidentified ineligibles. Based on the proportion of self-reported ineligibles (2,380) found among responding sample members, 6.6 % of the 1,099 nonlocatables, or 73 nonlocatables, were estimated to be ineligible and 6.6% of 25,900, or 1,715 of sample members with no survey return were likewise estimated to be ineligible. In addition 6.6% of 62, or 4 sample members who returned blank surveys were estimated to be ineligible and 6.6% of 230 or 15 sample members who skipped key questions or skipped question 107 were estimated to be ineligible. CASRO-adjusted located and adjusted eligible sample counts are shown in Table 7, and the CASRO-compliant location, completion, and response rates are defined as shown in Table 8.

Unweighted (observed) rates are useful for some purpose; however, to gauge the rate of participation among the target population more accurately, weighted response rates are needed. Weighted rates also have the advantage of being comparable among surveys that use different sampling methods. Because weighted rates adjust for each sample member’s probability of selection, they yield rates that apply to a simple random sample. The biasing effects of other sampling strategies (e.g., oversampling and cluster sampling) are eliminated when weighted rates

are used. For these reasons, weighted response rates are typically preferable to unweighted response rates. The weighted rates are presented in Table 8.

Table 7.
CASRO-adjusted Located and Eligible Sample Counts

	Sample counts		Weighted estimates of population	
	n	%	n	%
Located Sample	59,755	90.48%	1,278,979	90.12%
Estimated ineligible of those who returned a blank survey	4	0.01%	70	0.00%
Estimated ineligible of those who skipped key questions	15	0.02%	330	0.02%
Estimated ineligible of those who did not return a survey	1,715	2.60%	40,423	2.85%
Total estimated ineligible	1,734	2.63%	40,824	2.88%
Adjusted located sample	58,021	87.86%	1,238,155	87.24%
Eligible sample	60,854	92.15%	1,305,868	92.01%
Estimated ineligible of those not located	73	0.11%	1,741	0.12%
Estimated ineligible of those who returned a blank survey	4	0.01%	70	0.00%
Estimated ineligible of those who skipped key questions	15	0.02%	330	0.02%
Estimated ineligible of those who did not return a survey	1,715	2.60%	40,423	2.85%
Total estimated ineligible	1,807	2.74%	42,564	3.00%
Adjusted eligible sample	59,047	89.41%	1,263,304	89.01%

Note. The adjustments follow the CASRO approach of projecting the observed ineligibility rate onto sample members who are not located or are non-respondents.

Table 8.
Location Rates, Response Rates, and Completion Rates

Type of Rate		Computation	Observed Rates	Weighted Rates
Location	Adjusted located sample / Adjusted eligible sample		98.26%	98.01%
Completion	Usable responses / Adjusted located sample		57.20%	51.75%
Response	Usable responses / Adjusted eligible sample		56.21%	50.72%

Note: The rates in this table are computed from the information in Tables 6 and 7.

Survey Materials and Their Distribution

Data were collected by mail with procedures designed to maximize response rates. A total of 332,913 pieces of mail were sent in 6 separate mailings to sample members. All eligible sample members could have received up to six different mailings: a notification letter, a wave 1 letter and survey, a reminder/thank-you letter, a wave 2 letter and survey, a wave 3 letter and survey, and a wave 4 letter and survey. The 4.5" x 9.5" window envelopes for the notification and reminder/thank-you mailings contained only a letter. Within the 9" x 12" window envelopes for the other four mailings included a cover letter, a survey, and a folded pre-addressed business-reply envelope.

This section describes the letters that were sent to the respondents and the procedures used to distribute the mailings. The procedures included developing a relational database to monitor all data transactions, establishing a process for updating addresses, and conducting multiple mailings for each of the six possible times that a respondent could be contacted.

Letters

DMDC provided the operations contractor with the text, letterhead and signatures for the cover letters. These letters explained why the survey was being conducted, how the survey information would be used, and why participation was important. (See Appendix B for copies of the letters.) The letters were approved, printed on letterhead from the Under Secretary of Defense and signed by Under Secretary Rudy de Leon.

The letterhead and signature were printed in blue, and the text and recipient information of all letters were printed in black. In addition to including a name and address (which was also used as the mailing information for the window envelopes), each letter included a personalized salutation. The salutation addressed each sample member by his/her rank. For example, a letter to a Navy E5 with the last name Smith would have included the salutation, "Dear Petty Officer Smith". Similarly, an Army O3 named Jones would have received a letter starting, "Dear Captain Jones". The address block also included Service branch; for example, "Petty Officer John Smith USN" or "Captain Mary Jones USA".

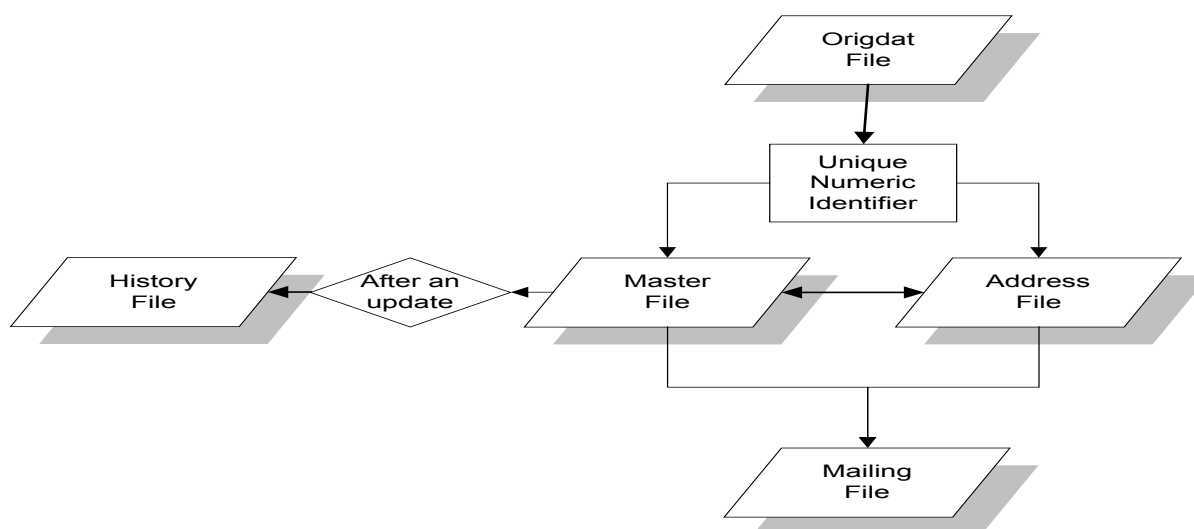

Letters were printed with the record's unique Mail Information Code (MIC) listed in the address field and on the lower right corner of the letter. If only letters were being sent (no survey forms), the letters were then folded and machine inserted into window envelopes and sent by first class mail. Mailings that included a survey followed the same procedure through the letter printing process. The MIC on the cover letter was used to pair the letter with its matching lithocoded survey. During the matching process, ten percent of the mailing was visually checked, comparing the MIC printed on the letter with the survey's lithocode to ensure quality. Any mismatched pairs initiated further investigation of the matching process. This procedure ensured that each survey was sent to the person designated to receive it. Depending on the sample size, the letters and matched surveys were machine or hand inserted into envelopes, metered if necessary, and sent by first class mail.

Survey Control System

The Survey Control System (SCS)⁴ was used to monitor the data collection process and to track all data transactions over the course of the survey administration. The datasets in the SCS include sample members' names and addresses, but do not contain data obtained from the survey instruments. Because of privacy concerns, SCS datasets are not available for public release.

The operations contractor uses the SCS to store and update project data, monitor mailings, respond to documents returned as postal non-deliverables (PNDs), and determine survey participation and eligibility status. The SCS consists of five datasets: the ORIGDAT file, the ADDRESS file, the MASTER file, the HISTORY file, and the MAILING file. The files are linked relationally by INRECNO, a unique individual identification number that is assigned to each sample member when the record was loaded into the SCS. Figure 1 displays the interrelationships among those datasets.

Figure 1.
Survey Control System

⁴ In this document, the term *SCS* refers to the set of data files as well as the program or operating system which maintains those files.

ORIGDAT file. The ORIGDAT file consists of 66,040 records, one record for each member of the sample. It is the original sampling frame file sent to the operations contractor by DMDC. The original file is loaded onto the operations contractor's computer system and converted to a SAS⁵ dataset. As the file was converted into a SAS dataset, the SCS generated a unique identification number (INRECNO) for each record. This number identifies the sample member throughout the SCS and also in returns data sets, comment text files and other specify text files. The names and some demographic data from the ORIGDAT file were loaded into the MASTER file in preparation for the first mailing. The addresses from the ORIGDAT file were loaded into the ADDRESS file.

ADDRESS file. The ADDRESS file tracked the multiple addresses that were maintained for each sample member. The ADDRESS file contains one record for each address for each sample member. For example, if there are five addresses located for one sampled individual, that individual has five separate records in the ADDRESS file. ADDRESS records were created as new information was located. Each record included the individual's INRECNO, residential or unit address and source of the address (e.g., supplied in the original file, telephone call, or the postal service), an address priority code, the date the address was loaded into the system, and the address number (the sequential order of receipt of the address for a particular sample member). For example, if a sample member has one address record in the ADDRESS file, the address number for that record is "1." The sequential address number assigned to a given address for an individual did not fluctuate with changes in addresses caused by updating efforts.

Each address in the ADDRESS file was assigned not only a sequential number but also a priority code. The priority code⁶ is unrelated to the sequential number and is dependent on the source and date of the address. For example, a priority of "1" was assigned to an address received directly from a sample member through a phone call or fax (it had the highest priority since it came from the source) and a priority of "2" was assigned to a postal service update. At any given time, the address number of the highest priority address for a given INRECNO was recorded in the MASTER file as the current address number to use for mailings. This address was also flagged in the ADDRESS file as the "active" address. Address updates were entered through both automated processes (e.g., recording PNDs or adding credit bureau addresses) and by manual key entry (e.g., new information from a phone call from a sample member). Updates were dynamic and could occur from external sources simultaneously. The SCS also checked addresses as they were added to see if they duplicated an existing address; if the address was a duplicate, it was ignored in searches for new addresses to use in mailings.

MASTER file. The MASTER file is used by the SCS to select records for upcoming survey mailings. This file includes a record for each member of the sample and is created by extracting data from each record in the ORIGDAT file. Each MASTER record includes the sample member INRECNO and the "highest priority code" ADDRNO that currently has been assigned from the corresponding records in the ADDRESS file. The MASTER file accommodates data updates through an automated process (e.g., updating the ADDRNO in use

⁵ SAS® is a registered trademark of SAS Institute Inc., Cary, NC, USA.

⁶ In general, residential addresses have a higher priority code than unit addresses during all of the mailings. However, in an effort to increase the number of returns, unit addresses were assigned a higher priority code for mailings of waves 2 and 3.

after the receipt of a postal non-deliverable) or manual key entry (e.g., updating information in response to a telephone call from a sample member). As new information is received for a particular record (including changes to the priority codes assigned to addresses), the SCS updates the MASTER record and adds a new record to the HISTORY file containing the outdated information from the MASTER file.

HISTORY file. The HISTORY file is a chronicle of the changes that occurred to the MASTER file. Each HISTORY record is a subset of an outdated MASTER record with the addition of a date and time stamp as the record is updated. That is, a HISTORY record is created when there is a name, address, paygrade, or eligibility status change in the MASTER file. Thus, the HISTORY file contains as many observations as there are updates to the MASTER file.

MAILING file. The MAILING file tracks all of the survey mailings. This file contains one record for each item mailed during the survey administration. Each MAILING record includes the INRECNO, ADDRNO used, date of mailing, mailing status, type of mailing, and the MIC.

Address-update Procedures

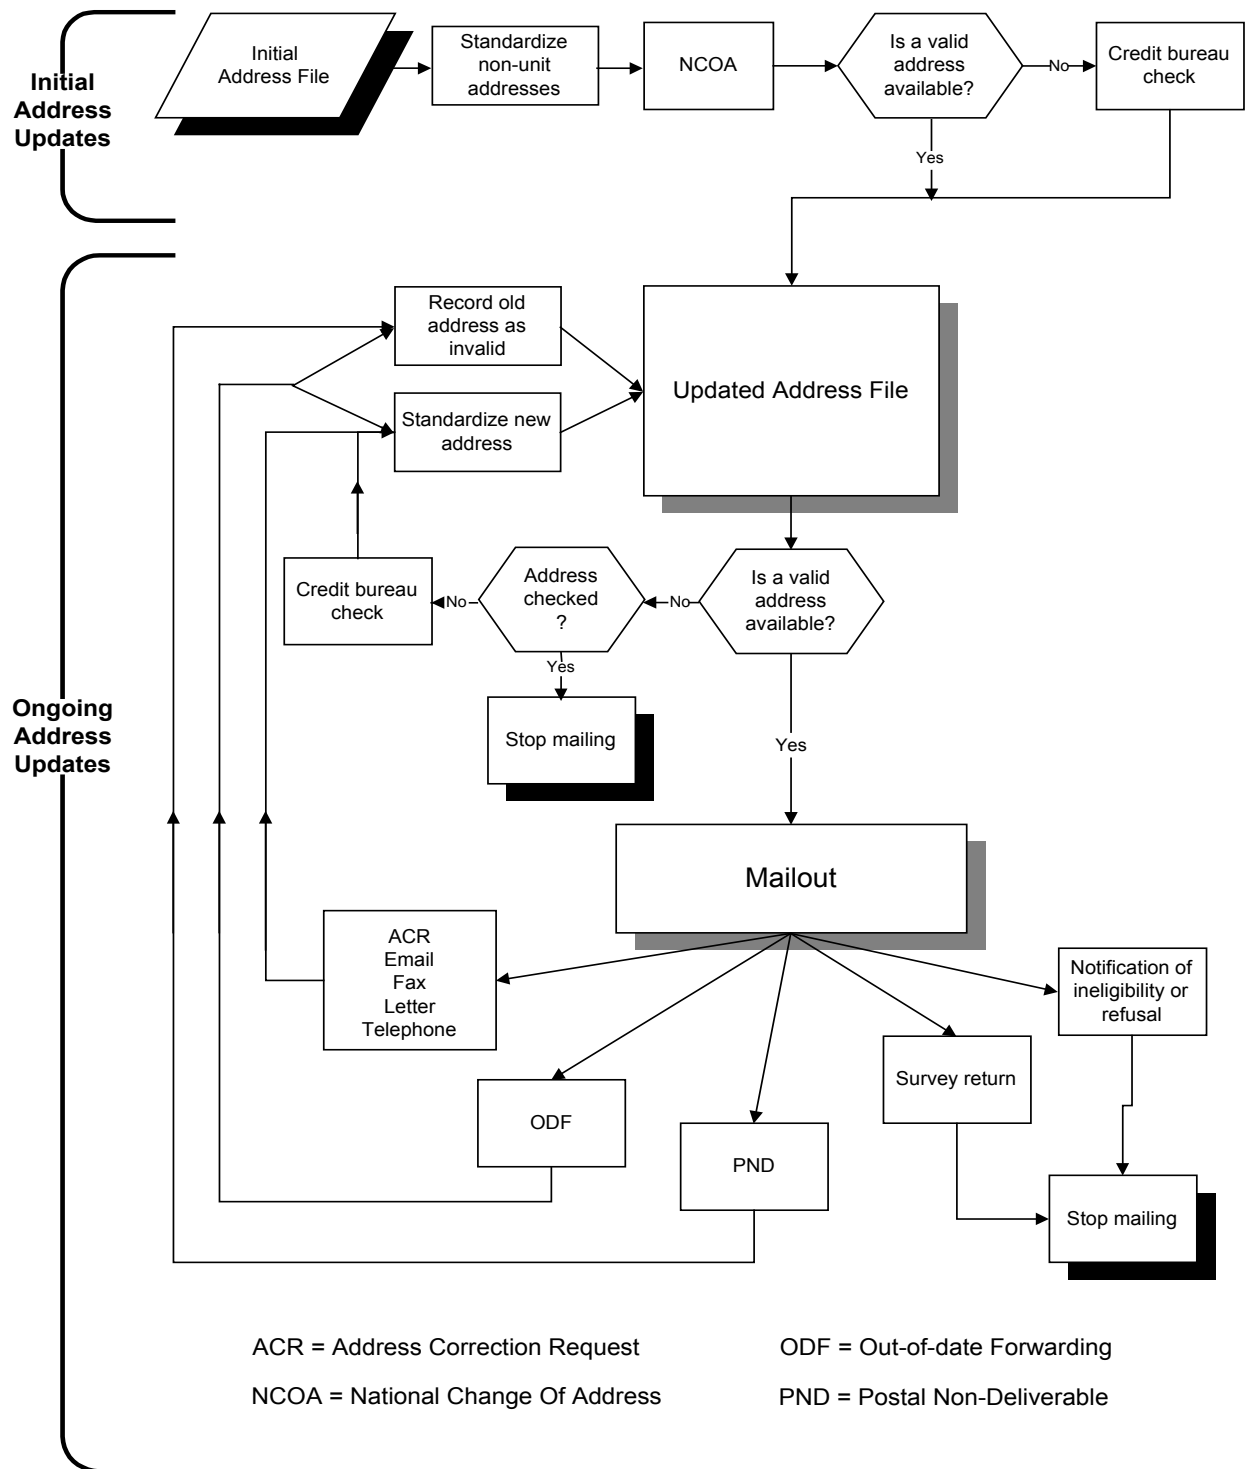

Initial address updates. Prior to the first mailing, DRC ran all domestic residential addresses through Group 1 software to be formatted to conform to U.S. Postal Service standards. Once the addresses were standardized, they were sent to an outside vendor where they were checked against the National Change of Address (NCOA) database. The NCOA software updated the address records (in standardized format) based on change-of-address cards filed with the U.S. Postal Service. The updated NCOA address file was returned to DRC and integrated into the SCS. The NCOA-updated addresses were added to the ADDRESS file and became the current ADDRNO with the “highest priority code assigned” in the MASTER file.

After the NCOA-updated data was added to the SCS, another file was compiled of sample members who had an incomplete address or an address identified by NCOA as an undocumented move (i.e., the sample member had moved, but NCOA did not have a new address). The operations contractor sent copies of this file to three credit bureaus (Experian, Trans Union and CSC Credit Services)⁷ to determine whether a complete, up-to-date address for these sample members could be found. The results were integrated into the SCS, updating records in the ADDRESS file.

Ongoing address updates. Address update procedures also occurred when (a) additional address records were received after NCOA processing, (b) a survey document was returned as undeliverable, (c) a sample member self-reported a name, rank, or address change via the telephone, e-mail, or fax, or (d) the U.S. Postal Service forwarded address correction information. Figure 2 outlines these procedures.

⁷ Experian, Trans Union and CSC Credit Services are outside vendors with consumer-credit information databases. Social security numbers of sample members with incomplete or out-of-date address information were forwarded to the vendors for address updates when the mailing dataset contained no valid address.

Figure 2.
Address Updating Procedures

As a new address was entered into the ADDRESS file for each record, its source (NCOA, credit bureau, Postal Address Correction Requested Card, telephone call, fax, e-mail, letter) was identified, a new ADDRNO was created to correspond to each address and a priority code was assigned to each address record. If all known addresses for a sample member were returned PND, the sample member's record in the MASTER file was flagged "no address available". All "no address available" records were forwarded to the three credit bureaus. The credit bureaus returned files containing addresses for each submitted record, with the date on which the credit bureau received the address. If more than one address for a sample member was received from the credit bureaus, the address number corresponding to the address with the most recent receipt date received the highest priority code. If one or more of the credit bureaus returned a previously unattempted address, the MASTER and ADDRESS files were updated and a re-mail was sent to the sample member. If none of the vendors had an updated address for the sample member, the operations contractor designated the sample member "nonlocatable" and stopped further mailings.

General mailing procedures. Prior to every mailing, the SCS searched the records in the MASTER file to identify which records should be excluded (e.g., sample members self-reported as ineligible for survey participation, sample members who had already returned survey forms, and members with no valid addresses available). For re-mails (sent between mailings), the SCS identified only those records that had been updated since the prior mailing. More specifically, the SCS identified records that had resulted in PNDs or had been manually flagged for re-mailing (e.g., in response to a sample member calling the operations contractor stating a reminder/thank you letter was received but not a survey, etc.).

Once all records for a particular mailing or re-mailing were identified, the SCS processed the records based on whether or not the mailing would include a survey form. If the mailing group was large enough to lead to a cost savings from sorting, the records were run through Group 1 postal software to sort the records according to first-class presort postal regulations. After this procedure, a unique Mail Identification Code (MIC) was assigned to each record. The MIC was assigned either from the survey lithocode list if a survey form was sent or independently if only a letter was sent.

The status of each mailing was tracked throughout the data collection so that address-correction information could be incorporated into all relevant mailings. When a mail piece came back PND, the next mail piece was sent to a new address (if one could be obtained during the mailing period). PNDs from the wave 3 and wave 4 surveys were re-mailed if a newer/updated address could be found.

Description of Each Mailing and Re-mailing

Survey distribution. The first item mailed to the sample member was the notification letter. DMDC uses notification letters for three reasons. First, contacting potential respondents multiple times is perhaps the most effective means of increasing survey response rates (Fox, Crask, & Kim, 1988; Yammarino, Skinner, & Childers, 1991). Second, the U.S. Postal Service does not always forward the large envelopes that are used to mail surveys despite the envelopes' first class postage and request to forward. However, forwarding is more routine for letters included in standard-sized business envelopes. Third, it is cheaper to send an initial notification

letter, have that letter returned PND and correct the address than it is to start the process by mailing and re-mailing the survey.

The second mailing was the wave 1 survey mailing; this was followed by four further mailings designed to increase response rates. A reminder/thank you letter was sent to all eligible sample members with usable addresses. The waves 2, 3 and 4 surveys provided sample members whom had lost or discarded the earlier survey(s) with additional opportunities to participate.

Table 9 lists the mailing dates and return results for each survey wave and re-mailing. The notification letter, inserted into a window envelope, notified sample members that they would be receiving a survey and encouraged their participation. The initial mailing contained 65,089 letters and the records for this mailing were selected on August 25, 1999 (64,843 domestic) and September 2, 1999 (246 foreign). The domestic mailing was completed August 27, 1999, and the foreign mailing on September 4, 1999.

The wave 1 survey mailing was sent to 64,898 sample members (64,654 domestic and 244 foreign addresses). The records were selected for the mailing on September 15, 1999. The mailing was sent out September 17-21, 1999. The letter and a survey booklet were inserted into a 9" x 12" window envelope along with a folded 9" x 12" business reply envelope. The letter requested sample members' participation in the survey.

A reminder/thank you letter was sent to 64,910 sample members (64,688 domestic and 222 foreign addresses) on September 28, 1999. Records were selected on September 24, 1999. The letter, inserted into a 4.5"x9.5" window envelope, thanked sample members for returning the survey if they had done so, and reminded them to complete and return the survey if they had not.

The wave 2 survey mailing was sent to 52,536 sample members (52,535 domestic addresses and 1 foreign address) from October 14-October 19, 1999. Records were selected on October 11 and October 13. The cover letter, a survey booklet and a folded 9" x 12" business reply envelope were inserted into a 9" x 12" window envelope. The letter again requested participation in the survey.

The initial wave 3 survey mailing was sent to 45,664 sample members (all domestic addresses) between November 1 and November 9, 1999. Records were selected on October 22, 1999. The cover letter, a survey booklet and a folded 9" x 12" business reply envelope were inserted into a 9" x 12" window envelope. The letter again requested participation in the survey. One re-mailing of wave 3 surveys, totaling 4,107 packets, was sent on November 19, 1999 (records for this re-mail were selected on November 16, 1999).

The wave 4 survey mailing was sent to 34,907 sample members (all domestic addresses) on December 1 and 2, 1999. Records were selected on November 19, 1999. The cover letter, a survey booklet and a folded 9" x 12" business reply envelope were inserted into a 9" x 12" window envelope. The letter again requested participation in the survey. One re-mailing of 775 wave 4 survey packets was selected on December 20, 1999 and completed on December 21, 1999.

Table 9.
Mailings: Print File Creation Dates and Number of Mailings Sent, Returned, and PND

Mailing Numbers and Groups	Date*	Sent	Returns	PNDs
1. Notification mailing - domestic	8/25/99	64,843	N/A	9,095
2. Notification mailing - foreign	9/2/99	246	N/A	116
Subtotal: Notification		65,089		9,211
3. Wave 1 mailing - domestic	9/15/99	64,654	24,465	7,090
4. Wave 1 mailing - foreign	9/15/99	244	38	130
Subtotal: Wave 1 Survey		64,898	24,503	7,220
5. Reminder mailing – domestic	9/24/99	64,688	N/A	5,205
6. Reminder mailing - foreign	9/24/99	222	N/A	88
Subtotal: Reminder/Thank you		64,910		5,293
7. Wave 2 mailing - domestic	10/11/99 10/13/99	52,535	7,896	7,529
8. Wave 2 mailing - foreign	10/11/99	1	0	0
Subtotal: Wave 2 Survey		52,536	7,896	7,529
9. Wave 3 mailing – domestic	10/22/99	45,664	2,935	5,470
10. Wave 3 mailing – foreign	N/A	0	0	0
11. Wave 3 re-mail	11/16/99	4,107	432	161
Subtotal: Wave 3 Survey		49,771	3,367	5,631
12. Wave 4 mailing	11/19/99	34,907	1,344	260
13. Wave 4 re-mail	12/20/99	775	9	0
Subtotal: Wave 4 Survey		35,682	1,353	260
TOTAL		333,886	37,119	35,144

*This is the date on which records were identified for inclusion in a mailing and written to a print file.

Processing Returned Surveys

This phase of the survey process can be divided into four general steps. In the first stage, the operations contractor ran a 20-record check to pretest their data capture programs. In the second step, DRC performed two tasks: scanning raw data from every optic-read area on the first 50 returned surveys and using a DMDC-supplied coding scheme to write software that converted the raw data to scored data. In the third step, DRC revised their programs after the test with the first 50 records, scanned surveys in batches as they were returned, and prepared three (preliminary, interim, and final) datasets with codebook tables showing the frequency of response for each variable in the datasets. This step provided DMDC with an opportunity to monitor data collection and begin preliminary analysis. In the fourth stage of processing returned surveys, DRC created files that contain narrative information (e.g. comments) from the surveys. These four stages of processing returned surveys are more fully described in the remainder of this section.

Preparing the Scoring Software and Coding Scheme

As soon as DRC received a scannable copy of the survey form, programmers began writing and testing programs to capture the data from the surveys. The scanner program was set up to capture data from every optic-read bubble or box on the form. At the same time, DRC began writing software to convert raw data from the scanner to a scored dataset. To start this task, DMDC provided DRC with an annotated copy of the survey form contained in Appendix C and the coding notes contained in Appendix D.

A guiding assumption in designing the coding scheme was that the analysts creating the dataset would not be the only people analyzing the data. Individuals in governmental, private-sector, and academic organizations analyze DMDC datasets repeatedly over time. Care is taken in organizing and documenting DMDC surveys so that secondary analysts can use the data and be reasonably certain that they understand how the data are coded and what limitations exist. Moreover, every attempt is made to preserve all information from completed surveys so that secondary analysts can later construct variables that were not anticipated by the original DMDC researchers.

To test the initial scanning programs, the operations contractor ran a 20-record pretest. DMDC created representative data for 20 surveys and DRC scanned, edited, and re-coded these data according to the data-capture procedures. The resulting scanned data were reviewed by DMDC. Revisions were requested by DMDC and implemented prior to the 50-record pretest. DRC scanned the first 50 returned surveys and created a scored dataset for these cases. Both DRC and DMDC compared the returned surveys with the scored dataset for these first 50 cases. Checks were done to determine if (a) the scanner was set at an acceptable level to pick up lightly marked bubbles and (b) respondents were consistently answering in an unexpected manner.

Creating the Scored Dataset

Prior to scanning bubbled answers and key entering narrative answers, returned surveys were visually checked and separated into three groups: blank forms, forms with one or more items completed, and forms that were completed in ink or otherwise damaged or unscannable. Blank forms were further divided into batches according to the reason that the form was returned blank (e.g., receipt of more than one survey, respondent deceased, or no reason given). The reason was captured in BLKREAS in the SCS. All blank forms were optically scanned so that lithocodes could be tracked and the number of returns could be updated.

Approximately 1.8% (677) of the respondents returned surveys that could not be scanned because they had been mutilated in the mail, lightly marked, or completed in ink. These surveys were key entered in separate batches to ensure that all usable data were captured.

Once these preliminary steps were taken, survey form pages were separated, stacked, and assigned a batch number. If the sample member included any extraneous materials, the MIC was written on the materials, and the materials were forwarded to DMDC. As the surveys were scanned, the SCS recorded each survey's batch number, serial number and scan date. The surveys were machine edited for light marks, multiple marks, alignment, and correct lithocodes.

The scanned (or key entered) survey forms were boxed by batch number. Each box was labeled with batch number and project number to facilitate locating individual processed forms. Forms were stored for a period of six months after the project completion date and were destroyed upon receipt of written notice from DMDC.

In addition to the previously mentioned 20 and 50 record checks of test and raw data, DRC provided DMDC with preliminary, interim, and final datasets and codebook tables. DMDC used the preliminary and interim datasets and codebook tables to finalize the information to be documented in the tables, create additional flag variables, and begin preliminary analysis. The final version of the datasets and tables also went through a similar fine tuning before they were published in their present form.

Capturing the Respondent-supplied Statements

Key entry of open-end response items into text files. After each batch of surveys was scanned, the surveys were transferred to key-entry personnel for comment entry. These personnel manually checked each page of the survey to determine if a respondent had supplied narrative answers to "Other, please specify" items or the general comments section at the end of the survey. "Other, please specify" items offered respondents a space for writing an answer when the pre-specified options did not fully cover all alternatives. The text of the narrative information was key entered nearly verbatim into ASCII files and spell-checked. Proper names were replaced with "(name)," and expletives were changed to "(expletive)".

The ASCII comment files contain INRECNOs and lithocodes to allow DMDC personnel to relate narrative responses to all other variables in the ADS Form A databases. Because of privacy and confidentiality concerns, these files are not available for public release.

Setting specify flags for open-end response items in the scored dataset. When the scanner detected text in an “Other, please specify” or general comment area, it placed a “2” in the corresponding field in the scanned data files. These “2” flags were used during the survey field period to monitor the occurrence of write-ins and to help verify that all general comments and “Other, please specify” answers were keyed and associated with the appropriate sample member. Because the scanner could make false detections from printed text on the reverse side of the page, scanned detection of narrative answers may not be reliable for indicating that written text was entered. Once all key-entry was completed, the specify flags in the final scored datasets were set to reflect where open-end responses had been given by respondents.

Survey Analysis Files

This section of the report (a) provides an overview of requirements for analysis of the data, (b) documents the structure of survey analysis files created for the ADS Form A, (c) describes the assembly of the analysis files, and (d) provides an overview of the variables in the survey analysis files.

Estimation

Data for the ADS Form A were collected from an non-proportional stratified, single stage random sample. Responses were weighted up to population totals adjusting for differential sampling and response rates in demographically homogenous groups. In general, the procedures used to compute sample estimates of population parameters (including population totals, means, proportions, tests of hypotheses and regression relations) and their associated variances are derived from the probability structure that gives rise to the observations. As with other surveys that involve complex probability structures, most of the parameter estimates of interest in this survey take the form of non-linear statistics. Examples include domain means and proportions where the denominator values are unknown and must be estimated from the sample data. The estimator takes the form of a ratio of random variables (i.e., the ratio of the estimated numerator and denominator totals or counts). In general, ratio estimates are not unbiased and their variances cannot be expressed in closed form. The bias in a ratio estimate depends on the variance associated with the denominator total or count and can usually be ignored in samples having a large number of observations. As a working rule, the bias may be assumed negligible if the number of observations on which the estimate is based exceeds 30 or is otherwise large enough so that the coefficient of variation $[SE(x)/x]$ of the denominator is less than .10 (cf., Cochran, 1977, pp. 153-165).

Approximations must, however, be found for the variances. The approximations commonly take the form of Taylor series linearizations or replicate methods such as those based on resampling methods. Variables have been included in the analyses files so that variance estimates can be based on Taylor series linearizations computed by SUDAAN⁸ for a stratified, without replacement design. Replicate methods can also be used to estimate the variances. Replicate weights (using the jackknife method of linearization) have been prepared. Appendix J gives examples of analyses using these methods.

Many of the standard statistical software packages, such as SPSS⁹ and older versions of SAS¹⁰, do not properly compute variance estimates from weighted data that were collected with a design other than simple random sampling. Analyzing the ADS Form A datasets with the proper use of PSW0 as the weighting factor in standard statistical programs will result in accurate point estimates but will not result in accurate variance estimates. Wolter (1985) provides a detailed discussion on methods used for variance estimation from sample surveys including replication, Taylor series approximation, and analytic methods.

⁸ SUDAAN® is a registered trademark of Research Triangle Institute, Research Triangle Park, NC, USA.

⁹ SPSS® is a registered trademark of SPSS Inc., Chicago, IL, USA.

¹⁰ SAS added some features in Version 7 and then expanded them with releases 8.0 and 8.1.

Data Structure

Care was taken in the preparation of the survey analysis files to provide public access to data from the survey with sufficient information for accurate estimations, while meeting requirements for participant and non-participant anonymity. As described below, some detailed variables have been deleted from the public-release files either because (a) they are typically needed only to analyze survey methods and not needed to analyze the survey data or (b) they provide too great a chance of identifying an individual. For the latter reason, some demographic variables are available on public files only in a collapsed version.

In addition to a public-release file, a confidential file (containing a more complete set of variables than the public-release file) has been prepared for internal DMDC use. These files were prepared as SAS system files. An ASCII (Operating System or OS) flat file was prepared from the public-release SAS system file. File names are indicated in Table 10.

Table 10.
Analysis File Names

Type of File	File Name
Public-release File – SAS	ADS99PUB.SD2
Confidential File – SAS	ADS99CON.SD2
Public-release File – OS	ADS99PUB.DAT

The structure of the confidential file is shown in Figure 3. The confidential file contains the public-release file plus additional confidential variables.

All variables in the confidential file are documented in this report. Appendices E and F list all variables with a notation to indicate which variables are confidential, and show where each variable is documented. Intermediate weighting variables that appear only in the confidential file are documented by Flores-Cervantes et al. (2000). Variables that appear in collapsed form in the public-release part of the file and in a fuller version only in the confidential file are discussed later.

Both the confidential file and public-release file contain 66,040 records, one for every sampled individual. As depicted in Figure 3, these 66,040 records can be divided into three subgroups. The first subgroup, nonrespondents, includes all records indicated by ELIGFLGW=3, where no usable response was received¹¹ (n= 374), or no information was received to indicate eligibility (n= 27,291). It also includes self- or proxy-reported ineligible records (n=2,275). The total number of records in this subgroup is 29,940.

Assignment of a record to the other two subgroups was based on whether (a) a member returned a “completed” survey; and (b) the person was eligible to be included in the population of interest (i.e., was found to be on active duty in the DEERS files at the end of May and September 1999, and did not contact DRC to indicate that they were ineligible).

¹¹ To be useable, a questionnaire had to have at least one item in each of the questions 39, 50 and 52 answered.

These two subgroups of records are required for analyses: records for study subjects determined to be ineligible (known ineligible), and records for study subjects who returned usable surveys and are assumed to be eligible (eligible respondents). Both the eligible respondents (ELIGFLGW = 1) and known ineligibles (ELIGFLGW = 2) are included because both types of records were used to develop weights that sum to the population total, and both types of records are needed to compute accurate variance estimates by the Taylor series linearization method implemented by SUDAAN.

Figure 3.
The Structure of the Survey Analysis Files

Subgroups	Public-release File	Confidential and Detailed Methodological Variables	Number of Records in Subgroup
Nonrespondents (ELIGFLGW=3)			29,940
Known Ineligible Sample Members (ELIGFLGW=2)			2,911
Eligible Respondents (ELIGFLGW=1)			33,189

Note. The shaded portion represents the subset of the data typically required for analysis.

Variables in the Survey Analysis Files

Public-release File

The variables in the public-release file fall into five categories: (a) derived from survey responses, (b) created by the operations contractor (DRC) to document survey operations, (c) created by the analysis contractor (Westat) to analyze the weighted dataset, (d) created by DMDC for analysis, and (e) extracted from administrative personnel records. Variables are grouped in these categories in Appendix F.

Information gathered on the survey. These variables came directly from the survey or were constructed using only information from the survey. There is at least one variable for every item in the survey except for a few items that had to be removed to preserve confidentiality. The annotated questionnaire (see Appendix C) contains the item names, the values used to code the pre-specified alternatives, and references to applicable coding notes in Appendix D. Appendix I

gives information on how DMDC evaluated the special values used for variables in survey skip patterns and documents the treatment of these values in DMDC analyses reported.

Although the first part of Appendix D extensively documents the conventions that DMDC uses to name survey variables, a brief overview of the naming convention is also given here. In general, the survey-derived variables can be classified as variables that begin with either “M,” “SR” or “PR.”

The naming of “M” variables is reviewed using the example variable, “M9916A”. The first character “M” in the name signifies the name of the study, (Active Duty Member). The second and third characters indicate the year in which the survey was initially scheduled to be administered (1999). The remaining digits indicate the question and item number. In this example, the fourth and fifth digits indicate the main question number (16) and the sixth and seventh digits (if any) indicate the sub-question item, such as (in this example) item A from a list of items in question 16.

The “SR” variables are a set of primarily demographic items that are identically named across all DMDC surveys. The “SR” serves as a mnemonic for self-report with the remainder of the name indicating the data being collected. For example, “SRRACE” is the variable name for the item that asks sample members what race they consider themselves to be. Although all survey data—including the variables beginning with “M”—are self-reported, the “SR” is used to distinguish survey-reported information from DMDC-provided information (e.g., “SRRACE” from the survey versus “RACE” from DMDC databases). Many items in this survey also requested proxy reports of the demographics of the individual’s spouse. These demographic variables start with “PR” to distinguish the spouse characteristics from the member characteristics that start with “SR.”

Information on operations. The operations contractor created identifying variables. The identifying variables describe how the record was tracked and processed once a survey was returned. Other identifying variables provide additional information for survey tracking. ARVDATE is the date the survey arrived at the survey operations center. The DMDC-provided identification number, DMDC_ID, is unique. (Note: DMDC_ID was not originally provided for this sample but generated later.)

Information on weighting. Derivation of weights is discussed in detail by Flores-Cervantes et. al (2000). See Appendix J for examples of analyses using these variables:

ELIGFLGW	Eligibility flag
POPTVSTR	Taylor series variance strata population
SMPTVSTR	Taylor's series achieved sample size in variance strata
TVSTR	Taylor's series variance strata
AD1CL	Non-response adjustment cell
PSTSTR	Final post-stratification cell
PSW0	Final post-stratified weight
PSW1-PSW170	Final post-stratified weight for Replicate 1 through Replicate 170
TVUNIT	Taylor series variance unit

Variables constructed for analysis. Certain demographic variables, including some information collected on the survey form, had to be censored to preserve the anonymity promised to survey respondents and nonrespondents. For example, RM9904 is recoded from M9904. An “R” as the first letter of a variable listed in sections of Appendices E and F is an indication that the variable has been recoded to preserve anonymity of respondents and that a more complete variable is available only on the confidential analysis file.

Certain key demographic variables were constructed for DMDC analyses. These analytic variables, starting with “X”, are based primarily on self-reported¹² information from the survey. In cases where the self-reported information was missing, the missing value was imputed from the member’s record. Also, other imputations were made so that race and ethnicity could be reported in accordance with Office of Management and Budget Bulletin 00-02 (March 2000) guidance for aggregation and allocation of multiple race responses for use in civil rights monitoring and enforcement. For members who self-reported “Some other race” as their race, race was imputed from record data; further, if the record data did not include a valid race value, then race was treated as missing.

The SAS code used in constructing these analytic variables are included in Appendix I. Two of the key demographic variables (i.e., XRETH1 and XMIMPP) are included in the confidential analytic variable section of the file. Two other variables (i.e., RXRETH1 and XMIMPPC) are recodings of the actual variables used in DMDC analysis –variables that are only contained on the confidential file because of the possibility of them being used in combination with other variables to identify individuals.

Appendix I also document many of the decisions made in the analyses reported. For a large number of survey items, analysts must make decisions on the treatment of special codes used to indicate inconsistencies in the survey data, especially on respondent failures to follow skip pattern directions. Skip flags indicate if the skip directions were followed.

Information from records. While most of the variables used in sample design and selection are too detailed to be in the public-release file (see the later sections on confidential variables), some items from the administrative records are included in the public-release file. One of the demographic variables that was not modified from record data are included on the public-release file: age (AGE_M)

Confidential File

In addition to variables on the public-release file, the confidential file has five additional categories of variables: (a) the uncensored version of survey items that appear in a collapsed form in the public-release section, (b) the uncensored version of key demographic variables used in analyses that appear in a collapsed form in the public-release section; (c) detailed variables created by DRC to document operations, (d) detailed variables used in sampling, and (e) detailed variables used in weighting. Variables are grouped in these categories in Appendices E and F.

¹² Self-reported demographics (e.g., paygrade, race/ethnicity, Service) on the survey are current with the collection of the other information on the survey and provide more consistency in responses than using the administrative record for these demographics.

Confidential variables—survey data. This section of the confidential file contains the original full version of survey variables that had to be recoded for the public-release file to preserve confidentiality. To the extent possible, recoded versions of these variables are in the public-release file section for variables constructed for analysis.

Confidential variables—analysis data. This section of the confidential file contains the original full version of analytic variables constructed by DMDC. To the extent possible, recoded versions of these variables are in the public-release file section for variables constructed for analysis.

Confidential variables—operations data. This section of the confidential file contains operational variables created by DRC. These variables are useful for methodological studies and/or were used by Westat in determining eligibility and response status.

The identifying variables describe how the record was processed once a survey was returned. The variables BATCH, SERIAL, and LITHO uniquely identify each returned survey. LITHO is the lithocode scanned from the survey. BATCH and SERIAL are the codes printed on the survey during scanning to identify the scan batch number and scan order of each survey. These numbers can be used to retrieve the paper copy of a survey for a short time after it has been scanned (e.g., should researchers want to check electronically-stored information against the respondent's answer on the paper survey). SCANDATE is the date the survey was scanned and INRECNO is the unique identification number assigned to each record/member. MAILING identifies which survey (i.e., the first-, second-, or third-wave mailing) the respondent returned. DUPRET and DUPRET2 indicate the receipt of multiple returns. DUPRET2 includes blank returns in the multiple count; DUPRET excludes these returns.

The classification variables describe how individual sample members' records were grouped and indexed. FLAG_FIN indicates the final disposition status of a sample member (i.e., survey returned, blank survey returned, not locatable, refused, or no return). Several other classification variables were used to categorize a survey's final disposition. These variables are: BLKREAS, SCSINEL, and REFUSE. BLKREAS codes the reason given by the sample member for returning a blank survey, SCSINEL indicates the reason given by the sample member for being ineligible, and REFUSE indicates whether a sample member refused to complete a survey.

Confidential variables—sampling and record data. This section of the confidential file contains administrative file variables and constructed variables used in determining the sampling design. It also includes the sampling strata identifiers and counts.

Confidential variables—weighting. This section of the confidential file contains variables used in analysis of nonresponse and in the construction of the weights. For more detail, see Flores-Cervantes et. al. (2000).

A Description of the Information in Appendix G

Regardless of whether analysts use all or only portions of the database, all analysts should replicate the results found in the tables in Appendix G. It is only by replicating these results that analysts can be sure that they are reading the data correctly. We especially

recommend that frequencies be done for ELIGFLGW. These counts should be compared to the codebook pages for these variables and to the numbers in Figure 4. These numbers are also key to checking that the subset files for analysis contain the correct number of cases.

An example of the tables in Appendix G is depicted in Figure 4. Fourteen aspects of the example are indicated by superscripted numbers and described in the following paragraphs that correspond to those numbers.

1. Codebook title. The codebook title is the same for every table in Appendix G of this codebook. It lists both the general study and the specific survey form being summarized. If applicable, the indented text under the title presents the verbatim question or instructions that accompany a specific item in the survey.

2. Variable name. The variable name for a survey item is up to eight characters in length and corresponds to the variable name that is used in the SAS-based, public-release datafile. The conventions for naming survey-derived variables are documented in Appendix D. Appendix F contains a full listing of the public-release file variables, as well as short descriptions of the variables.

3. Introductory text for the item series that includes the specific survey item. If there is any introductory text for a series of items it is displayed here. In some cases, the text is a simple instruction to the person to indicate whether they agree with the following statements or in some cases it is more extended instruction setting the context for answering.

4. Statement of survey item text. For survey items, this text is the verbatim item wording. For other variables, this text provides a verbal description of the variable.

5. Location of the item on the OS data file. This block provides the location of the variable on the OS (ASCII) datafile. The OS data block documents (a) the starting and ending column numbers where the data are stored and (b) the number of columns that the data occupy.

6. SAS datafile information. This block indicates format name, variable type, length and informat of the data in the SAS datafile. The last block indicates the informat appropriate for reading the data from the OS datafile.

7. Counts of item value responses. This column indicates the number of sample members who fall into the category corresponding to each value for the variable. The count provided for each variable value should correspond exactly to those that analysts would obtain when running unweighted frequencies on all 66,040 records in the accompanying database. Before running complex statistical analyses, analysts are encouraged to re-create these frequency tables. Re-creating the counts minimally ensures that the analysts' computers and programs are correctly reading the data.

8. Respondent percentages for each value. This column indicates the percentage of sample members who marked each variable value. The percentages are calculated by dividing the row value in the "FREQ" column by the total listed at the bottom of the "FREQ" column.

The percentages provided for each variable value should correspond exactly to those that analysts would obtain when running unweighted frequencies on all 66,040 records in the accompanying database.

9. Response OS values. This column presents the OS (ASCII) code for the actual or re-coded response values for each survey item. Further details on the values in this column are found in the annotated survey form (Appendix C). For example, all negative values are found in Appendix C.

10. Response SAS values. This column presents the SAS code for the actual or re-coded response values for each survey item. Further details on the values in this column are found in either the annotated survey form (Appendix C) or coding scheme (Appendix D).

11. Explanation of the item value codes. This column presents brief verbal explanations of the OS and SAS coding for each survey item. If the coded information corresponds to survey response alternatives, the text in the table is the verbatim response from the survey instrument. More detailed explanations are found in either the annotated survey form (Appendix C) or coding scheme (Appendix D).

12. Total of response frequencies and percents. The number appearing at the bottom of the “FREQ” column is the total number of sample members in the public-release file. This number is the same for every table in this codebook. That is, every sample member in the database is accounted for on every variable even if the variable indicates only that the information was missing for that sample member. The number appearing at the bottom of the “PERCENT” column is typically 100.0. Rounding error, however, occasionally causes the total percentage to be slightly above or below 100.0.

13. Messages to analysts. The messages alert analysts to situations specific to a variable including: (a) rounding errors resulting in a total percentage other than 100 percent; (b) the variable having values that are “too numerous to list;” (c) extraction of the variable from another specified database; (d) creation of the variable from two or more variables specified in the message; and (e) further clarification of the survey item corresponding to the variable.

14. Codebook page number. This is the Appendix G page number corresponding to a specific variable. Appendices E and F identify the page number in Appendix G where the variable can be found.

In accordance with the Privacy Act of 1974 (Public Law 93-579), this notice informs you of the purpose of the survey and how the findings will be used. Please read it carefully.

AUTHORITY: 10 U.S.C. 136, 10 U.S.C. 1782 and 10 U.S.C. 2358

PRINCIPAL PURPOSE: Information collected in this survey will be used to assess attitudes and perceptions of military life. This information will assist in the formulation of policies which may be needed to improve the military working environment and relevant personnel policies.

ROUTINE USES: Reports will be provided to the Secretaries of Defense and Transportation, and each Military Service. Findings will be used in reports and provided to Congress. Some findings may be published by the Defense Manpower Data Center (DMDC) or professional journals, or reported in manuscripts presented at conferences, symposia, and scientific meetings. In no case will the data be reported or used for identifiable individual(s).

DISCLOSURE: Providing information on this survey is voluntary. There is no penalty if you choose not to respond. However, maximum participation is encouraged so that the data will be complete and representative. Your survey instrument will be treated as confidential. Identifying information will be used only by persons engaged in, and for the purposes of, the survey. Only group statistics will be reported.

THIS IS NOT A TEST, SO TAKE YOUR TIME.

SELECT ANSWERS THAT BEST FIT YOU.

MARK ONLY ONE ANSWER FOR EACH QUESTION
UNLESS THE QUESTION SAYS TO MARK ALL THAT APPLY.

- MAKE HEAVY BLACK MARKS THAT FILL THE RESPONSE CIRCLES.
- DO NOT MAKE ANY MARKS OUTSIDE OF THE RESPONSE CIRCLES OR WRITE-IN BOXES.
- IF YOU CHANGE YOUR MIND, ERASE OLD MARKS COMPLETELY.
- DO NOT USE INK, BALL-POINT, OR FELT TIP PENS.

WRONG MARKS ✓ ✗ ● ○

ASSIGNMENT INFORMATION

1. During the past 12 months, how many hours per week did you usually work?

- ☐ 40 hours or less
☐ 41–50 hours
☐ 51–60 hours
☐ 61–70 hours
☐ 71–80 hours
☐ 81 hours or more

2. During your last full workweek, how many hours did you work?

- ☐ 40 hours or less
☐ 41–50 hours
☐ 51–60 hours
☐ 61–70 hours
☐ 71–80 hours
☐ 81 hours or more

3. When you have had to work more hours than usual during the past 12 months, what were the primary reasons? (MARK ALL THAT APPLY.)

- ☐ Not applicable
☐ Mission critical requirements
☐ Mission preparation/training/maintenance
☐ Tasked with additional duties (e.g., special projects)
☐ Unit was getting ready for deployment
☐ Manning not sufficient for workload (i.e., not enough authorizations/billets)
☐ Unit was under-manned (i.e., authorizations/billets not filled)
☐ Part of unit was deployed
☐ Demanding supervisor
☐ Problems involving subordinates
☐ High workload
☐ Poor planning or lack of planning
☐ Others were not carrying their workload
☐ Inspections and inspection preparation
☐ Equipment failure and repairs
☐ None of the above

4. Are you currently assigned to ship or shore duty?

- ☐ Ship
☐ Shore
☐ Does not apply, I do not have a ship/shore rotation

In this survey, “permanent duty station” is considered your permanent post, base, port, or other duty location, such as, a recruiting station.

5. Where is your permanent duty station located?

- ☐ In one of the 50 States or the District of Columbia
☐ In American Samoa, Guam, U.S. Virgin Islands or Puerto Rico
☐ Overseas

6. Are you currently on a deployment that will keep you away from home for at least 30 consecutive days?

- ☐ Yes
☐ No ⇒ Go to Question 8

7. Where are you currently deployed?

- ☐ In one of the 50 States or the District of Columbia
☐ In American Samoa, Guam, U.S. Virgin Islands or Puerto Rico
☐ Overseas
☐ Afloat at sea

8. Where do you live at your permanent duty station?

- ☐ Aboard ship
☐ Barracks/dorm (including BEQ or BOQ)
☐ Geographic bachelor's barracks
☐ Military family housing, on base
☐ Military family housing, off base
☐ Civilian housing that I own or pay mortgage on
☐ Military or civilian housing that I rent, off base
☐ Other

9. How satisfied are you with the following characteristics of your current residence and community at your permanent duty station?

	Very dissatisfied	Dissatisfied	Neither satisfied nor dissatisfied	Satisfied	Very satisfied
a. Cost of residence	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
b. Quality and condition of residence	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
c. Amount of livable space in residence	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
d. Privacy of residence	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
e. Quality of housing in the area where you live	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
f. Safety of the area where you live	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
g. Distance to workplace	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
h. Distance to shopping areas	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
i. Distance to recreation areas	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

PLEASE DO NOT WRITE IN THIS AREA

SERIAL #

10. Why did you choose your current residence at your permanent duty station? (MARK ALL THAT APPLY.)

- ☐ I had no choice in my residence
- ☐ Best value for the money
- ☐ Safety and security
- ☐ Close to workplace
- ☐ Close to base facilities, services or programs
- ☐ Spouse's choice
- ☐ Better schools
- ☐ Fewer rules
- ☐ Privacy
- ☐ Wanted to live in a specific area or community
- ☐ Available right away
- ☐ Military housing was unavailable
- ☐ Civilian housing was unavailable
- ☐ Better than available military housing (on base or off base)
- ☐ Better than available civilian housing
- ☐ Wanted military neighbors
- ☐ Wanted civilian neighbors
- ☐ Other

11. If your cost to live in civilian or military housing at your permanent duty station were the same, where would you prefer to live?

- ☐ Military housing, on base
- ☐ Military operated housing, off base
- ☐ Civilian housing

12. During your active duty career, how many permanent changes of station (PCSs) have you made? (INCLUDE PCS FOR A REMOTE OR UNACCOMPANIED TOUR.)

- ☐ Does not apply, I have not yet received my first assignment → Go to Question 14
- ☐ 1 ☐ 6
- ☐ 2 ☐ 7
- ☐ 3 ☐ 8
- ☐ 4 ☐ 9
- ☐ 5 ☐ 10 or more

13. For your most recent PCS move, were any of the following a problem? (ANSWER EVEN IF THIS IS YOUR FIRST ASSIGNMENT.)

	Does not apply	Not a problem	Slight problem	Somewhat of a problem	Serious problem
a. Change in PCS orders (report date or destination)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
b. Hours and location of offices providing PCS assistance	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
c. Waiting for permanent housing to become available	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

	Does not apply	Not a problem	Slight problem	Somewhat of a problem	Serious problem
d. Selling or renting out your former residence	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
e. Purchasing or renting your current residence	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
f. Amount of time to prepare for move	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
g. Shipping/storing household goods	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
h. TAD/TDY en route	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
i. Temporary lodging expenses	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
j. Costs related to security deposit(s)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
k. Cost of moving pets	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
l. Cost of moving vehicles	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
m. Costs of setting up new residence (e.g., curtains, carpeting, painting)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
n. Settling damage claims	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
o. Non-reimbursed transportation costs incurred during the move	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
p. Timeliness of reimbursements	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
q. Accuracy of reimbursements	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
r. Time off at destination to complete move	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
s. Change in cost of living	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
t. Loss or decrease of spouse income	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
u. Spouse employment	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
v. Transferability of entitlements (e.g., Supplemental Security Income)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
w. Obtaining special education services	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
x. Spouse/dependents changing schools	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
y. Transferability of college credits	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
z. Availability of childcare	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

19. How many days over the past 12 months have you been detailed for work outside the scope of your primary duties (e.g., “augmentee” assignments, maintenance tasks, installation support, support tasking, and wing ready teams)?

- ☐ None
- ☐ 1–10 days
- ☐ 11–20 days
- ☐ 21–30 days
- ☐ 31–40 days
- ☐ 41–50 days
- ☐ 51–60 days
- ☐ More than 60 days

20. How prepared do you believe your unit is to perform its mission with regard to . . . ?

	Very poorly prepared	Poorly prepared	Neither well nor poorly prepared	Well prepared	Very well prepared
a. Manning level	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
b. Training	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
c. Parts and equipment	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

21. Suppose you will be in the military for the next 12 months. What is the total length of time that you would expect to be away from your permanent duty station because of your military duties?

- ☐ I would not expect to be away from my permanent duty station in the next 12 months
- ☐ Less than 1 month
- ☐ 1 month to less than 3 months
- ☐ 3 months to less than 5 months
- ☐ 5 months to less than 7 months
- ☐ 7 months to less than 10 months
- ☐ 10 months to 12 months

CAREER INFORMATION

22. What were your career intentions when you first entered active duty?

- ☐ I intended to remain on active duty until I was eligible for retirement
- ☐ I intended to complete my obligation and then leave active duty
- ☐ I was not sure if I would stay on active duty or leave

23. Think back to when you first entered active duty. Which of the following best describe the primary reasons why you joined? (MARK ALL THAT APPLY.)

- ☐ A. Trouble in college or break from school
- ☐ B. Get away from family, personal situation, or home town
- ☐ C. Time to figure out what you wanted to do
- ☐ D. Test yourself physically or mentally
- ☐ E. Challenging or interesting work
- ☐ F. Always wanted to be in the military
- ☐ G. Military tradition in your family
- ☐ H. Parents' encouragement
- ☐ I. Desire to serve your country
- ☐ J. Image portrayed by military personnel
- ☐ K. Few or no civilian job opportunities
- ☐ L. Pay and allowance(s)
- ☐ M. Retirement pay and benefits
- ☐ N. Security and stability of the job
- ☐ O. Opportunity to work in a specific occupation
- ☐ P. Training in skills useful for civilian employment
- ☐ Q. Family benefits
- ☐ R. Travel and new experiences
- ☐ S. Money for college, college repayment, education benefits and opportunities
- ☐ T. Personal growth and maturity
- ☐ U. Other

24. Of all your reasons listed in Question 23, which is the most important reason why you joined?

<input type="radio"/> A	<input type="radio"/> B	<input type="radio"/> C	<input type="radio"/> D	<input type="radio"/> E	<input type="radio"/> F	<input type="radio"/> G
<input type="radio"/> H	<input type="radio"/> I	<input type="radio"/> J	<input type="radio"/> K	<input type="radio"/> L	<input type="radio"/> M	<input type="radio"/> N
<input type="radio"/> O	<input type="radio"/> P	<input type="radio"/> Q	<input type="radio"/> R	<input type="radio"/> S	<input type="radio"/> T	<input type="radio"/> U

25. . . . and which is the next most important reason why you joined?

<input type="radio"/> A	<input type="radio"/> B	<input type="radio"/> C	<input type="radio"/> D	<input type="radio"/> E	<input type="radio"/> F	<input type="radio"/> G
<input type="radio"/> H	<input type="radio"/> I	<input type="radio"/> J	<input type="radio"/> K	<input type="radio"/> L	<input type="radio"/> M	<input type="radio"/> N
<input type="radio"/> O	<input type="radio"/> P	<input type="radio"/> Q	<input type="radio"/> R	<input type="radio"/> S	<input type="radio"/> T	<input type="radio"/> U
<input type="radio"/> None						

26. When you first entered active duty service, did you have a preference for a military occupation?

- ☐ Yes
- ☐ No ⇒ Go to Question 28

27. Did you receive the military occupation of your choice?

- ☐ Yes
- ☐ No, but I received a related occupation
- ☐ No, I received an occupation unrelated to my choice

- ☐ Very satisfied
- ☐ Satisfied
- ☐ Neither satisfied nor dissatisfied
- ☐ Dissatisfied
- ☐ Very dissatisfied

- ☐ I am on indefinite status ⇒ Go to Question 32
- ☐ I am an officer serving an obligation
- ☐ 1st enlistment
- ☐ 2nd or later enlistment

- ☐ Less than 3 months
- ☐ 3 months to less than 7 months
- ☐ 7 months to less than 1 year
- ☐ 1 year to less than 2 years
- ☐ 2 years to less than 3 years
- ☐ 3 years or more

- ☐ Very likely
- ☐ Likely
- ☐ Neither likely nor unlikely
- ☐ Unlikely
- ☐ Very unlikely

- ☐ Very likely
- ☐ Likely
- ☐ Neither likely nor unlikely
- ☐ Unlikely
- ☐ Very unlikely

- ☐ Less than 3 months
- ☐ 3 months to less than 7 months
- ☐ 7 months to less than 1 year
- ☐ 1 year to less than 2 years
- ☐ 2 years or more
- ☐ Does not apply, I do not expect a promotion
- ☐ Does not apply, I have no opportunities for promotion

- ☐ Strongly favors staying
- ☐ Somewhat favors staying
- ☐ Has no opinion one way or the other
- ☐ Somewhat favors leaving
- ☐ Strongly favors leaving
- ☐ Does not apply, I don't have a spouse or girlfriend/boyfriend

- ☐ Very likely
- ☐ Likely
- ☐ Neither likely nor unlikely
- ☐ Unlikely
- ☐ Very unlikely
- ☐ Does not apply, I have 20 or more years of service

- | | |
|---|---|
| | |
| 0 | 0 |
| 1 | 1 |
| 2 | 2 |
| 3 | 3 |
| 4 | 4 |
| | 5 |
| | 6 |
| | 7 |
| | 8 |
| | 9 |

For example, if you expect to leave after completing 6 years of service, enter "06" in the boxes and fill in the corresponding circles. To indicate less than 1 year, enter "00."

- ☐ Attend college or university
- ☐ Work for civilian company or organization
- ☐ Work in a civilian government job (local, state, or federal)
- ☐ Manage or work in family business
- ☐ Self-employed in your own business or profession
- ☐ A homemaker/housewife/househusband
- ☐ Go into full-time retirement
- ☐ None of the above

- ☐ Very likely
- ☐ Likely
- ☐ Neither likely nor unlikely
- ☐ Unlikely
- ☐ Very unlikely
- ☐ Does not apply, I am a member of a National Guard or Reserve unit
- ☐ Does not apply, retiring or otherwise ineligible

7

39. How satisfied are you with each of the following?

	Does not apply	Very dissatisfied	Dissatisfied	Neither satisfied nor dissatisfied	Satisfied	Very satisfied
A. Basic pay	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
B. Special and incentive pay	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
C. Reenlistment bonus or continuation pay program	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
D. Housing allowance	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
E. SEPRATS/COMRATS, subsistence allowance	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
F. Military housing	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
G. Medical care for you	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
H. Dental care for you	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
I. Retirement pay you would get	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
J. Cost of living adjustments (COLA) to retirement pay	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
K. Other retirement benefits such as medical care and use of base services	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
L. Pace of your promotions	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
M. Chances for future advancement	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
N. Training and professional development	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
O. Type of assignments received	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
P. Deployments	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Q. Other military duties that take you away from permanent duty station	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
R. Availability of equipment, parts, and resources	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
S. Level of manning in your unit	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
T. Your unit's morale	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
U. Your personal workload	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
V. Amount of personal/family time you have	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

	Does not apply	Very dissatisfied	Dissatisfied	Neither satisfied nor dissatisfied	Satisfied	Very satisfied
W. Off duty educational opportunities	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

MILITARY LIFE

44. How important should the following factors be in determining total military compensation, including pay, benefits, and allowances?

Does not apply
Not important
Somewhat important
Moderately important
Important
Very important

- | | | | | | | |
|----|--|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|
| a. | Job difficulty | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| b. | Job performance | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| c. | Danger | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| d. | Time spent away from home | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| e. | Number of hours worked | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| f. | Level of responsibility | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| g. | Amount of education/training | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| h. | Years of experience | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| i. | Amount civilian employer would pay for this type of work | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| j. | Amount needed to provide for family | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| k. | Cost of living | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

45. How much do you agree or disagree with the following statements?

Strongly disagree

Disagree

Neither agree nor disagree

Agree

Strongly agree

- | | | | | | | |
|----|---|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|
| a. | During the past 12 months, the missions I was involved with were important to the national interest | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| b. | During the past 12 months, most or all of the military duties I performed improved or maintained unit or individual readiness | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| c. | I would find it rewarding to deploy on a peacekeeping/peacemaking operation (e.g., Bosnia) | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| d. | I would find it rewarding to deploy on an overseas humanitarian relief effort (e.g., foreign disaster relief such as Nicaragua) | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| e. | Very little of my experience and training can be directly transferred to a civilian job | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| f. | It would be easy for me to get a good civilian job if I left the military now | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| g. | I have a pretty good idea of the kinds of jobs I could get as a civilian. | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| h. | I have a pretty good idea of what pay I could get as a civilian | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| i. | The benefits available to military personnel and their families have eroded over the past few years | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| j. | If asked today, I would encourage others to join the military | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

46. In general, has your life been better or worse than you expected when you first entered the military?

- ☐ Much better
- ☐ Somewhat better
- ☐ About what you expected
- ☐ Somewhat worse
- ☐ Much worse
- ☐ Don't remember

PLEASE DO NOT WRITE IN THIS AREA

SERIAL #

47. In general, has your work been better or worse than you expected when you first entered the military?

- ☐ Much better
☐ Somewhat better
☐ About what you expected
☐ Somewhat worse
☐ Much worse
☐ Don't remember

48. During the past 6 months, have you done any of the following to explore the possibility of leaving the military? (MARK ALL THAT APPLY.)

- ☐ Thought seriously about leaving the military
☐ Wondered what life might be like as a civilian
☐ Discussed leaving and/or civilian opportunities with family members or friends
☐ Talked about leaving with my immediate supervisor
☐ Gathered information on education programs or colleges
☐ Gathered information about civilian job options (e.g., read newspaper ads, attended a job fair)
☐ Attended a program that helps people prepare for civilian employment
☐ Prepared a resume
☐ Applied for a job
☐ Interviewed for a job
☐ None of the above

49. How do your opportunities in the military compare to opportunities you would have in the civilian world?

	Much better in the military	Somewhat better in the military	No difference	Somewhat better as a civilian	Much better as a civilian	Don't know
a. Promotion opportunities	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
b. Amount of personal/family time	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
c. Hours worked per week	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
d. Vacation time	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
e. Education and training opportunities	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
f. Total compensation (pay, bonuses, allowances).	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
g. Health care benefits	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
h. Retirement benefits	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
i. Sense of accomplishment/pride	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
j. General quality of life	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

50. How much do you agree or disagree with the following statements?

	Strongly disagree	Disagree	Neither agree nor disagree	Agree	Strongly agree
a. Most of my friends belong to the military community	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
b. The military community is there for me when I need it	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
c. I have a lot in common with the civilian community	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
d. Members of the military community sometimes turn to me for help or support.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
e. Living on base helps active duty members and their families make ends meet	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
f. I talk up my Service to my friends as a great organization to be a part of.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
g. There is not much to be gained for me by sticking with a military career.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
h. I am proud to be a member of my Service.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
i. I find that my values and the values of my Service are very similar	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
j. Being a member of my Service inspires me to do the best job I can	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
k. I would turn down another job for more pay in order to remain in my Service.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
l. My Service's evaluation/selection system is effective in promoting its best members	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
m. If I stay in the Service, I will be promoted as high as my ability and effort warrant	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

51. Now, taking all things together, how satisfied are you with the military way of life?

- ☐ Very satisfied
☐ Satisfied
☐ Neither satisfied nor dissatisfied
☐ Dissatisfied
☐ Very dissatisfied

PROGRAMS AND SERVICES

52. On average during a month, how often do you use the following on base programs, facilities, or services and civilian off base programs, facilities, or services?

For <u>each</u> of these 13 items, mark one response in column A <u>and</u> one response in column B.	A. On Base Program, Facility or Service								B. Civilian Off Base Program, Facility or Service							
	Not available	0 times	1-5 times	6-10 times	11-15 times	16-20 times	21-25 times	26 times or more	Not available	0 times	1-5 times	6-10 times	11-15 times	16-20 times	21-25 times	26 times or more
1. Fitness Center/Gym	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
2. Library services	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Main exchange/department store	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
12. Social activities for service members (e.g., trips, special events, tournaments)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
13. Auto, crafts and hobby shops	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

53. During the past 12 months, have you used any of the following programs and services? (MARK ONE ANSWER IN EACH ROW.)

- | | Yes | No |
|---|-----------------------|-----------------------|
| a. Adult continuing education/counseling | <input type="radio"/> | <input type="radio"/> |
| b. Tuition assistance programs for college/higher education | <input type="radio"/> | <input type="radio"/> |
| c. Technical/vocational programs | <input type="radio"/> | <input type="radio"/> |
| d. Basic skills education | <input type="radio"/> | <input type="radio"/> |

FAMILY INFORMATION

54. What is your marital status?

- ☐ Now married
☐ Separated
☐ Divorced ⇒ Go to Question 57
☐ Widowed ⇒ Go to Question 57
☐ Never married ⇒ Go to Question 58

55. Is your spouse currently: (MARK ALL THAT APPLY.)

- ☐ Serving on active duty (not a member of the National Guard or Reserve)
☐ Member of the National Guard or Reserve in a full-time active duty program (AGR, TAR, AR)
☐ Other type of National Guard or Reserve member (e.g., drilling unit, IMA, IRR, military technician)
☐ Working in a Federal civilian job (full-time)
☐ Working in a Federal civilian job (part-time)
☐ Working in a civilian job on base (full-time)
☐ Working in a civilian job on base (part-time)
☐ Working in a civilian job off base (full-time)
☐ Working in a civilian job off base (part-time)
☐ Managing or working in family business
☐ Self-employed in his/her own business or profession
☐ Unemployed and looking for work
☐ In school
☐ Homemaker/housewife/househusband
☐ Retired
☐ Other (specify):

56. What is the highest degree or level of school that your spouse has completed? (MARK THE ONE ANSWER THAT DESCRIBES THE HIGHEST GRADE OR DEGREE THAT YOUR SPOUSE HAS COMPLETED.)

- ☐ 11th grade or less
☐ 12 years of school, no diploma
☐ High school graduate—high school diploma or the equivalent (e.g., GED)
☐ Some college credit, but less than 1 year
☐ 1 or more years of college, but no degree
☐ Associate degree (e.g., AA, AS)
☐ Bachelor's degree (e.g., BA, AB, BS)
☐ Master's, doctoral degree, or professional school degree (e.g., MA/MS/PhD/MD/JD/DVM)

57. How many times have you been divorced?

- ☐ None
☐ 1
☐ 2
☐ 3 or more

For questions in this section, the definition of “child or children” or “other legal dependents” includes anyone in your family, **except your spouse**, who has or is eligible to have a Uniformed Services identification card (military ID card) or is eligible for military health care benefits and is enrolled in the Defense Enrollment Eligibility Reporting System (DEERS).

58. Do you have a child, children or other legal dependents based on the definition above?

- ☐ Yes
☐ No ⇒ Go to Question 73

59. How many children or other legal dependents do you have in each age group? (MARK ONE ANSWER IN EACH ROW.)

Age	None	1	2	3	4	5 or more
a. Under 1 year old	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
b. 1 year to under 2 years old	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
c. 2–5 years old	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
d. 6–13 years old	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
e. 14–22 years old	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
f. 23–64 years old	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
g. 65 years old or older	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

60. How many children or other legal dependents do you have in each of the following age groups who live on a regular basis with you at your permanent duty station? (MARK ONE ANSWER IN EACH ROW.)

Age	None	1	2	3	4	5 or more
a. Under 1 year old	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
b. 1 year to under 2 years old	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
c. 2–5 years old	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
d. 6–13 years old	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
e. 14–22 years old	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
f. 23–64 years old	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
g. 65 years old or older	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

61. How many children or other legal dependents do you have in each of the following age groups who live on a regular basis at a different location than your permanent duty station? (MARK ONE ANSWER IN EACH ROW.)

Age	None	1	2	3	4	5 or more
a. Under 1 year old	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
b. 1 year to under 2 years old	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
c. 2–5 years old	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
d. 6–13 years old	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
e. 14–22 years old	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
f. 23–64 years old	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
g. 65 years old or older	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

PLEASE DO NOT WRITE IN THIS AREA

SERIAL #

62. During the **past 12 months**, have you **routinely** used any of the following childcare arrangements? (MARK ALL THAT APPLY.)

- ☐ Not applicable, I have not used any of the following childcare arrangements ⇒ Go to Question 68
- ☐ Child's other parent or stepparent
- ☐ Child's brother or sister (aged 15 or older)
- ☐ Child's brother or sister (under the age of 15)
- ☐ Child's grandparent
- ☐ Other relative
- ☐ Friend or neighbor
- ☐ Sitter, nanny, or au pair
- ☐ Preschool (on base)
- ☐ Preschool (off base)
- ☐ "Child Development Center" (on base)
- ☐ Childcare center/day care center (off base)
- ☐ "Family Childcare Home" (on base)
- ☐ Childcare provider in a home setting (off base)
- ☐ "School-Age Care Program" (on base)
- ☐ After-school program (off base)
- ☐ Federally supported Head Start program
- ☐ None of the above

63. How many of your children routinely use the childcare arrangements marked in Question 62?

- ☐ 1
- ☐ 2
- ☐ 3
- ☐ 4
- ☐ 5 or more

64. What is the **total** amount that you spent **last month** on childcare arrangements for all of your children?

- ☐ Does not apply, I spent no money on childcare arrangements last month

MONTHLY CHILD CARE EXPENSE

Write your monthly expense in the boxes, then fill in the corresponding circles. For example, if you spent \$100 last month, you would enter "0100."

65. During the **past 12 months**, was there any change in your childcare arrangements for your child or children?

- ☐ Yes
- ☐ No ⇒ Go to Question 68

66. For what reasons did the childcare arrangements change? (MARK ALL THAT APPLY.)

- ☐ Beginning, ending, or changes in a child's school enrollment
- ☐ Beginning, ending, or changes in military assignment
- ☐ Beginning, ending, or changes in spouse's school enrollment
- ☐ Cost
- ☐ Availability or hours of care provider
- ☐ Reliability of care provider
- ☐ Quality of care provided
- ☐ Care provider's location or accessibility
- ☐ Never had any regular arrangement
- ☐ Child outgrew arrangement
- ☐ No longer eligible for assistance
- ☐ Arrangement no longer available
- ☐ Other (specify):

--

67. During the **past 12 months**, did you lose **any** time from your military duties (work, school, or training) due to a **change** in childcare arrangements?

- ☐ Yes
- ☐ No

68. Do you have a child or children enrolled in school?

- ☐ Yes
- ☐ No ⇒ Go to Question 73

69. What type of school does your youngest school-age child attend?

- ☐ College or university ⇒ Go to Question 73
- ☐ Public school off base
- ☐ Public school on base
- ☐ DoD school for dependents
- ☐ A religion-affiliated school
- ☐ A private day school, not religion-affiliated
- ☐ A private boarding school
- ☐ Home school
- ☐ Other (specify):

--

70. About how many **hours per week** does your child usually spend in school? (If you have more than one child, answer for the youngest school-age child.)

HOURS PER WEEK

Write the number of hours in the boxes, then fill in the corresponding circles.

71. For the type of school you marked in Question 69, please rate the following.

	N/A/DK = Not applicable or don't know	E = Fail	D = Poor	C = Satisfactory	B = Good	A = Excellent
a. Overall academic program						
b. Support services provided by the school						
c. Special education programs						
d. Physical plant (building, school grounds, heating/cooling, food service, etc.)						
e. Availability of extracurricular activities						
f. Safety of school						
g. Overall quality of the school						

72. Have you participated in, or have you been involved with, the following activities related to your child's or children's education? (MARK ALL THAT APPLY.)

- ☐ Attending conferences or meetings with teachers regarding the school
- ☐ Working with teachers to promote achievement
- ☐ Collaborating on educational opportunities for students, parents, and teachers
- ☐ Planning and implementing curricular and extracurricular activities
- ☐ Participating in decision making and problem solving to promote learning
- ☐ None of the above

73. Do you have a child, spouse, or other legal dependent enrolled in the Exceptional Family Member Program (EFMP) or the Coast Guard Special Needs Program?

- ☐ Yes
- ☐ No

74. Do you have caregiver responsibilities for an elderly family member (shopping, home maintenance, transportation, checking on them by phone, finances, arrangements for care, etc.)? (This includes persons who live with you or live somewhere else.)

- ☐ Yes
- ☐ No \Rightarrow Go to Question 77

75. How many elderly family members do you have caregiver responsibilities for?

- ☐ One
- ☐ Two
- ☐ Three or more

76. During the past 12 months, did you lose any time from your military duties due to eldercare responsibilities?

- ☐ Yes
- ☐ No

77. How satisfied or dissatisfied are you with each of the following aspects of military health care for your family?

- ☐ Does not apply, I do not have any family members eligible to receive military health care ⇒ Go to Question 78

	Very dissatisfied	Dissatisfied	Neither satisfied nor dissatisfied	Satisfied	Very satisfied
a. My out-of-pocket cost for care	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
b. Skill of physicians and other medical providers	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
c. Availability of specialists	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
d. Ability to get appointments	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
e. Waiting time in the clinic	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
f. Overall quality of care	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
g. Administrative requirements (claims, paperwork, approvals, etc.).	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

78. In the last month, did you perform any non-military volunteer work?

- ☐ Yes \Rightarrow Go to Question 80
- ☐ No

**79. What were your reasons for not volunteering?
(MARK ALL THAT APPLY.)**

- ☐ I was not asked to perform volunteer work
- ☐ I did not have time for volunteer work
- ☐ I did not have access to childcare so I could perform volunteer work
- ☐ I am not interested in volunteer work
- ☐ I did not have transportation
- ☐ None of the above

80. How is your general outlook about your life?

- ☐ Very optimistic
- ☐ Optimistic
- ☐ Neither optimistic nor pessimistic
- ☐ Pessimistic
- ☐ Very pessimistic

81. Are you accompanied by family members (spouse, child, or other legal dependents) at your permanent duty station?

- ☐ Yes ⇒ Go to Question 83
- ☐ No

82. Why didn't your family members accompany you to your permanent duty station? (MARK ALL THAT APPLY.)

- ☐ Does not apply, I have no family members
- ☐ Legal separation or divorce from spouse
- ☐ Temporarily unaccompanied (family members will join me later)
- ☐ Permanently unaccompanied because it was required for the authorization/billet
- ☐ Permanently unaccompanied because family members were not command sponsored (overseas tour)
- ☐ Permanently unaccompanied because household goods move was not authorized with PCS orders
- ☐ Spouse's career
- ☐ Spouse's education
- ☐ Child's/children's education
- ☐ Health or illness of family member
- ☐ Eldercare responsibilities
- ☐ Other (specify):

83. During your active duty career, how many times did your family members move to a new location because of your permanent change of station (PCS)?

- ☐ None
- ☐ 1
- ☐ 2
- ☐ 3
- ☐ 4
- ☐ 5
- ☐ 6
- ☐ 7
- ☐ 8
- ☐ 9
- ☐ 10 or more

84. Have any of your relatives ever served on active military duty? (MARK ALL THAT APPLY.)

- ☐ Parent or guardian
- ☐ Spouse
- ☐ Brother or sister
- ☐ Son or daughter
- ☐ Grandparent
- ☐ Uncle or aunt
- ☐ Cousin
- ☐ Other close relative
- ☐ None of my relatives have served on active duty

ECONOMIC ISSUES

The questions in this section address economic issues in the lives of military members and their families. The information will be used to better understand the economic and financial concerns of military members and their families. Although people will have different views on what is or is not personal, many people will consider some of the questions very personal. Please continue with the survey even if there are some questions that you want to skip.

85. During your off-duty time, do you currently hold a second job or work at your own business?

- ☐ Yes
- ☐ No ⇒ Go to Question 87

86. On average, how many hours a week do you spend working at a civilian job or working at your own business during your off-duty hours?

0	0
1	1
2	2
3	3
4	4
5	5
6	6
7	7
8	8
9	9

HOURS PER WEEK

For example, if you worked 8 hours, enter "08" in the boxes and fill in the corresponding circles.

87. During the past 12 months, did you (and your spouse) receive any income or financial support from the following sources? (MARK ALL THAT APPLY.)

- ☐ A second job
- ☐ Alimony
- ☐ Child support
- ☐ Supplemental Security Income (SSI)
- ☐ Unemployment or Worker's compensation
- ☐ State-funded childcare assistance
- ☐ Women, Infants, and Children (WIC)
- ☐ Food Stamp Program
- ☐ Head Start Program
- ☐ Aid to Families with Dependent Children (AFDC)
- ☐ Medicaid
- ☐ Other (specify):

88. What is your total monthly gross (before-tax) household income from all sources? (Please include your military earnings, your earnings from a second job, your spouse's earnings, and income or financial support from any other source.)

- ☐ \$1–1,000
- ☐ \$1,001–2,000
- ☐ \$2,001–3,000
- ☐ \$3,001–4,000
- ☐ \$4,001–5,000
- ☐ \$5,001–6,000
- ☐ \$6,001–7,000
- ☐ \$7,001–8,000
- ☐ \$8,001–9,000
- ☐ \$9,001–10,000
- ☐ \$10,001 and above

89. Roughly, what is the total amount of savings you (and your spouse) have? (Please include funds in bank accounts, IRAs, money market accounts, Certificates of Deposit (CDs), Savings Bonds, mutual funds, stocks and/or bonds.)

- ☐ \$0
- ☐ \$1–1,000
- ☐ \$1,001–2,500
- ☐ \$2,501–5,000
- ☐ \$5,001–7,500
- ☐ \$7,501–10,000
- ☐ \$10,001–12,500
- ☐ \$12,501–15,000
- ☐ \$15,001–17,500
- ☐ \$17,501–20,000
- ☐ \$20,001–50,000
- ☐ \$50,001–100,000
- ☐ \$100,001 and above

90. Do you (or your spouse) pay child support?

- ☐ Yes, I pay child support
- ☐ Yes, my spouse pays child support
- ☐ Yes, both my spouse and I pay child support
- ☐ No

91. What is the total amount you (and your spouse) paid last month for rent or mortgage?

- ☐ \$0
- ☐ \$1–400
- ☐ \$401–800
- ☐ \$801–1,200
- ☐ \$1,201–1,600
- ☐ \$1,601–2,000
- ☐ \$2,001 and above

92. What is the total amount you (and your spouse) paid last month for all car loans and leases on cars, trucks, or motorcycles?

- ☐ \$0
- ☐ \$1–250
- ☐ \$251–500
- ☐ \$501–750
- ☐ \$751–1,000
- ☐ \$1,001–1,250
- ☐ \$1,251–1,500
- ☐ \$1,501 and above

93. What is the amount of payments that you (and your spouse) made last month to cover personal unsecured debt? (Include all credit cards, debt consolidation loans, AAFES loans, NEXCOM loans, student loans, and other personal loans; exclude home mortgage and car loans.)

- ☐ \$0
- ☐ \$1–150
- ☐ \$151–300
- ☐ \$301–450
- ☐ \$451–600
- ☐ \$601–750
- ☐ \$751–900
- ☐ \$901–1,050
- ☐ \$1,051 and above

94. After the last payment was made on personal unsecured debt, what was the total amount you (and your spouse) still owed? (Include all credit cards, debt consolidation loans, AAFES loans, NEXCOM loans, student loans, and other personal loans; exclude home mortgage and car loans.)

- ☐ \$0
- ☐ \$1–1,000
- ☐ \$1,001–2,500
- ☐ \$2,501–5,000
- ☐ \$5,001–7,500
- ☐ \$7,501–10,000
- ☐ \$10,001–12,500
- ☐ \$12,501–15,000
- ☐ \$15,001–17,500
- ☐ \$17,501–20,000
- ☐ \$20,001 and above

95. Which of the following best describes the financial condition of you (and your spouse)?

- ☐ Very comfortable and secure
- ☐ Able to make ends meet without much difficulty
- ☐ Occasionally have some difficulty making ends meet
- ☐ Tough to make ends meet but keeping your head above water
- ☐ In over your head

PLEASE DO NOT WRITE IN THIS AREA

SERIAL #

96. In the **past 12 months**, did any of the following happen to you (and your spouse)? (MARK ALL THAT APPLY.)

- ☐ Bounced two or more checks
- ☐ Received a letter of indebtedness (e.g., a letter from a lender to your commanding officer that payment is late)
- ☐ Had your wages garnished
- ☐ Fell behind in paying your rent or mortgage
- ☐ Fell behind in paying your credit card, AAFES, or NEXCOM account
- ☐ Was pressured to pay bills by stores, creditors, or bill collectors
- ☐ Had a bill collector contact your unit leader
- ☐ Pawned or sold valuables to make ends meet
- ☐ Borrowed money from friends or relatives to help you with a financial difficulty
- ☐ Borrowed money through an Emergency Loan Assistance Program or a Service Aid Society
- ☐ Had your utilities (telephone, cable, water, heat or electricity) shut off
- ☐ Had a car, household appliances, or furniture repossessed
- ☐ Was unable to afford needed medical care
- ☐ Went bankrupt (declared personal bankruptcy)
- ☐ None of the above

A Thrift Savings Plan (TSP) is a tax-deferred retirement savings plan like a 401(k) plan.

- Employees may deposit a portion of their pay (typically up to 5 or 10 percent) before taxes into a long-term fund to provide savings for retirement.
- Employers may match none, some, or all of their employees' contributions.
- A wide range of investment options is generally available, including funds that follow the stock and bond markets.
- TSP funds may be taken to another employer or rolled over into other qualified retirement savings plans.
- Funds may begin to be withdrawn at around age 59½—earlier withdrawals are usually penalized.

97. If this type of plan were made available to you, how likely would you be to participate in each of the following situations?

	Very unlikely	Unlikely	Neither likely nor unlikely	Likely	Very likely
a. If there were no government matching	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
b. If the government matched your contribution up to 5% of pay	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
c. If you could invest any reenlistment or continuation bonus into the fund tax-deferred	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

98. Which, if any, of the following is your **main** concern about the military retirement system?

- ☐ Does not apply, I have no concerns
- ☐ No pension benefits are earned unless you serve at least 20 years
- ☐ No ability to save toward retirement with a 401(k) or other retirement savings program
- ☐ The government does not match any money you put away for retirement
- ☐ You cannot transfer your retirement benefits to another employer
- ☐ Other

99. **Currently, military personnel do not qualify for retirement benefits unless they serve for at least 20 years. If the system were changed so that you became eligible after at least 10 years of service for a deferred pension payable at age 62, how much influence would this have on your willingness to stay in the military until at least the 10-year point?**

- ☐ Does not apply, I have already served 10 years
- ☐ Does not apply, I already intend to stay
- ☐ Little or no influence
- ☐ Some influence
- ☐ Moderate influence
- ☐ Strong influence

100. **Congress is considering a proposal to modify the retirement pay formula for those who entered the service on or after August 1, 1986 to the same formula that applied to those who entered before that date. Assuming the retirement pay formula were changed, how much influence would this have on your willingness to stay in the military?**

- ☐ This would not affect me since I entered the service before August 1, 1986
- ☐ Does not apply, I already intend to stay
- ☐ Little or no influence
- ☐ Some influence
- ☐ Moderate influence
- ☐ Strong influence

BACKGROUND INFORMATION

101. Are you:

- ☐ Male
- ☐ Female

102. Is English a second language for you?

- ☐ Yes
- ☐ No

103. Are you Spanish/Hispanic/Latino? (MARK "No" IF NOT SPANISH/HISPANIC/LATINO.)

- ☐ No, not Spanish/Hispanic/Latino
- ☐ Yes, Mexican, Mexican American, Chicano
- ☐ Yes, Puerto Rican
- ☐ Yes, Cuban
- ☐ Yes, other Spanish/Hispanic/Latino

104. What is your race? (MARK ONE OR MORE RACES TO INDICATE WHAT YOU CONSIDER YOURSELF TO BE.)

- ☐ White
- ☐ Black or African-American
- ☐ American Indian or Alaska Native
- ☐ Asian (e.g., Asian Indian, Chinese, Filipino, Japanese, Korean, Vietnamese)
- ☐ Native Hawaiian or other Pacific Islander (e.g., Samoan, Guamanian, or Chamorro)
- ☐ Some other race (specify):

105. At the time you first came on active duty, how much education had you completed? (MARK THE ONE ANSWER THAT DESCRIBES THE HIGHEST GRADE OR DEGREE THAT YOU HAD COMPLETED.)

- ☐ 11th grade or less
- ☐ 12 years of school, no diploma
- ☐ High school graduate—high school diploma or the equivalent (e.g., GED)
- ☐ Some college credit, but less than 1 year
- ☐ 1 or more years of college, but no degree
- ☐ Associate degree (e.g., AA, AS)
- ☐ Bachelor's degree (e.g., BA, AB, BS)
- ☐ Master's, doctoral degree, or professional school degree (e.g., MA/MS/PhD/MD/JD/DVM)

106. What is the highest degree or level of school that you have completed? (MARK THE ONE ANSWER THAT DESCRIBES THE HIGHEST GRADE OR DEGREE THAT YOU HAVE COMPLETED.)

- ☐ 11th grade or less
- ☐ 12 years of school, no diploma
- ☐ High school graduate—high school diploma or the equivalent (e.g., GED)
- ☐ Some college credit, but less than 1 year
- ☐ 1 or more years of college, but no degree
- ☐ Associate degree (e.g., AA, AS)
- ☐ Bachelor's degree (e.g., BA, AB, BS)
- ☐ Master's, doctoral degree, or professional school degree (e.g., MA/MS/PhD/MD/JD/DVM)

107. Are you currently serving on active duty and/or in the Guard/Reserve?

- ☐ Yes, serving on active duty (not a member of the Guard/Reserve)
- ☐ Yes, a member of the Guard/Reserve in a full-time active duty program (AGR, TAR, AR)
- ☐ Yes, other type of Guard/Reserve member (e.g., drilling unit, IMA, IRR, military technician)
- ☐ No ⇒ Go to Question 110

108. In what Service are you?

- ☐ Army
- ☐ Navy
- ☐ Marine Corps
- ☐ Air Force
- ☐ Coast Guard

109. What is your current paygrade?

- ☐ E-1
- ☐ E-2
- ☐ E-3
- ☐ E-4
- ☐ E-5
- ☐ E-6
- ☐ E-7
- ☐ E-8
- ☐ E-9
- ☐ W-1
- ☐ W-2
- ☐ W-3
- ☐ W-4
- ☐ W-5
- ☐ O-1
- ☐ O-2
- ☐ O-3
- ☐ O-4
- ☐ O-5
- ☐ O-6 or above

110. How many years of active duty service have you completed?

<input type="text"/>	<input type="text"/>
<input type="text"/>	<input type="text"/>
<input type="text"/>	<input type="text"/>
<input type="text"/>	<input type="text"/>
<input type="text"/>	<input type="text"/>
<input type="text"/>	<input type="text"/>
<input type="text"/>	<input type="text"/>
<input type="text"/>	<input type="text"/>
<input type="text"/>	<input type="text"/>
<input type="text"/>	<input type="text"/>

YEARS

For example, if you have completed 3 years of service, you would enter "03." To indicate less than 1 year, enter "00."

111. What date did you complete this survey?

DATE

MONTH	DAY	YEAR
<input type="radio"/> January	<input type="text"/>	<input type="radio"/> 1999
<input type="radio"/> February	<input type="text"/>	<input type="radio"/> 2000
<input type="radio"/> March	<input type="text"/>	
<input type="radio"/> April	<input type="text"/>	
<input type="radio"/> May	<input type="text"/>	
<input type="radio"/> June	<input type="text"/>

Dear Chief Warrant Officer Sample:

You have been selected to participate in the "1999 Survey of Active-Duty Personnel." This survey will provide important information about attitudes and perceptions of the military working environment and quality of life. The data will also assist the Department of Defense in improving key policies and programs that benefit active-duty military personnel like yourself.

Your survey will arrive in the mail in a few weeks. I ask your cooperation in reviewing and responding to this survey. Your prompt response will ensure that your opinions are reflected in the final survey findings. Please be assured that your survey answers will be kept confidential. Your answers will be combined with all other responses received, and only group statistics will be reported.

If the address on this mailing is incorrect or if your address will change soon, please take a moment to inform the Survey Processing Center of the correct address. You may register your new address by calling the Survey Processing Center toll-free at 1-800-296-7652 (within the US) or collect at 612-945-7353 (outside the US). You may also send your changes via electronic mail to activeduty@datarecognitioncorp.com or facsimile to 612-945-7950. Please be sure to include your name, new address and the number printed on the lower right hand corner of this letter. You may also mark the address changes on this letter and mail it to Defense Manpower Data Center, Attn: Survey Processing Center, Data Recognition Corporation, 5900 Baker Road, Minnetonka, MN 55345-5967.

Thank you for your time and assistance in this important effort.

Sincerely,

Rudy de Leon

Dear Chief Warrant Officer Sample:

The Department of Defense is seeking your help in gathering important information about attitudes and perceptions on the military working environment and quality of life. You were randomly selected to participate in the "1999 Survey of Active-Duty Personnel." A copy of this survey is attached. The information you provide will assist in improving policies and programs that benefit active-duty military personnel like yourself.

Completing this questionnaire should take about 30 minutes. I encourage you to provide frank responses to the survey questions, and assure you that your responses will be kept confidential. Only group statistics will be reported in the survey findings. Obviously, while the survey process is underway, survey administrators must know your identity in order to provide you with the survey materials. This information is used only in administering the survey. No information about an individual will be released.

Thank you for your time and cooperation in completing this survey. Please return it at your earliest convenience in the enclosed postage-paid envelope.

Sincerely,

Rudy de Leon
Under Secretary of Defense
Personnel and Readiness

Dear Chief Warrant Officer Sample:

Recently you were mailed the "1999 Survey of Active-Duty Personnel." I want to emphasize two things about this survey.

First and foremost, this survey will assist in improving policies and programs that benefit you, as an active-duty military member. Thus, results of this survey will influence decisions directly affecting all active-duty military personnel.

The second point is that your participation in this survey is very crucial. Every member will not receive a questionnaire; therefore, your answers will represent the views of many other service members.

You may have already completed and returned your survey. If so, thank you for your participation. If not, please complete the survey and return it in the postage-paid envelope that was provided. Your responses will be held in strictest confidence.

If you have not received a copy of the survey, please take a moment to inform the Survey Processing Center of your correct address. You may register your new address by calling the Survey Processing Center toll-free at 1-800-296-7652 (within the US) or collect at 612-945-7353 (outside the US). You may also send your changes via electronic mail to activeduty@datarecognitioncorp.com or facsimile to 612-945-7950. Please be sure to include your name, new address and the number printed on the lower right hand corner of this letter. You may also mark the address changes on this letter and mail it to Defense Manpower Data Center, Attn: Survey Processing Center, Data Recognition Corporation, 5900 Baker Road, Minnetonka, MN 55345-5967. I appreciate your time and cooperation.

Sincerely,

Rudy de Leon

Appendix C

Annotated 1999 Survey of Active Duty Personnel

The survey reproduced in this appendix is based on the version of the questionnaire used in the final pretests. It has all of the text and layout of the actual survey, but does not have the final formatting of the printed questionnaire. The final printed questionnaire is reproduced in Appendix A.

The annotations in this appendix were not printed on the survey forms used in the pretests. Annotations appear either above the item number or in the boxes used for write-in answers. These annotations provide three kinds of information.

First the annotations show the variable name(s) used in the dataset for the item and whether the variable is public release or confidential. Where more than one variable was required for an item, multiple variables are listed without being enclosed in parentheses. Multiple part items will show a range of variable names. For example, the annotation of “M9920A-M9920C” for item 20 indicates that three variables, M9920A, M9920B, and M9920C, were generated. An asterisk is used to indicate a variable that appears only on the confidential file. Public-release versions of these confidential variables are not shown in the annotations in this appendix but are listed in the Variables Constructed for Analysis section of Appendix F.

The second annotation on some items indicates that the same or similar item appeared on the *1992 DoD Surveys of Officers and Enlisted Personnel* (Westat, 1994). These annotations are enclosed in parentheses and show the question number from these surveys.

The third annotation on some items is a coding Note. These Notes are part of the coding scheme (Appendix D) that discusses complex coding rules for the generation of the values for certain variables.

PRIVACY NOTICE

In accordance with the Privacy Act of 1974 (Public Law 93-579), this notice informs you of the purpose of the survey and how the findings will be used. Please read it carefully.

AUTHORITY: 10 U.S.C. 136, 10 U.S.C. 1782 and 10 U.S.C. 2358

PRINCIPAL PURPOSE: Information collected in this survey will be used to assess attitudes and perceptions of military life. This information will assist in the formulation of policies which may be needed to improve the military working environment and relevant personnel policies.

ROUTINE USES: Reports will be provided to the Secretaries of Defense and Transportation, and each Military Service. Findings will be used in reports and provided to Congress. Some findings may be published by the Defense Manpower Data Center (DMDC) or professional journals, or reported in manuscripts presented at conferences, symposia, and scientific meetings. In no case will the data be reported or used for identifiable individual(s).

DISCLOSURE: Providing information on this survey is voluntary. There is no penalty if you choose not to respond. However, maximum participation is encouraged so that the data will be complete and representative. Your survey instrument will be treated as confidential. Identifying information will be used only by persons engaged in, and for the purposes of, the survey. Only group statistics will be reported.

ASSIGNMENT INFORMATION

M9901 (O013/E013)

1. During the past 12 months, how many hours per week did you usually work?

1. ☐ 40 hours or less
2. ☐ 41-50 hours
3. ☐ 51-60 hours
4. ☐ 61-70 hours
5. ☐ 71-80 hours
6. ☐ 81 hours or more

M9902

2. During your last full workweek, how many hours did you work?

1. ☐ 40 hours or less
2. ☐ 41-50 hours
3. ☐ 51-60 hours
4. ☐ 61-70 hours
5. ☐ 71-80 hours
6. ☐ 81 hours or more

M9903A-M9903P/ Coding Note 36

3. When you have had to work more hours than usual during the past 12 months, what were the primary reasons? (MARK ALL THAT APPLY.)

- A... ☐ Not applicable
- B... ☐ Mission critical requirements
- C... ☐ Mission preparation/training/maintenance
- D... ☐ Tasked with additional duties (e.g., special projects)
- E... ☐ Unit was getting ready for deployment
- F... ☐ Manning not sufficient for workload (i.e., not enough authorizations/billets)
- G... ☐ Unit was under-manned (i.e., authorizations/billets not filled)
- H... ☐ Part of unit was deployed
- I... ☐ Demanding supervisor
- J... ☐ Problems involving subordinates
- K... ☐ High workload
- L... ☐ Poor planning or lack of planning
- M... ☐ Others were not carrying their workload
- N... ☐ Inspections and inspection preparation
- O... ☐ Equipment failure and repairs
- P... ☐ None of the above

M9904* (O002/E002)

4. Are you currently assigned to ship or shore duty?

1. ☐ Ship
2. ☐ Shore
60. ☐ Does not apply, I do not have a ship/shore rotation

In this survey, "permanent duty station" is considered your permanent post, base, port, or other duty location, such as, a recruiting station.

M9905* (Comment)

5. Where is your permanent duty station located?

1. ☐ In one of the 50 States or the District of Columbia
2. ☐ In American Samoa, Guam, U.S. Virgin Islands or Puerto Rico
3. ☐ Overseas

M9906* / Coding Note 1

6. Are you currently on a deployment that will keep you away from home for at least 30 consecutive days?

1. ☐ Yes
2. ☐ No → Go to Question 8 M9906SK

M9907*

7. Where are you currently deployed?

1. ☐ In one of the 50 States or the District of Columbia
2. ☐ In American Samoa, Guam, U.S. Virgin Islands or Puerto Rico
3. ☐ Overseas
4. ☐ Afloat at sea

M9908 (O014/E014)

8. Where do you live at your permanent duty station?

1. ☐ Aboard ship
2. ☐ Barracks/dorm (including BEQ or BOQ)
3. ☐ Geographic bachelor's barracks
4. ☐ Military family housing, on base
5. ☐ Military family housing, off base
6. ☐ Civilian housing that I own or pay mortgage on
7. ☐ Military or civilian housing that I rent, off base
8. ☐ Other

M9909A-M9909I (O015/E015)

9. How satisfied are you with the following characteristics of your current residence and community at your permanent duty station?

	5---- Very dissatisfied	4----Dissatisfied	3---- Neither satisfied nor dissatisfied	2----Satisfied	1---- Very satisfied
a. Cost of residence	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
b. Quality and condition of residence	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
c. Amount of livable space in residence	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
d. Privacy of residence	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
e. Quality of housing in the area where you live	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
f. Safety of the area where you live	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
g. Distance to workplace	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
h. Distance to shopping areas	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
i. Distance to recreation areas	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

10. Why did you choose your current residence at your permanent duty station? (MARK ALL THAT APPLY.)

- A... ☐ I had no choice in my residence
 B... ☐ Best value for the money
 C... ☐ Safety and security
 D... ☐ Close to workplace
 E... ☐ Close to base facilities, services or programs
 F... ☐ Spouse's choice
 G... ☐ Better schools
 H... ☐ Fewer rules
 I... ☐ Privacy
 J... ☐ Wanted to live in a specific area or community
 K... ☐ Available right away
 L... ☐ Military housing was unavailable
 M... ☐ Civilian housing was unavailable
 N... ☐ Better than available military housing (on base or off base)
 O... ☐ Better than available civilian housing
 P... ☐ Wanted military neighbors
 Q... ☐ Wanted civilian neighbors
 R... ☐ Other

M9911

11. If your cost to live in civilian or military housing at your permanent duty station were the same, where would you prefer to live?

1. ☐ Military housing, on base
 2. ☐ Military operated housing, off base
 3. ☐ Civilian housing

M9912 (O018/E018) / Coding Note 2

12. During your active duty career, how many permanent changes of station (PCSs) have you made? (INCLUDE PCS FOR A REMOTE OR UNACCOMPANIED TOUR.)

61. ☐ Does not apply, I have not yet received my first assignment → Go to Question 14 M9912SK

- | | |
|----------------------------|--------------------------------------|
| 1. <input type="radio"/> 1 | 6. <input type="radio"/> 6 |
| 2. <input type="radio"/> 2 | 7. <input type="radio"/> 7 |
| 3. <input type="radio"/> 3 | 8. <input type="radio"/> 8 |
| 4. <input type="radio"/> 4 | 9. <input type="radio"/> 9 |
| 5. <input type="radio"/> 5 | 10. <input type="radio"/> 10 or more |

M9913A-M9913Z (O012/E012)

13. For your most recent PCS move, were any of the following a problem? (ANSWER EVEN IF THIS IS YOUR FIRST ASSIGNMENT.)

- | | | | | | | |
|---|--------|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|
| | -6---- | Does not apply | | | | |
| | 4---- | Not a problem | | | | |
| | 3---- | Slight problem | | | | |
| | 2---- | Somewhat of a problem | | | | |
| | 1---- | Serious problem | | | | |
| a. Change in PCS orders (report date or destination) | | | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| b. Hours and location of offices providing PCS assistance | | | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| c. Waiting for permanent housing to become available | | | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

- | | | | | | | |
|---|--------|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|
| | -6---- | Does not apply | | | | |
| | 4---- | Not a problem | | | | |
| | 3---- | Slight problem | | | | |
| | 2---- | Somewhat of a problem | | | | |
| | 1---- | Serious problem | | | | |
| d. Selling or renting out your former residence | | | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| e. Purchasing or renting your current residence | | | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| f. Amount of time to prepare for move | | | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| g. Shipping/storing household goods | | | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| h. TAD/TDY en route | | | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| i. Temporary lodging expenses | | | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| j. Costs related to security deposit(s) | | | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| k. Cost of moving pets | | | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| l. Cost of moving vehicles | | | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| m. Costs of setting up new residence (e.g., curtains, carpeting, painting). | | | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| n. Settling damage claims | | | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| o. Non-reimbursed transportation costs incurred during the move | | | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| p. Timeliness of reimbursements | | | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| q. Accuracy of reimbursements | | | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| r. Time off at destination to complete move | | | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| s. Change in cost of living | | | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| t. Loss or decrease of spouse income | | | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| u. Spouse employment | | | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| v. Transferability of entitlements (e.g., Supplemental Security Income) | | | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| w. Obtaining special education services | | | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| x. Spouse/dependents changing schools | | | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| y. Transferability of college credits | | | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| z. Availability of childcare | | | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

In this survey, the definition of "military duties" includes deployments, TADs/TDYs, training, military education, time at sea, and field exercises/alerts.

M9914 / Coding Note 3

14. In the past 12 months, have you been away from your permanent duty station overnight because of your military duties?

1. ☐ Yes
2. ☐ No → Go to Question 19 M9914SK

M9915

15. In the past 12 months, how many separate times were you away from your permanent duty station for at least one night because of your military duties?

1. ☐ 1-2 times
2. ☐ 3-4 times
3. ☐ 5-6 times
4. ☐ 7-8 times
5. ☐ 9-10 times
6. ☐ 11-12 times
7. ☐ 13 times or more

M9916A - M9916J*

16. During the past 12 months, how long were you away from your permanent duty station for the following military duties? (ADD UP ALL NIGHTS AWAY FROM YOUR PERMANENT DUTY STATION; ASSIGN EACH NIGHT TO ONLY ONE TYPE OF MILITARY DUTY.)

- | | 6----- 10 months to 12 months | 5----- 7 months to less than 10 months | 4----- 5 months to less than 7 months | 3----- 3 months to less than 5 months | 2----- 1 month to less than 3 months | 1----- Less than 1 month | 0----- None |

M9917* (O080/E081)

17. In the past 12 months, what was the total length of time you were away from your permanent duty station because of your military duties? (ADD UP ALL NIGHTS AWAY FROM YOUR PERMANENT DUTY STATION.)

1. ☐ Less than 1 month
2. ☐ 1 month to less than 3 months
3. ☐ 3 months to less than 5 months
4. ☐ 5 months to less than 7 months
5. ☐ 7 months to less than 10 months
6. ☐ 10 months to 12 months

M9918A-M9918T (O078/E079)/ Coding Note 4

18. During the past 12 months, have any of the following been a concern while you were away? (MARK ALL THAT APPLY.)

- A. ☐ Managing expenses and bills
B. ☐ Household repairs, yard work, car maintenance
C. ☐ Storage or security of personal belongings
D. ☐ Pet care
E. ☐ Interruption of off duty education
F. ☐ Loss of part-time job
G. ☐ Your ability to communicate with family
H. ☐ Safety of your family in their community
I. ☐ Spouse's job demands or education demands
J. ☐ Childcare arrangements
K. ☐ Eldercare
L. ☐ Child's/children's education
M. ☐ Serious health or emotional problems of spouse, child, parent, sibling, or elderly family member
N. ☐ Divorce or marital problems
O. ☐ Birth or adoption of a child
P. ☐ Your or your spouse's pregnancy
Q. ☐ Death of a family member
R. ☐ Major financial hardship or bankruptcy within your family
S. ☐ Major home repair or replacement due to casualty, theft, fire or severe weather (e.g., hurricane, flood, earthquake, tornado)
T. ☐ Other (specify):

M9918SP / Coding Note 4

M9919

19. How many days over the past 12 months have you been detailed for work outside the scope of your primary duties (e.g., “augmentee” assignments, maintenance tasks, installation support, support tasking, and wing ready teams)?

0. ☐ None
1. ☐ 1-10 days
2. ☐ 11-20 days
3. ☐ 21-30 days
4. ☐ 31-40 days
5. ☐ 41-50 days
6. ☐ 51- 60 days
7. ☐ More than 60 days

M9920A-M9920C

20. How prepared do you believe your unit is to perform its mission with regard to...?

- | | | | | | |
|------------------------|--------|----------------------------------|-----------------------|-----------------------|-----------------------|
| | 5----- | Very poorly prepared | | | |
| | 4----- | Poorly prepared | | | |
| | 3----- | Neither well nor poorly prepared | | | |
| | 2----- | Well prepared | | | |
| | 1----- | Very well prepared | | | |
| a. Manning level | | | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| b. Training | | | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| c. Parts and equipment | | | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

M9921

21. Suppose you will be in the military for the next 12 months. What is the total length of time that you would expect to be away from your permanent duty station because of your military duties?

0. ☐ I would not expect to be away from my permanent duty station in the next 12 months
1. ☐ Less than 1 month
2. ☐ 1 month to less than 3 months
3. ☐ 3 months to less than 5 months
4. ☐ 5 months to less than 7 months
5. ☐ 7 months to less than 10 months
6. ☐ 10 months to 12 months

CAREER INFORMATION

M9922

22. What were your career intentions when you first entered active duty?

1. ☐ I intended to remain on active duty until I was eligible for retirement
2. ☐ I intended to complete my obligation and then leave active duty
3. ☐ I was not sure if I would stay on active duty or leave

M9923A-M9923U/ Coding Note 36

23. Think back to when you first entered active duty. Which of the following best describe the primary reasons why you joined? (MARK ALL THAT APPLY.)

- ☐ A. Trouble in college or break from school
- ☐ B. Get away from family, personal situation, or home town
- ☐ C. Time to figure out what you wanted to do
- ☐ D. Test yourself physically or mentally
- ☐ E. Challenging or interesting work
- ☐ F. Always wanted to be in the military
- ☐ G. Military tradition in your family
- ☐ H. Parents’ encouragement
- ☐ I. Desire to serve your country
- ☐ J. Image portrayed by military personnel
- ☐ K. Few or no civilian job opportunities
- ☐ L. Pay and allowance(s)
- ☐ M. Retirement pay and benefits
- ☐ N. Security and stability of the job
- ☐ O. Opportunity to work in a specific occupation
- ☐ P. Training in skills useful for civilian employment
- ☐ Q. Family benefits
- ☐ R. Travel and new experiences
- ☐ S. Money for college, college repayment, education benefits and opportunities
- ☐ T. Personal growth and maturity
- ☐ U. Other

M9924

24. Of all your reasons listed in Question 23, which is the most important reason why you joined?

1 2 3 4 5 6 7 8 9 10 11 12

A B C D E F G H I J K L

M N O P Q R S T U

13 14 15 16 17 18 19 20 21

M9925

25. ...and which is the next most important reason why you joined?

1 2 3 4 5 6 7 8 9 10 11 12

A B C D E F G H I J K L

M N O P Q R S T U O None

13 14 15 16 17 18 19 20 21 0

M9926/ Coding Note 5

26. When you first entered active duty service, did you have a preference for a military occupation?

- 1 ☐ Yes
- 2 ☐ No → Go to Question 28 M9926SK

M9927

27. Did you receive the military occupation of your choice?

1. ☐ Yes
2. ☐ No, but I received a related occupation
3. ☐ No, I received an occupation unrelated to my choice

M9928

28. How satisfied are you now with the military occupation you received when you first entered active duty?

1. ☐ Very satisfied
2. ☐ Satisfied
3. ☐ Neither satisfied nor dissatisfied
4. ☐ Dissatisfied
5. ☐ Very dissatisfied

M9929* (O004/E004)/ Coding Note 6

29. In which term of service are you serving now? (DO NOT COUNT EXTENSIONS AS SEPARATE TERMS OF ENLISTMENT.) M9929SK

1. ☐ I am on indefinite status → Go to Question 32
2. ☐ I am an officer serving an obligation
3. ☐ 1st enlistment
4. ☐ 2nd or later enlistment

M9930* (E005)

30. How much time remains in your current enlistment term or service obligation?

1. ☐ Less than 3 months
2. ☐ 3 months to less than 7 months
3. ☐ 7 months to less than 1 year
4. ☐ 1 year to less than 2 years
5. ☐ 2 years to less than 3 years
6. ☐ 3 years or more

M9931

31. How likely is it that you would be allowed to stay on active duty service at the end of your current term or service obligation?

1. ☐ Very likely
2. ☐ Likely
3. ☐ Neither likely nor unlikely
4. ☐ Unlikely
5. ☐ Very unlikely

M9932 (E027)

32. Suppose that you have to decide whether to stay on active duty. Assuming you could stay, how likely is it that you would choose to do so?

1. ☐ Very likely
2. ☐ Likely
3. ☐ Neither likely nor unlikely
4. ☐ Unlikely
5. ☐ Very unlikely

M9933 (O028)

33. If you stay on active duty, when would you expect your next promotion to a higher grade?

1. ☐ Less than 3 months
2. ☐ 3 months to less than 7 months
3. ☐ 7 months to less than 1 year
4. ☐ 1 year to less than 2 years
5. ☐ 2 years or more
6. ☐ Does not apply, I do not expect a promotion
7. ☐ Does not apply, I have no opportunities for promotion

M9934 (O030/E028)

34. Does your spouse, girlfriend, or boyfriend think you should stay on or leave active duty?

1. ☐ Strongly favors staying
2. ☐ Somewhat favors staying
3. ☐ Has no opinion one way or the other
4. ☐ Somewhat favors leaving
5. ☐ Strongly favors leaving
6. ☐ Does not apply, I don't have a spouse or girlfriend/boyfriend

M9935

35. If you could stay on active duty as long as you want, how likely is it that you would choose to serve in the military for at least 20 years?

1. ☐ Very likely
2. ☐ Likely
3. ☐ Neither likely nor unlikely
4. ☐ Unlikely
5. ☐ Very unlikely
6. ☐ Does not apply, I have 20 or more years of service

M9936* (O023/E023)/ Coding Note 7

36. When you finally leave active duty, how many total years of service do you expect to have?

YEARS	
0	0
1	1
2	2
3	3
4	4
	5
	6
	7
	8
	9

For example, if you expect to leave after completing 6 years of service, enter "06" in the boxes and fill in the corresponding circles. To indicate less than 1 year, enter "00."

M9937

37. If you were to leave active duty in the next 12 months, what would be your primary activity?

1. ☐ Attend college or university
2. ☐ Work for civilian company or organization
3. ☐ Work in a civilian government job (local, state, or federal)
4. ☐ Manage or work in family business
5. ☐ Self-employed in your own business or profession
6. ☐ A homemaker/housewife/househusband
7. ☐ Go into full-time retirement
8. ☐ None of the above

M9938 (O025/E025)

38. When you leave active duty, how likely is it that you will join a National Guard or Reserve unit?

1. ☐ Very likely
2. ☐ Likely
3. ☐ Neither likely nor unlikely
4. ☐ Unlikely
5. ☐ Very unlikely
6. ☐ Does not apply, I am a member of a National Guard or Reserve unit
7. ☐ Does not apply, retiring or otherwise ineligible

39. How satisfied are you with each of the following?

	-6----	Does not apply
	5----	Very dissatisfied

k.	Cost of living			O	O	O	O	O	O

M9945A-M9945J (O129/E130)

45. How much do you agree or disagree with the following statements?

		5----	Strongly disagree						
		4----	Disagree						
		3----	Neither agree nor disagree						
		2----	Agree						
		1----	Strongly agree						
a.	During the past 12 months, the missions I was involved with were important to the national interest			O	O	O	O	O	O
b.	During the past 12 months, most or all of the military duties I performed improved or maintained unit or individual readiness			O	O	O	O	O	O
c.	I would find it rewarding to deploy on a peacekeeping/peacemaking operation (e.g., Bosnia)			O	O	O	O	O	O
d.	I would find it rewarding to deploy on an overseas humanitarian relief effort (e.g., foreign disaster relief such as Nicaragua)			O	O	O	O	O	O
e.	Very little of my experience and training can be directly transferred to a civilian job			O	O	O	O	O	O
f.	It would be easy for me to get a good civilian job if I left the military now			O	O	O	O	O	O
g.	I have a pretty good idea of the kinds of jobs I could get as a civilian			O	O	O	O	O	O
h.	I have a pretty good idea of what pay I could get as a civilian			O	O	O	O	O	O
i.	The benefits available to military personnel and their families have eroded over the past few years			O	O	O	O	O	O
j.	If asked today, I would encourage others to join the military			O	O	O	O	O	O

M9946

46. In general, has your life been better or worse than you expected when you first entered the military?

1. O Much better
 2. O Somewhat better
 3. O About what you expected
 4. O Somewhat worse
 5. O Much worse
 99. O Don't remember

M9947

47. In general, has your work been better or worse than you expected when you first entered the military?

1. ☐ Much better
 2. ☐ Somewhat better
 3. ☐ About what you expected
 4. ☐ Somewhat worse
 5. ☐ Much worse
 99. ☐ Don't remember

M9948A-M9948K/ Coding Note 36

48. During the past 6 months, have you done any of the following to explore the possibility of leaving the military? (MARK ALL THAT APPLY.)

- A. ☐ Thought seriously about leaving the military
 B. ☐ Wondered what life might be like as a civilian
 C. ☐ Discussed leaving and/or civilian opportunities with family members or friends
 D. ☐ Talked about leaving with your immediate supervisor
 E. ☐ Gathered information on education programs or colleges
 F. ☐ Gathered information about civilian job options (e.g., read newspaper ads, attended a job fair)
 G. ☐ Attended a program that helps people prepare for civilian employment
 H. ☐ Prepared a resume
 I. ☐ Applied for a job
 J. ☐ Interviewed for a job
 K. ☐ None of the above

M9949A-M9949J (O094/E095 O100/E100)

49. How do your opportunities in the military compare to opportunities you would have in the civilian world?

- | | 99---- | 5---- | 4---- | 3---- | 2---- | 1---- |
|--|-----------------------|-----------------------------|---------------------------------|-----------------------|-------------------------------|---------------------------|
| | Don't know | Much better in the military | Somewhat better in the military | No difference | Somewhat better as a civilian | Much better as a civilian |
| a. Promotion opportunities | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| b. Amount of personal/family time | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| c. Hours worked per week | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| d. Vacation time | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| e. Education and training opportunities | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| f. Total compensation (pay, bonuses, allowances) | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| g. Health care benefits | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| h. Retirement benefits | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| i. Sense of accomplishment/pride | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| j. General quality of life | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

M9950A-M9950M

50. How much do you agree or disagree with the following statements?

- | | 5---- | 4---- | 3---- | 2---- | 1---- |
|--|-----------------------|-----------------------|----------------------------|-----------------------|-----------------------|
| | Strongly disagree | Disagree | Neither agree nor disagree | Agree | Strongly agree |
| a. Most of my friends belong to the military community | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| b. The military community is there for me when I need it | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| c. I have a lot in common with the civilian community | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| d. Members of the military community sometimes turn to me for help or support | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| e. Living on base helps active duty members and their families make ends meet | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| f. I talk up my Service to my friends as a great organization to be a part of | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| g. There is not much to be gained for me by sticking with a military career | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| h. I am proud to be a member of my Service | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| i. I find that my values and the values of my Service are very similar | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| j. Being a member of my Service inspires me to do the best job I can | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| k. I would turn down another job for more pay in order to remain in my Service | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| l. My Service's evaluation/selection system is effective in promoting its best members | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| m. If I stay in the Service, I will be promoted as high as my ability and effort warrant | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

M9951 (O137/E138)

51. Now, taking all things together, how satisfied are you with the military way of life?

1. ☐ Very satisfied
 2. ☐ Satisfied
 3. ☐ Neither satisfied nor dissatisfied
 4. ☐ Dissatisfied
 5. ☐ Very dissatisfied

PROGRAMS AND SERVICES

e. 14-22 years old	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
f. 23-64 years old	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
g. 65 years old or older	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

M9962A-M9962R (O068/E069) / Coding Note 13

62. During the past 12 months, have you routinely used any of the following childcare arrangements? (MARK ALL THAT APPLY.)

- A. ☐ Not applicable, I have not used any of the following childcare arrangements
→ Go to Question 68 M9962ASK
- B. ☐ Child's other parent or stepparent
- C. ☐ Child's brother or sister (aged 15 or older)
- D. ☐ Child's brother or sister (under the age of 15)
- E. ☐ Child's grandparent
- F. ☐ Other relative
- G. ☐ Friend or neighbor
- H. ☐ Sitter, nanny, or au pair
- I. ☐ Preschool (on base)
- J. ☐ Preschool (off base)
- K. ☐ "Child Development Center" (on base)
- L. ☐ Childcare center/day care center (off base)
- M. ☐ "Family Childcare Home" (on base)
- N. ☐ Childcare provider in a home setting (off base)
- O. ☐ "School-Age Care Program" (on base)
- P. ☐ After-school program (off base)
- Q. ☐ Federally supported Head Start program
- R. ☐ None of the above

M9963

63. How many of your children routinely use the childcare arrangements marked in Question 62?

1. ☐ 1
2. ☐ 2
3. ☐ 3
4. ☐ 4
5. ☐ 5 or more

M9964A / Coding Note 14 M9964B* (O070/E070) / Coding Note 15

64. What is the total amount that you spent last month on childcare arrangements for all of your children?

- A. ☐ Does not apply, I spent no money on childcare arrangements last month M9964ASK

B. MONTHLY
CHILDCARE
EXPENSE

\$.	0	0
	0	0	0	0			
	1	1	1	1			
	2	2	2	2

	8	8	8	8			
	9	9	9	9			

Write your monthly expense in the boxes, then fill in the corresponding circles. For example, if you spent \$100 last month, you would enter "0100."

M9965 / Coding Note 16

65. During the past 12 months, was there any change in your childcare arrangements for your child or children?

1. ☐ Yes
2. ☐ No → Go to Question 68 M9965SK

M9966A-M9966M

66. For what reasons did the childcare arrangements change? (MARK ALL THAT APPLY.)

- A. ☐ Beginning, ending, or changes in a child's school enrollment
- B. ☐ Beginning, ending, or changes in military assignment
- C. ☐ Beginning, ending, or changes in spouse's school enrollment
- D. ☐ Cost
- E. ☐ Availability or hours of care provider
- F. ☐ Reliability of care provider
- G. ☐ Quality of care provided
- H. ☐ Care provider's location or accessibility
- I. ☐ Never had any regular arrangement
- J. ☐ Child outgrew arrangement
- K. ☐ No longer eligible for assistance
- L. ☐ Arrangement no longer available
- M. ☐ Other (specify):

M9966SP / Coding Note 17

M9967

67. During the past 12 months, did you lose any time from your military duties (work, school, or training) due to a change in childcare arrangements?

1. ☐ Yes
2. ☐ No

M9968 / Coding Note 18

68. Do you have a child or children enrolled in school?

1. ☐ Yes
2. ☐ No → Go to Question 73 M9968SK

M9969* (O068/E069 O072/E073) / Coding Note 19

69. What type of school does your youngest school-age child attend?

1. ☐ College or university → Go to Question 73
2. ☐ Public school off base M9969SK
3. ☐ Public school on base
4. ☐ DoD school for dependents
5. ☐ A religion-affiliated school
6. ☐ A private day school, not religion-affiliated
7. ☐ A private boarding school
8. ☐ Home school
9. ☐ Other (specify):

M9969SP / Coding Note 20

M9970* / Coding Note 21

70. About how many hours per week does your child usually spend in school? (If you have more than one child, answer for the youngest school-age child.)

0	0
1	1
2	2
3	3
4	4
5	5
6	6
7	7
8	8
9	9

HOURS PER WEEK

Write the number of hours in the boxes, then fill in the corresponding circles.

M9971A-M9971G

71. For the type of school you marked in Question 69, please rate the following.

6---- NA/DK = Not applicable or don't know

5---- E = Fail

4---- D = Poor

3---- C = Satisfactory

2---- B = Good

1---- A = Excellent

M9972A-M9972F

72. Have you participated in, or been involved with, the following activities related to your child's or children's education? (MARK ALL THAT APPLY.)

- A. ☐ Attending conferences or meetings with teachers regarding the school
- B. ☐ Working with teachers to promote achievement
- C. ☐ Collaborating on educational opportunities for students, parents, and teachers
- D. ☐ Planning and implementing curricular and extra-curricular activities
- E. ☐ Participating in decision making and problem solving to promote learning
- F. ☐ None of the above

M9973* (O074/E075)

73. Do you have a child, spouse, or other legal dependent enrolled in the Exceptional Family Member Program (EFMP) or the Coast Guard Special Needs Program?

1. ☐ Yes
2. ☐ No

M9974 (O076/E077) / Coding Note 22

74. Do you have caregiver responsibilities for an elderly family member (shopping, home maintenance, transportation, checking on them by phone, finances, arrangements for care, etc.)? (This includes persons who live with you or live somewhere else.)

1. ☐ Yes
2. ☐ No → Go to Question 77 M9974SK

M9975

75. How many elderly family members do you have caregiver responsibilities for?

1. ☐ One
2. ☐ Two
3. ☐ Three or more

M9976

76. During the past 12 months, did you lose any time from your military duties due to eldercare responsibilities?

1. ☐ Yes
2. ☐ No

M9977A-M9977H / Coding Note 23

77. How satisfied or dissatisfied are you with each of the following aspects of military health care for your family?

- H. ☐ Does not apply, I do not have any family members eligible to receive military health care.
→ Go to Question 78 M9977HSK

5---- Very dissatisfied

4---- Dissatisfied

3---- Neither satisfied nor dissatisfied

2---- Satisfied

1---- Very satisfied

M9978 (O105/E106) / Coding Note 24

78. In the last month, did you perform any non-military volunteer work?

1. ☐ Yes → Go to Question 80 M9978SK
2. ☐ No

M9979A-M9979F

79. What were your reasons for not volunteering? (MARK ALL THAT APPLY.)

- A. ☐ I was not asked to perform volunteer work
- B. ☐ I did not have time for volunteer work
- C. ☐ I did not have access to childcare so I could perform volunteer work
- D. ☐ I am not interested in volunteer work
- E. ☐ I did not have transportation
- F. ☐ None of the above

M9980

80. How is your general outlook about your life?

1. ☐ Very optimistic
2. ☐ Optimistic
3. ☐ Neither optimistic nor pessimistic
4. ☐ Pessimistic
5. ☐ Very pessimistic

M9981 / Coding Note 25

81. Are you accompanied by family members (spouse, child, or other legal dependents) at your permanent duty station?

1. ☐ Yes → Go to Question 83 M9981SK
2. ☐ No

M9982A-M9982L*

82. Why didn't your family members accompany you to your permanent duty station? (MARK ALL THAT APPLY.)

- A. ☐ Does not apply, I have no family members
- B. ☐ Legal separation or divorce from spouse
- C. ☐ Temporarily unaccompanied (family members will join me later)
- D. ☐ Permanently unaccompanied because it was required for the authorization/billet
- E. ☐ Permanently unaccompanied because family members were not command sponsored (overseas tour)
- F. ☐ Permanently unaccompanied because household goods move was not authorized with PCS orders
- G. ☐ Spouse's career
- H. ☐ Spouse's education
- I. ☐ Child's/children's education
- J. ☐ Health or illness of family member
- K. ☐ Eldercare responsibilities
- L. ☐ Other (specify):

M9982SP / Coding Note 26

M9983* (O017/E017)

83. During your active duty career, how many times did your family members move to a new location because of your permanent change of station (PCS)?

0. ☐ None
1. ☐ 1
2. ☐ 2
3. ☐ 3
4. ☐ 4
5. ☐ 5
6. ☐ 6
7. ☐ 7
8. ☐ 8
9. ☐ 9
10. ☐ 10 or more

M9984A-M9984I* / Coding Note 36

84. Have any of your relatives ever served on active military duty? (MARK ALL THAT APPLY.)

- A. ☐ Parent or guardian
- B. ☐ Spouse
- C. ☐ Brother or sister
- D. ☐ Son or daughter
- E. ☐ Grandparent
- F. ☐ Uncle or aunt
- G. ☐ Cousin
- H. ☐ Other close relative
- I. ☐ None of my relatives have served on active duty

ECONOMIC ISSUES

The questions in this section address economic issues in the lives of military members and their families. The information will be used to better understand the economic and financial concerns of military members and their families. Although people will have different views on what is or is not personal, many people will consider some of the questions very personal. Please continue with the survey even if there are some questions that you want to skip.

M9985 / Coding Note 27

85. During your off-duty time, do you currently hold a second job or work at your own business?

1. ☐ Yes
2. ☐ No → Go to Question 87 M9985SK

M9986* (O107/E108) / Coding Note 28

86. On average, how many hours a week do you spend working at a civilian job or working at your own business during your off-duty hours?

0	0
1	1
2	2
3	3
4	4
5	5
6	6
7	7
8	8
9	9

HOURS PER WEEK

For example, if you worked 8 hours, enter "08" in the boxes and fill in the corresponding circles.

M9987A-M9987L (O117/E118) / Coding Note 36

87. During the past 12 months, did you (and your spouse) receive any income or financial support from the following sources? (MARK ALL THAT APPLY.)

- A. ☐ A second job
- B. ☐ Alimony
- C. ☐ Child support
- D. ☐ Supplemental Security Income (SSI)
- E. ☐ Unemployment or Worker's compensation
- F. ☐ State-funded childcare assistance
- G. ☐ Women, Infants, and Children (WIC)
- H. ☐ Food Stamp Program
- I. ☐ Head Start Program
- J. ☐ Aid to Families with Dependent Children (AFDC)
- K. ☐ Medicaid
- L. ☐ Other (specify):

M9987SP / Coding Note 29

M9988

88. What is your total monthly gross (before-tax) household income from all sources? (Please include your military earnings, your earnings from a second job, your spouse's earnings, and income or financial support from any other source.)

1. ☐ \$ 1-1,000
2. ☐ \$ 1,001-2,000
3. ☐ \$ 2,001-3,000
4. ☐ \$ 3,001-4,000
5. ☐ \$ 4,001-5,000
6. ☐ \$ 5,001-6,000
7. ☐ \$ 6,001-7,000
8. ☐ \$ 7,001-8,000
9. ☐ \$ 8,001-9,000
10. ☐ \$ 9,001-10,000
11. ☐ \$ 10,001 and above

M9989

89. Roughly, what is the total amount of savings you (and your spouse) have? (Please include funds in bank accounts, IRAs, money market accounts, Certificates of Deposit (CDs), Savings Bonds, mutual funds, stocks and/or bonds.)

0. ☐ \$ 0
1. ☐ \$ 1-1,000
2. ☐ \$ 1,001-2,500
3. ☐ \$ 2,501-5,000
4. ☐ \$ 5,001-7,500
5. ☐ \$ 7,501-10,000
6. ☐ \$ 10,001-12,500
7. ☐ \$ 12,501-15,000
8. ☐ \$ 15,001-17,500
9. ☐ \$ 17,501-20,000
10. ☐ \$ 20,001-50,000
11. ☐ \$ 50,001-100,000
12. ☐ \$ 100,001 and above

M9990 (M061/E062)

90. Do you (or your spouse) pay child support?

1. ☐ Yes, I pay child support
2. ☐ Yes, my spouse pays child support
3. ☐ Yes, both my spouse and I pay child support
4. ☐ No

M9991

91. What is the total amount you (and your spouse) paid last month for rent or mortgage?

0. ☐ \$ 0
1. ☐ \$ 1-400
2. ☐ \$ 401-800
3. ☐ \$ 801-1,200
4. ☐ \$ 1,201-1,600
5. ☐ \$ 1,601-2,000
6. ☐ \$ 2,001 and above

M9992

92. What is the total amount you (and your spouse) paid last month for all loans and leases on cars, trucks, or motorcycles?

0. ☐ \$ 0
1. ☐ \$ 1-250
2. ☐ \$ 251-500
3. ☐ \$ 501-750
4. ☐ \$ 751-1,000
5. ☐ \$ 1,001-1,250
6. ☐ \$ 1,251-1,500
7. ☐ \$ 1,501 and above

M9993

93. What is the amount of payments that you (and your spouse) made last month to cover personal unsecured debt? (Include all credit cards, debt consolidation loans, AAFES loans, NEXCOM loans, student loans, and other personal loans; exclude home mortgage and car loans)

0. ☐ \$ 0
1. ☐ \$ 1-150
2. ☐ \$ 151-300
3. ☐ \$ 301-450
4. ☐ \$ 451-600
5. ☐ \$ 601-750
6. ☐ \$ 751-900
7. ☐ \$ 901-1,050
8. ☐ \$ 1,051 and above

M9994

94. After the last payment was made on personal unsecured debt, what was the total amount you (and your spouse) still owed? (Include all credit cards, debt consolidation loans, AAFES loans, NEXCOM loans, student loans, and other personal loans; exclude home mortgage and car loans)

0. ☐ \$ 0
1. ☐ \$ 1-1,000
2. ☐ \$ 1,001-2,500
3. ☐ \$ 2,501-5,000
4. ☐ \$ 5,001-7,500
5. ☐ \$ 7,501-10,000
6. ☐ \$ 10,001-12,500
7. ☐ \$ 12,501-15,000
8. ☐ \$ 15,001-17,500
9. ☐ \$ 17,501-20,000
10. ☐ \$ 20,001 and above

M9995

95. Which of the following best describes the financial condition of you (and your spouse)?

1. ☐ Very comfortable and secure
2. ☐ Able to make ends meet without much difficulty
3. ☐ Occasionally have some difficulty making ends meet
4. ☐ Tough to make ends meet but keeping your head above water
5. ☐ In over your head

96. In the **past 12 months**, did any of the following happen to you (and your spouse)? (MARK ALL THAT APPLY.)
- ☐ A Bounced two or more checks
 - ☐ B Received a letter of indebtedness (e.g., a letter from a lender to your commanding officer that payment is late)
 - ☐ C Had your wages garnished
 - ☐ D Fell behind in paying your rent or mortgage
 - ☐ E Fell behind in paying your credit card, AAFES, or NEXCOM account
 - ☐ F Was pressured to pay bills by stores, creditors, or bill collectors
 - ☐ G Had a bill collector contact your unit leader
 - ☐ H Pawned or sold valuables to make ends meet
 - ☐ I Borrowed money from friends or relatives to help you with a financial difficulty
 - ☐ J Borrowed money through an Emergency Loan Assistance Program or a Service Aid Society
 - ☐ K Had your utilities (telephone, cable, water, heat or electricity) shut off
 - ☐ L Had a car, household appliances, or furniture repossessed
 - ☐ M Was unable to afford needed medical care
 - ☐ N Went bankrupt (declared personal bankruptcy)
 - ☐ O None of the above

A Thrift Savings Plan (TSP) is a tax-deferred retirement savings plan like a 401(k) plan.

- Employees may deposit a portion of their pay (typically up to 5 or 10 percent) before taxes into a long-term fund to provide savings for retirement.
- Employers may match none, some, or all of their employees' contributions.
- A wide range of investment options is generally available, including funds that follow the stock and bond markets.
- TSP funds may be taken to another employer or rolled over into other qualified retirement savings plans.
- Funds may begin to be withdrawn at around age 59½--earlier withdrawals are usually penalized.

M9997A-M9997C

97. If this type of plan were made available to you, how likely would you be to participate in each of the following situations?

	5----	Very unlikely				
	4----	Unlikely				
	3----	Neither likely nor unlikely				
	2----	Likely				
	1----	Very likely				
a.	If there were no government matching	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
b.	If the government matched your contribution up to 5% of pay	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
c.	If you could invest any reenlistment or continuation bonus into the fund tax-deferred	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

M9998

98. Which, if any, of the following is your **main** concern about the military retirement system?
- ☐ 6. Does not apply, I have no concerns
 - ☐ 1. No pension benefits are earned unless you serve at least 20 years
 - ☐ 2. No ability to save toward retirement with a 401(k) or other retirement savings program
 - ☐ 3. The government does not match any money you put away for retirement
 - ☐ 4. You cannot transfer your retirement benefits to another employer
 - ☐ 5. Other

M9999

99. Currently, military personnel do not qualify for retirement benefits unless they serve for at least 20 years. If the system were changed so that you became eligible after at least 10 years of service for a deferred pension payable at age 62, how much influence would this have on your willingness to stay in the military until at least the 10-year point?
- ☐ 71. Does not apply, I have already served 10 years
 - ☐ 72. Does not apply, I already intend to stay
 - ☐ 1. Little or no influence
 - ☐ 2. Some influence
 - ☐ 3. Moderate influence
 - ☐ 4. Strong influence

M99100

100. Congress is considering a proposal to modify the retirement pay formula for those who entered the service on or after August 1, 1986 to the same formula that applied to those who entered before that date. Assuming the retirement pay formula were changed, how much influence would this have on your willingness to stay in the military?
- ☐ 73. This would not affect me since I entered the service before August 1, 1986
 - ☐ 72. Does not apply, I already intend to stay
 - ☐ 1. Little or no influence
 - ☐ 2. Some influence
 - ☐ 3. Moderate influence
 - ☐ 4. Strong influence

BACKGROUND INFORMATION

SRSEX* (O032/E033)

101. Are you:

- ☐ 1. Male
- ☐ 2. Female

SRESL

102. Is English a second language for you?

- ☐ 1. Yes
- ☐ 2. No

SRHISP* (O036/E037)

103. Are you Spanish/Hispanic/Latino? (MARK "No" IF NOT SPANISH/HISPANIC/LATINO.)

1. ☐ No, not Spanish/Hispanic/Latino
2. ☐ Yes, Mexican, Mexican American, Chicano
3. ☐ Yes, Puerto Rican
4. ☐ Yes, Cuban
5. ☐ Yes, other Spanish/Hispanic/Latino

SRRACEA-SRRACEF* (O035/E036) / Coding Note 30

104. What is your race? (MARK ONE OR MORE RACES TO INDICATE WHAT YOU CONSIDER YOURSELF TO BE.)

- A. ☐ White
- B. ☐ Black or African-American
- C. ☐ American Indian or Alaska Native
- D. ☐ Asian (e.g., Asian Indian, Chinese, Filipino, Japanese, Korean, Vietnamese)
- E. ☐ Native Hawaiian or other Pacific Islander (e.g., Samoan, Guamanian, or Chamorro)
- F. ☐ Some other race (specify):

SRRACESP / Coding Note 30

M99105* / M99105A-M99105H* / M99105HI* (O038/E039) / Coding Note 31

105. At the time you first came on active duty, how much education had you completed? (MARK THE ONE ANSWER THAT DESCRIBES THE HIGHEST GRADE OR DEGREE THAT YOU HAD COMPLETED.)

- A. ☐ 11th grade or less
- B. ☐ 12 years of school, no diploma
- C. ☐ High school graduate – high school diploma or the equivalent (e.g., GED)
- D. ☐ Some college credit, but less than 1 year
- E. ☐ 1 or more years of college, but no degree
- F. ☐ Associate degree (e.g., AA, AS)
- G. ☐ Bachelor's degree (e.g., BA, AB, BS)
- H. ☐ Master's, doctoral degree, or professional school degree (e.g., MA/MS/PhD/MD/JD/DVM)

SRED*/SREDA-SREDH* / SREDHI* (O039/E040) / Coding Note 32

106. What is the highest degree or level of school that you have completed? (MARK THE ONE ANSWER THAT DESCRIBES THE HIGHEST GRADE OR DEGREE THAT YOU HAVE COMPLETED.)

- A. ☐ 11th grade or less
- B. ☐ 12 years of school, no diploma
- C. ☐ High school graduate – high school diploma or the equivalent (e.g., GED)
- D. ☐ Some college credit, but less than 1 year
- E. ☐ 1 or more years of college, but no degree
- F. ☐ Associate degree (e.g., AA, AS)
- G. ☐ Bachelor's degree (e.g., BA, AB, BS)
- H. ☐ Master's, doctoral degree, or professional school degree (e.g., MA/MS/PhD/MD/JD/DVM)

M99107* / Coding Note 33

107. Are you currently serving on active duty and/or in the Guard/Reserve?

1. ☐ Yes, serving on active duty (not a member of the Guard/Reserve)
2. ☐ Yes, a member of the Guard/Reserve in a full-time active duty program (AGR, TAR, AR)
3. ☐ Yes, other type of Guard/Reserve member (e.g., drilling unit, IMA, IRR, military technician)
4. ☐ No → Go to Question 110 M99107SK

SRSVC* (Comment)

108. In what Service are you?

1. ☐ Army
2. ☐ Navy
3. ☐ Marine Corps
4. ☐ Air Force
5. ☐ Coast Guard

SRGRADE* (O003/E003)

109. What is your current paygrade?

1. ☐ E-1
2. ☐ E-2
3. ☐ E-3
4. ☐ E-4
5. ☐ E-5
6. ☐ E-6
7. ☐ E-7
8. ☐ E-8
9. ☐ E-9
10. ☐ W-1
11. ☐ W-2
12. ☐ W-3
13. ☐ W-4
14. ☐ W-5

COMMENTS

COMMENT / Coding Note 37

112. If you have comments or concerns that you were not able to express in answering this survey, please write them in the space provided. If your comments relate to specific questions on this survey, please make a note of the question number beside your comment.

[illegible]

- PLEASE RETURN YOUR COMPLETED SURVEY IN THE BUSINESS REPLY ENVELOPE.
- IF YOU ARE RETURNING THE SURVEY FROM ANOTHER COUNTRY, BE SURE TO RETURN THE BUSINESS REPLY ENVELOPE ONLY THROUGH A U.S. GOVERNMENT MAIL ROOM OR POST OFFICE.
- FOREIGN POSTAL SYSTEMS WILL NOT DELIVER BUSINESS REPLY MAIL.

THANK YOU FOR YOUR TIME AND ASSISTANCE

Appendix D

Coding Scheme for the 1999 Survey of Active Duty Personnel – Form A

Coding Scheme for the *1999 Survey of Active Duty Personnel*

The guiding premise in coding DMDC surveys is that the individuals creating the dataset will not be the only ones analyzing the data. DMDC rarely collects data only for immediate use or to answer one question. Rather, these datasets are analyzed repeatedly over time at both DMDC and other organizations in the government, academia, and the private sector. Therefore, DMDC is careful to organize and document surveys so that secondary analysts can use the data and be reasonably certain they understand both the coding and the limitations of the data.

Data Structure

For each survey, DMDC maintains several history and operations files. These files contain confidential data protected by the Privacy Act of 1974 (P.L. 93-579) and are not documented in published technical manuals and codebooks. The private files, created in the course of sampling, weighting, and survey operations, include:

1. Population and sample files that contain portions of the data in personnel master files as well as variables constructed in the process of sampling and weighting.
2. Survey Control System (SCS) files developed to control survey operations. SCS files contain DMDC file information on the sample, as provided to the contractor responsible for handling survey operations. Data elements are added to SCS files about the materials mailed to each sample member, the dates of mailings, and the sources of all addresses used in mailings. The SCS also contains information on eligibility provided by sample members to the operations contractor.
3. Raw data files generated by optically scanning the surveys.
4. Separate files of key-entered write-in responses. One file is created for each write-in block on the survey. These files contain verbatim text and are linkable to other survey files by the lithocode of the survey. As a general rule, all personal and location names are replaced by "[NAME]" and all expletives are replaced by "[EXPLETIVE]" during key entry.
5. Duplicate record files. Because multiple surveys are sent to many respondents, there are sometimes duplicate (or even triplicate) returns of surveys from a sampled person. Procedures are described elsewhere for determining which of the multiple returns are considered duplicates. Records for these second (or third) returns are maintained in a separate file for research purposes.

This appendix describes how the survey analysis file of survey responses is created, primarily from the raw data files generated by scanning the surveys. The survey analysis file contains one record for *each sampled person*. Each record contains variables for all survey items, key SCS variables, master file variables, weighting variables, and other constructed analytic variables. A subset of this file is the public-use analytic file. The public-use file contains a record for each person in the sample, and all variables required for analysis—that is, all survey data, weights and selected SCS and master file variables thought to be reasonably

required for analysis, that do not violate respondent confidentiality under the Privacy Act.

Variable Naming

In responding to a customer's request for information, DMDC often uses multiple data sources. Information on a particular topic could be obtained from different surveys or from a survey that has been repeated over a number of years. For example, a customer might be interested in organizational commitment items included in a survey in 1992 and in 1999. Conventions discussed below are being used as a means for facilitating such analyses.

Non-survey-derived Variables

Variable names for non-survey-derived variables tend to be character strings that aid in remembering the meanings of the variables. Three important conventions were used in naming variables.

A variable name from DMDC record files was used only if the data, values, and value labels were identical to those from an official DMDC data file. When data were added to an analysis file unchanged from record data, the same variable name, values, and value labels were used. For example, "SERVICE" is a field in the ADMF and RCCPDS that indicates the member's Service; since the variable in the survey data file is identical to that in the record data from the month that the sample was drawn, the same variable name and labels were used. In contrast, the constructed variable CSERVICE was given a variable name that is not used in the official records so as not to confuse analysts who work routinely with record data.

Beginning a variable name with "X" indicates it is a special crossing (marginal) variable for key analyses. "X variables" typically involve using record data to impute values for missing data in survey items. (See Appendix I for the programming that was used to compute X variables.)

Recoded variables are named with "R" at the beginning and may be used to mask data. In such cases, collapsing or recoding to missing is performed in order to preserve confidentiality of respondents.

Survey-derived Variables

Identical demographic items are used across many DMDC surveys. Each time that a particular item is used, it is given the same variable name. The variable names for this group of demographic items start with *SR* (a mnemonic for *self* or *survey report*). In the *1999 Survey of Active Duty Personnel*, the following items fall into this category: SRSEX (gender), SRAGE (age), SRESL (English as a Second Language), SRED (education), SRHISP (Hispanic ethnicity), SRRACE (race), SRMARST (marital status), SRSVC (service), SRGRADE (paygrade), SRDATE (date the survey was completed), and COMMENT (flag indicating if a comment has been entered). In addition, a convention of *PR* (for *Proxy Report*) has been adopted for use with variables in which the respondent is reporting information about someone other than himself or herself. In the present survey, PREDUC (spouse education), PRSVC (spouse Service) and PRGRADE (spouse paygrade) are included in this category.

Variable names for items that are not standardized across DMDC surveys start with 1 or 2 letters to represent the survey, followed by 2 digits to represent the year the data are gathered, and end with 4 or 5 numbers or letters corresponding to the questionnaire item. To accomplish proper sorting of variable names, leading zeros are used for questions 1-9 so that items will be numbered from '01' through '111.' Typically, the last one or two characters are blank, or contain a letter representing one of the sub-items within the question, or two letters representing a flag or coded variable. The basic naming conventions are implemented as follows for the *1999 Survey of Active Duty Personnel*:

- The first position is "M" for the basic variables¹³ for items appearing in the Form A of the 1999 Survey of Active Duty Personnel, using one letter to represent the survey form received by members.
- The second and third characters after the M are "99" to indicate these data came from a survey administered in 1999.
- The fourth, fifth and sixth characters are item numbers in the survey.
- Letters following the numbers for multi-part items usually represent the sub-item. The exceptions, summarized here, are further explained in Table D-3:
 - Specify flags (ending in 'SP') indicate whether information was written in a specify box. For example, if respondents to this survey select *Other* on Question 18 (member), they are asked to write a response in the text box. M9918SP is a flag variable that indicates whether text was entered in the write-in area, and whether the presence of text in this area is consistent with how the basic question was answered. In preliminary files, specify flag variables are based on scanning the write-in areas of the survey for marks. In the final dataset, these variables are based on matching to the verbatim files to determine if legible text was entered for the write-in area.
 - Skip pattern flags (ending in 'SK') represent data quality for questions that direct respondents to skip subsequent questions if they respond in a certain way. For example, if respondents to this survey indicate on Question 81 that family members at permanent duty station do not currently accompany them, they are directed to skip Question 82. M9981SK is a flag variable that indicates if the responses to Question 82 are answered consistently with the skip directions.

Value Coding and Formats

The main analytic file is a SAS system file or dataset. An OS or flat file version of the public release file was then prepared from the SAS system file. Although numeric variables can take more storage space, many statistical and logical operations can only be done with variables

¹³ While the most frequently used variables for the survey items start with M, variables may also start with a "U" to indicate that they are not edited for skip pattern consistency or an "R" to indicate that they have been recoded from the basic variable.

that are declared as numeric. Values for alphabetic variables were input with \$CHARw formats to preserve leading, embedded, and trailing blanks. This section describes how values were treated in creating the SAS system file and notes any differences in the flat file. In the SAS system file, variables were declared as numeric unless they contain true alphabetic characters.

Raw Data Encoding Process

The first step in creating the SAS system file involve optically scanning the surveys and resolving problems based on visual inspection of problem surveys. Problems often arise from returned surveys that could not be scanned because they had been mutilated in the mail, lightly marked, or completed in ink as well as incorrectly marking grid items. Most surveys were key entered in separate batches. Data editors attempt to resolve every grid item problem with no response (-9), a multiple response error (-8), or an incomplete response (-4) by visually inspecting surveys that contain these codes and manually verifying the data. These three codes remain in the data file if manual inspection of the item cannot resolve the problem.

Data cleaning and editing can be thought of as occurring in five coding steps. In practice these steps may not be strictly linear; however, they are a convenient framework to understanding the meaning of the codes.

1. Each response is coded with one of four standard codes: valid response (see the annotated survey form in Appendix C), no response (-9), or multiple response error (-8), or incomplete grid error (-4).
2. Specify flag variables are created, and codes are assigned to indicate if respondents wrote in responses correctly where write-in boxes were used.
3. Skip flag variables are created, and codes are assigned to indicate if respondents completed the skip pattern correctly.
4. Special codes for valid skips are assigned to variables within skip patterns using a "forward coding" process.
5. Text code variables may be created with codes assigned based on content coding of the text entries. Text variables for the *1999 Surveys of Active Duty Personnel* may include (a) text entered in the "Other-Please specify" write-in boxes, and (b) text entered in the Comments section.

In the coding sequence outlined above, coding in the third and later steps builds on prior steps. For example, response codes assigned in Step 1 are based on the position of a mark on the survey as indicated in the survey form in Appendix C. The later coding steps may transform values assigned in Steps 1 and 2.

The next sections discuss the assignment of missing value codes, the special treatment of date variables and the editing of skip patterns during steps 3 and 4.

Missing Data Codes

The instructions used to assign missing data codes and other special codes are shown in five tables. In these tables, the value labels associated with each assigned code are shown in italicized text. These are the SAS format labels used in the SAS system file.

- Table D--1 contains standard missing data codes for DMDC surveys.
- Table D--2 contains SAS and flat file missing data codes for dates.
- Table D--3 contains examples of coding notes for flag variables.
- Table D--4 contains SAS and flat file special "not applicable" codes.
- Table D--5 provides detailed coding notes on items involving skip patterns, write-in text boxes or other non-obvious coding.

The codes presented in Table D-1 are general missing data codes that have been adopted in recent years for use on DMDC surveys. (Standards for date variables are in Table D-2.) Both tables have separate columns for values used for SAS system file and flat file. The biggest difference between the flat file and SAS system file is in the treatment of missing values. The flat file codes differ from the SAS codes because SAS implements special missing codes and formats that may not be compatible with other statistical analysis software such as SPSS. SAS can represent up to 27 different missing data values for numeric variables as either a period or a period-letter combination. Although SAS can read alphas representing missing data in a raw data field declared to be numeric, other programs such as SPSS do not accept alpha characters in numeric fields. Following a social sciences convention, different types of missing data are represented in the flat file by negative numbers that can be declared as missing values in SAS or SPSS. For example, a multiple-response error in the flat file is coded as a '-8' for numeric variables, which can be declared as a missing value when the data are input to SPSS. In SAS this declaration is made by converting the '-8' to '.A,' the current DMDC standard to represent a multiple response error in the SAS system file.

For a single item that contains a response alternative of "Not applicable", a missing data code of "-6" (SAS: .N) is typically used. When multiple items can be affected by a skip pattern or when item(s) have multiple ways to be not applicable, other specific codes are used. This type of coding is discussed later in the section entitled "Skip Pattern Coding."

Records are included in the files for sampled members regardless of whether or not they returned a survey. If a member did not return a survey or returned a blank survey, every survey variable is assigned a value of "-1" (SAS: .B).

Data requirements of SUDAAN were also considered in coding the survey. Primarily this meant not using a code of zero that has a special use for certain procedures in SUDAAN for a variable being used as an independent variable.

Table D-1:
Basic SAS® and Flat File Missing Data Codes

SAS® File		Flat File		Description
Numeric	Alpha	Numeric	Alpha	
-99	.S	-99	.S	<i>No response</i> (Missing skip of series). Only used for "Mark All That Apply" series.
.	.	-9	.	<i>No response or missing skip</i>
.A	.A	-8	.A	<i>Multiple response error</i>
.O	.O	-7	.O	<i>Out-of-range</i>
.N	.N	-6	.N	<i>Not applicable or Does not apply or valid skip</i>
.F	.F	-5	.F	<i>Variable not on survey form.</i> This value is reserved for multiple-form surveys.
.I	.I	-4	.I	<i>Incomplete grid error</i>
.G	.G	-3	.G	<i>No match on official records.</i> Only used for master file, sampling, and weighting variables for surveys that cannot be matched back to the sample file. Typically used in files of duplicate returns; these returns are not stored in the main or public-use data files.
.M	.M	-2	.M	<i>Missing continuation</i>
.B	.B	-1	.B	<i>Blank/no survey.</i> Filler values for survey variables when either a blank survey is returned or no survey is returned. Control system variables retain assigned values.
99	DK	99	DK	<i>Don't know or Not sure*</i>

* Use of "Don't know" or "Not sure" as a response is not missing data. It is, however, given special treatment because it lacks precision and is *sometimes* excluded when calculating percentages. If an analyst decides to exclude this response when calculating percentages, it should be recoded as missing; in SAS datasets the value .D is suggested for use.

Table D-2:
SAS® and Flat File Missing Data Codes for Dates

SAS® File		Flat File		Description
Recoded value	Value read from input	YYYYMMDD	MMYYYY	
.	-54908	18090901	SEP1809	<i>No response (invalid skip)</i>
.A	-55304	18080801	AUG1808	<i>Multiple response error</i>
.O	-55701	18070701	JUL1807	<i>Out-of-range error</i>
.N	-56096	18060601	JUN1806	<i>Not applicable (valid skip)</i>
.I	-56887	18040401	APR1804	<i>Incomplete grid error</i>
.B	-58073	18010101	JAN1801	<i>Blank/no survey.</i> Filler value for survey variables when either a blank survey is returned or no survey is returned. Control system variables retain assigned values.

Note. Exact dates are formatted DDMMYY¹⁴ (SAS input format YYMMDD8.). Because SAS stores dates as the number of days from a standard date of 1 January 1960, special dates have to be used to indicate specific types of missing or error data. The column headed YYYYMMDD shows how special missing data values for ARVDATE and SRDATE are formatted in the flat file for this survey.¹⁵ When SAS reads a date value from a flat file, it stores that date as the value in the column headed "Value read from input." SAS "if-then" statements are used to recode those values to the special missing value codes in the first column. This conversion has already been done in the DMDC SAS system file for this survey, and ARVDATE and SRDATE has the values shown under the "Recoded value" column.

Standard Flag Variables

As noted above, this survey employs two flag variables: specify flags and skip pattern flags. In the second edit step, specify flags are set in accordance with Table D-3, item 1. In the third edit step, skip flags are set in the manner discussed in Table D-3, item 2; however, the specifics for each skip or specify flag used in this survey are detailed in Table D-5. Note that the codes for *valid skip* and *invalid skip* in the flag variables are different from those used for standard survey items (i.e., the codes shown in Table D-1).

¹⁴ Similarly, dates given as months and years would be formatted as MONYYYY (e.g., AUG1993). When input by SAS format MONYY7., month/year/dates are stored as if they specified the first day of the month.

¹⁵ While there are no variables in this survey where only a month and year are entered, the column MMYYYY is included in this table to illustrate how the coding works for this type of variable in other surveys.

Table D-3:
Standard Coding Notes For Flag Variables

1. **SPECIFY FLAGS.** A flag variable with a name ending in 'SP' is generated for each write-in box (i.e., for "Other–Please specify" responses). Specify flags indicate the result of checking the write-in box for marks and checking the parent variable to see if the *Other* response option was selected.

The specify flag variables are coded with one of four values:

- 1 *Valid skip*
Assigned to the specify flag if the parent variable is not marked (e.g., S9903K= 1) and no text is entered in the write-in box.
- 2 *Valid Continuation*
Assigned to the specify flag if parent variable is marked (e.g., S9903K = 2) and text is entered in the write-in box.
- 3 *Invalid continuation*
Assigned to the specify flag if the respondent selected a valid response option other than the *Other* response (e.g., S9903A-S9903J=2), but the write-in box contains text.
- 4 *Invalid skip*
Assigned to the specify flag if the respondent selected the *Other* response option (e.g., S9903K = 2), but no text is entered in the write-in box.

A specify flag value of 1 or 2 thus indicates consistency in the respondent's answers. Other values reflect some inconsistency in the responses and suggest the parent item should be further evaluated before analysis.

Details for each specify flag variable are illustrated in Table D-5 and show the values of the specify flag variables based on the values of the parent variables and whether the respondent entered anything in the write-in box. The first column might be thought of as "IF" part of an "IF-THEN" statement which sets the value for the specify flag based on the second and third columns. The following is an example of a coding note for a specify flag variable.

S9903SP

S9903K value after first edit step	text in box	
	yes	no
1 (not marked)	3 (Invalid continuation)	1 (Valid skip)
2 (marked)	2 (Valid continuation)	4 (Invalid skip)

2. **SKIP FLAGS.** A flag variable with a name ending in 'SK' is generated for the parent variable (also sometimes known as the screening item) of each skip pattern. For example, Question 6 (Member) has the skip flag M9906SK and the regular variable M9906. Skip flags are useful for evaluating the effectiveness of the skip pattern, and for screening out ambiguous response patterns during analysis.

The skip flag variables are coded with one of six values, similar to the specify flag variables:

- 1 *Valid skip*
Assigned to the skip flag if the parent variable indicates the respondent should skip a subsequent series of questions and responses are missing for all items in the skip pattern.
- 2 *Valid continuation*
Assigned to the skip flag if the parent variable indicates the respondent should continue and at least one of the items in the skip pattern has a valid response.
- 3 *Invalid continuation*
Assigned to the skip flag if the parent variable indicates the respondent should skip questions, but the respondent answered one or more items in the skip pattern.
- 4 *Invalid skip*
Assigned to the skip flag if the parent variable indicates the respondent should continue, but responses are missing for all items in the skip pattern.
- 9 *Missing skip*
Assigned to the skip flag if the parent variable is missing and responses are missing for all items in the skip pattern.
- 2 *Missing continuation*
Assigned to the skip flag if the parent variable is missing and at least one of the items in the skip pattern has a valid response.

Just as for the specify flags, tables are used to show the values of the skip flag variables based on the values of the parent variables and responses within the skip pattern. The first column might be thought of as the "IF" part of an "IF-THEN" statement which sets the value for the skip flag based on the second and third columns. Skip flag variables are shown in Table D-5. The following is an example of a coding note for a skip flag variable.

M9906SK

M9906 value after first edit step	M9907 value after first edit step	
	NE -9	EQ -9
2	3 (Invalid continuation)	1 (Valid skip)
1	2 (Valid continuation)	4 (Invalid skip)
-8, -9	-2 (Missing continuation)	-9 (Missing skip)

Special Codes for Skip Patterns

While an analyst can ignore discrepancies between a respondent's answer on an item containing a conditional direction to skip items and answers to those items, it is generally better to resolve the discrepancies. Two ways of resolving the discrepancies can be termed backward and forward coding. Backward coding¹⁶ involves correcting the discrepancy by editing back from the skip pattern items to make the initial question conform. Forward coding involves correcting the discrepancy by editing forward from the initial question to make the skip pattern items conform. Data for this survey are forward coded with data on the starting question accepted as marked and data for the items within the skip pattern edited to be consistent with the starting question. The remainder of this section describes the logic behind coding of skip patterns.

To preserve all data before forward coding, the variables within skip patterns are first copied to a set of confidential variables. The naming convention for these variables is to start the name with "U" for Unedited. As stated earlier, skip flags that indicate if the skip directions were followed are created in step 3. Table D-3 introduced the general outline of the skip flags, but the specific flags for each skip pattern are specified in Table D-5¹⁷. The skip flags can be used to determine for which cases the unedited data differs from the cleaned data.

Table D-4 lists the special codes in the unedited variable that are used when there is a defined reason for an item not being applicable. In particular, values are assigned when the reason for an item being not applicable was defined as a valid response.

For this survey, in step 4 if a starting item is marked in such a way that the respondent should skip, items within the skip pattern have the "Not applicable" value (coded -6 or .N in SAS) assigned regardless of what the respondent marked on the items within the skip pattern. This value differentiates items with missing data because the items should have been skipped versus items where data are missing because the respondent should have answered but did not (coded -9 or . in SAS).

¹⁶ Backward coding has been used in other recent DMDC surveys, such as the 1995 Sexual Harassment Surveys (Status of the Armed Forces Surveys Forms A-C) and the 1996 Equal Opportunity Survey (Status of the Armed Forces Surveys Form D).

¹⁷ Table D-5 also provides special coding notes for other non-obvious codings.

Table D-4:
SAS® and Flat File Special Not Applicable Codes

<u>SAS® File</u>	<u>Flat File</u>	<u>Description</u>
60	60	<i>Does not apply (Q4-Member), (Q11-Spouse)- no ship to shore rotation.</i>
61	61	<i>Does not apply, (Q12-Member), have not received first assignment.</i>
62	62	<i>(Q21-Member), (Q62-Spouse), spouse/member not expected to be away from his/her permanent duty station.</i>
63	63	<i>Does not apply, (Q33-Member), I do not expect a promotion.</i>
64	64	<i>Does not apply, (Q33-Member), I have no opportunities for promotion.</i>
65	65	<i>Does not apply, (Q34-Member), I don't have a spouse or girlfriend/boyfriend.</i>
66	66	<i>Does not apply, (Q35-Member), I have 20 or more years of service.</i>
67	67	<i>Does not apply, (Q38-Member), I am a member of a National Guard or Reserve unit.</i>
68	68	<i>Does not apply, (Q38-Member), retiring or otherwise ineligible.</i>
69	69	<i>Not available, (Q52A-Member), (Q38A-Spouse), on base program, facility or service</i>
70	70	<i>Not available, (Q52B-Member), (Q38B-Spouse), off base program, facility or service.</i>
71	71	<i>Does not apply, (Q99-Member), I have already served 10 years.</i>
72	72	<i>Does not apply, (Q99 & 100-Member), I already intended to stay</i>
73	73	<i>Does not apply, (Q100-Member), I entered the service before August 1, 1986.</i>

Table D-5:
Detailed Coding Notes

Note Coding instructions and codebook specifications

1. **M9906SK, UM0007.** M9906SK is a skip flag variable.

M9906 value after first edit step	M9907 value after first edit step	
	NE -9	EQ -9
2	3 (Invalid continuation)	1 (Valid skip)
1	2 (Valid continuation)	4 (Invalid skip)
-8, -9	-2 (Missing continuation)	-9 (Missing skip)

Codebook page for M9906SK should note:

"This is a skip flag indicating the result of checking the response on the parent (screening) item against the response(s) on the items within the skip pattern. See Table D-5, Note 1, in Appendix D."

UM9907 is equal to M9907, but is unedited for forward coding of non-applicable response values. After creating the unedited variables:

If M9906 = 2 then M9907 = -6 (Not applicable)

2. **M9912SK, UM9913A—UM9913Z.** M9912SK is a skip flag variable.

M9912 value after first edit step	M9913A - M9913Z values after first edit step	
	at least one NE -9	all EQ -9
61	3 (Invalid continuation)	1 (Valid skip)
Any value in the range of 1-10	2 (Valid continuation)	4 (Invalid skip)
-8, -9	-2 (Missing continuation)	-9 (Missing skip)

Codebook page for M9912SK should note:

"This is a skip flag indicating the result of checking the response on the parent (screening) item against the response(s) on the items within the skip pattern. See Table D-5, Note 2, in Appendix D."

UM9913A—UM9913Z is equal to M9913A - M9913Z, but is unedited for forward coding of non-applicable response values. After creating the unedited variables:

If M9912 = 61 then M9913A - M9913Z = -6 (Not applicable)

3. **M9914SK, UM9915, UM9916A-UM9916J, UM9917, UM9918A-UM9918T.**
M9914SK is a skip flag variable.

M9914 value after first edit step	M9915, M9916A-M9916J, M9917, M9918A-M9918T values after first edit step	
	at least one NE -9	all EQ -9
2	3 (Invalid continuation)	1 (Valid skip)
1	2 (Valid continuation)	4 (Invalid skip)
-8, -9	-2 (Missing continuation)	-9 (Missing skip)

Codebook page for M9914SK should note:

"This is a skip flag indicating the result of checking the response on the parent (screening) item against the response(s) on the items within the skip pattern. See Table D-5, Note 3, in Appendix D."

For the mark-all-that-apply variable series M9918A - M9918T are coded as 1 (Not marked), 2 (Marked), or -99 (Missing Skip of Series).

UM9915, UM9916A-UM9916J, UM9917, UM9918A-UM9918T is equal to M9915, M9916A-M9916J, M9917, M9918A-M9918T, but is unedited for forward coding of non-applicable response values. After creating the unedited variables:

If M9918A - M9918T = -99 then M9918A - M9918T = 1 (Not marked)

If M9914 = 2 then M9915 - M9917 = 0 (None)

If M9914 = 2 then M9918A - M9918T = -6 (Not applicable)

4. **M9918SP.** This is a specify flag variable.

M9918T value after first edit step	text in box	
	yes	no
1 (Not Marked)	3 (Invalid continuation)	1 (Valid skip)
2 (Marked)	2 (Valid continuation)	4 (Invalid skip)

Codebook page for M9918SP should note:

"This is a specify flag indicating the result of checking the write-in box for marks and checking the parent item to see if the *Other* response option was selected. See Table D-5, Note 4, in Appendix D."

5. **M9926SK, UM9927.** M9926SK is a skip flag variable.

M9926 value after first edit step	M9927 value after first edit step	
	NE -9	EQ -9
2	3 (Invalid continuation)	1 (Valid skip)
1	2 (Valid continuation)	4 (Invalid skip)
-8, -9	-2 (Missing continuation)	-9 (Missing skip)

Codebook page for M9926SK should note:

"This is a skip flag indicating the result of checking the response on the parent (screening) item against the response(s) on the items within the skip pattern. See Table D-5, Note 5, in Appendix D."

UM9927 is equal to M9927, but is unedited for forward coding of non-applicable response values. After creating the unedited variables:

If M9926 = 2 then M9927 = -6 (Not applicable)

6. **M9929SK, UM9930—UM9931.** M9929SK is a skip flag variable.

M9929 value after first edit step	M9930 - M9931 values after first edit step	
	At least one NE -9	all EQ -9
1	3 (Invalid continuation)	1 (Valid skip)
any value in the range of 2- 4	2 (Valid continuation)	4 (Invalid skip)
-8, -9	-2 (Missing continuation)	-9 (Missing skip)

Codebook page for M9929SK should note:

"This is a skip flag indicating the result of checking the response on the parent (screening) item against the response(s) on the items within the skip pattern. See Table D-5, Note 6, in Appendix D."

UM9930—UM9931 is equal to M9930 - M9931, but is unedited for forward coding of non-applicable response values. After creating the unedited variables:

If M9929 = 1 then M9930-M9931 = -6 (Not applicable)

7. **M9936**

Codebook page for M9936 should note: "Codes are too numerous to list here. The values for this variable range from < minimum value> to < maximum value>."

8. **M9954SKA, UM9955A – UM9955P.** M9954SKA is a skip flag variable.

SRMARST value after first edit step	M9955A - M9955P, PREDUCA - PREDUCH values after first edit step	
	at least one NE -9	all EQ -9
3 or 4	3 (Invalid continuation)	1 (Valid skip)
1 or 2	2 (Valid continuation)	4 (Invalid skip)
5	-6 (Not applicable)	-6 (Not applicable)
-8, -9	-2 (Missing continuation)	-9 (Missing skip)

Codebook page for M9954SKA should note:

"This is a skip flag indicating the result of checking the response on the parent (screening) item against the response(s) on the items within the skip pattern. See Table D-5, Note 8, in Appendix D."

For the mark-all-that-apply variable series M9955A - M9955P are coded as 1 (Not marked), 2 (Marked), or -99 (Missing Skip of Series).

UM9955A – UM9955P is equal to M9955A - M9955P, but is unedited for forward coding of non-applicable response values. After creating the unedited variables:

If M9955A - M9955P = -99 then M9955A - M9955P = 1 (Not marked)

If SRMARST = 3 or 4 or 5 then M9955A - M9955P = -6 (Not applicable)

9. **M9954SKB, UM9957.** M9954SKB is a skip flag variable.

SRMARST value after first edit step	M9957 value after first edit step	
	at least one NE -9	all EQ -9
5	3 (Invalid continuation)	1 (Valid skip)
1 or 2	2 (Valid continuation)	4 (Invalid skip)
3 or 4	-6 (Not applicable)	-6 (Not applicable)
-8, -9	-2 (Missing continuation)	-9 (Missing skip)

Codebook page for M9954SKB should note:

"This is a skip flag indicating the result of checking the response on the parent (screening) item against the response(s) on the items within the skip pattern. See Table D-5, Note 9, in Appendix D."

UM9957 is equal to M9957, but is unedited for forward coding of non-applicable response values. After creating the unedited variables:

If SRMARST = 5 then M9957 = -6 (Not applicable)

10. **M9955SP.** This is a specify flag variable.

UM9955P value after first edit step	text in box	
	yes	no
1 (Not Marked)	3 (Invalid continuation)	1 (Valid skip)
2 (Marked)	2 (Valid continuation)	4 (Invalid skip)

Codebook page for M9955SP should note:

"This is a specify flag indicating the result of checking the write-in box for marks and checking the parent item to see if the Other response option was selected. See Table D-5, Note 10, in Appendix D."

11. **PREDUC, PREDUCA-PREDUCH, PREDUCHI, UPREDUC, UPREDUCA-UPREDUCH, UPREDHI.** Also see note 8. Although this item asks for one (highest grade or degree) response, respondents frequently mark multiple response. **PREDUC** is coded as a standard mark one item while **PREDUCA-PREDUCH** are coded as a mark-all-that-apply. **PREDUCA-PREDUCH** are coded as 1 (Not marked), 2 (Marked), or -99 if none are marked. **PREDUCHI** equals **PREDUC** except in those cases where **PREDUC** has a value of -8 (multiple response error). Where **PREDUC** = -8, **PREDUCHI** is constructed from **PREDUCA-PREDUCH** and coded from 1-8 to represent the highest education marked (i.e., response option selected furthest down the list). **UPREDUC, UPREDUCA-UPREDUCH, UPREDHI** is equal to **PREDUC, PREDUCA-PREDUCH, PREDUCHI** but is unedited for forward coding of non-applicable response values. After creating the unedited variables:

Codebook pages for **PREDUC, PREDUCA-PREDUCH, PREDUCHI** should note:
 "Although this item asks for one (highest grade or degree) response, respondents frequently mark multiple responses. **PREDUC** is coded as a standard mark one item while **PREDUCA-PREDUCH** are coded as a mark-all-that-apply. **PREDUCHI** equals **PREDUC** except where **PREDUC** has a multiple response error, **PREDUCHI** has the code of the highest education level that was marked. See Table D-5, Note 11, in Appendix D."

If **SRMARST** = 3 or 4 or 5 then **PREDUC - PREDUCHI** = -6 (Not applicable)

12. **M9958SK, UM9959A—UM9961G, UM9962A-UM9962R, UM9963, UM9964A-UM9964B, UM9965, UM9966A-UM9966M, UM9967-UM999970, UM9971A-UM9971G, UM9972A-UM9972F.** M9958SK is a skip flag.

M9958 value after first edit step	M9959A—M9961G, M9962A-M9962R, M9963, M9964A-M9964B, M9965, M9966A-M9966M, M9967-M999970, M9971A-UM9971G, M9972A-M9972F values after first edit step	
	at least one NE -9	all EQ -9
2	3 (Invalid continuation)	1 (Valid skip)
1	2 (Valid continuation)	4 (Invalid skip)
-8, -9	-2 (Missing continuation)	-9 (Missing skip)

Codebook page for M9958SK should note:

"This is a skip flag indicating the result of checking the response on the parent (screening) item against the response(s) on the items within the skip pattern. See Table D-5, Note 12, in Appendix D."

For the mark-all-that-apply variable series M9962A - M9962R, M9966A - M9966M and M9972A - M9972F are coded as 1 (Not marked), 2 (Marked), or -99 (Missing Skip of Series).

UM9959A—UM9961G, UM9962A-UM9962R, UM9963, UM9964A-UM9964B, UM9965, UM9966A-UM9966M, UM9967-UM999970, UM9971A-UM9971G, UM9972A-UM9972F is equal to M9959A—M9961G, M9962A-M9962R, M9963, M9964A-M9964B, M9965, M9966A-M9966M, M9967-M999970, M9971A-UM9971G, M9972A-M9972F but is unedited for forward coding of non-applicable response values. After creating the unedited variables:

If M9962A - M9962R = -99 then M9962A - M9962R = -9 (No response)

If M9966A - M9966M = -99 then M9966A - M9966M = 1 (Not marked)

If M9972A - M9972F = -99 then M9972A - M9972F = -9 (No response)

If M9958 = 2 then M9959A - M9961G = 0 (None/Not applicable)

If M9958 = 2 then M9962A - M9962R = -6 (Not applicable)

If M9958 = 2 or M9962A = 2 then M9963-M9964A = -6 (Not applicable)

If M9958 = 2 or M9962A = 2 or M9964A = 2 then M9964B = -6 (Not applicable)

If M9958 = 2 or M9962A = 2 or M9965 = 2 then M9966A-M9967 = -6(Not applicable)

If M9958 = 2 then M9968 = -6 (Not applicable)

If M9958 = 2 or M9968 = 2 then M9969 = -6(Not applicable)

If M9958 = 2 or M9968 = 2 or M9969 = 1 then M9970 = -6 (Not applicable)
 If M9958 = 2 or M9968 = 2 or M9969 = 1 then M9971A-M9971G = -6 (Not applicable)
 If M9958 = 2 or M9968 = 2 or M9969 = 1 then M9972A-M9972F = -6 (Not applicable)

13. **M9962ASK.** M9962ASK is a skip flag. Also see note 12.

M9962A value after first edit step	M9962B - M9962R, M9963, M9964A-M9964B, M9965, M9966A-M9966M, M9967 values after first edit step	
	at least one NE -9	all EQ -9
2 (Marked)	3 (Invalid continuation)	1 (Valid skip)
1 (Not Marked)	2 (Valid continuation)	4 (Invalid skip)
-9	-2 (Missing continuation)	-9 (Missing skip)

Codebook page for M9962ASK should note:

"This is a skip flag indicating the result of checking the response on the parent (screening) item against the response(s) on the items within the skip pattern. See Table D-5, Note 13, in Appendix D."

14. **M9964ASK.** M9964ASK is a skip flag. Also see notes 12 and 13.

M9964A value after first edit step	M9964B value after first edit step	
	NE -9	EQ -9
2 (Marked)	3 (Invalid continuation)	1 (Valid skip)
1 (Not Marked)	2 (Valid continuation)	4 (Invalid skip)
-9	-2 (Missing continuation)	-9 (Missing skip)

Codebook page for M9964ASK should note:

"This is a skip flag indicating the result of checking the response on the parent (screening) item against the response(s) on the items within the skip pattern. See Table D-5, Note 14, in Appendix D."

15. **M9964B.**

Codebook page for M9964B should note: "Codes are too numerous to list here. The values for this variable range from < minimum value> to < maximum value>."

16. **M9965SK.** M9965SK is a skip flag. Also see notes 12 and 13.

M9965 value after first edit step	M9966A - M9967 values after first edit step	
	at least one NE -9	all EQ -9
2	3 (Invalid continuation)	1 (Valid skip)
1	2 (Valid continuation)	4 (Invalid skip)
-8, -9	-2 (Missing continuation)	-9 (Missing skip)

Codebook page for M9965SK should note:

"This is a skip flag indicating the result of checking the response on the parent (screening) item against the response(s) on the items within the skip pattern. See Table D-5, Note 16, in Appendix D."

17. **M9966SP.** This is a specify flag variable.

M9966M value after first edit step	text in box	
	yes	no
1 (Not Marked)	3 (Invalid continuation)	1 (Valid skip)
2 (Marked)	2 (Valid continuation)	4 (Invalid skip)

Codebook page for M9966SP should note:

"This is a specify flag indicating the result of checking the write-in box for marks and checking the parent item to see if the *Other* response option was selected. See Table D-5, Note 17, in Appendix D."

18. **M9968SK.** M9968SK is a skip flag. Also see note 12.

M9968 value after first edit step	M9969 - M9972F values after first edit step	
	at least one NE -9	all EQ -9
2	3 (Invalid continuation)	1 (Valid skip)
1	2 (Valid continuation)	4 (Invalid skip)
-8, -9	-2 (Missing continuation)	-9 (Missing skip of series)

Codebook page for M9968SK should note:

"This is a skip flag indicating the result of checking the response on the parent (screening) item against the response(s) on the items within the skip pattern. See Table D-5, Note 18, in Appendix D."

19. **M9969SK.** M9969SK is a skip flag. Also see notes 12 and 18.

M9969 value after first edit step	M9970, M9971A- M9971G, M9972A- M9972F values after first edit step	
	at least one NE -9	all EQ -9
1	3 (Invalid continuation)	1 (Valid skip)
Any value in the range of 2-9	2 (Valid continuation)	4 (Invalid skip)
-8, -9	-2 (Missing continuation)	-9 (Missing skip)

Codebook page for M9969SK should note:

"This is a skip flag indicating the result of checking the response on the parent (screening) item against the response(s) on the items within the skip pattern. See Table D-5, Note 19, in Appendix D."

20. **M9969SP.** This is a specify flag variable.

M9969 value after first edit step	text in box	
	yes	no
Any value in the range of 1-8	3 (Invalid continuation)	1 (Valid skip)
9	2 (Valid continuation)	4 (Invalid skip)
-8, -9	-2 (Missing continuation)	-9 (Missing skip)

Codebook page for M9969SP should note:

"This is a specify flag indicating the result of checking the write-in box for marks and checking the parent item to see if the *Other* response option was selected. See Table D-5, Note 20, in Appendix D."

21. **M9970**

Codebook page for M9970 should note: "Codes are too numerous to list here. The values for this variable range from < minimum value> to < maximum value>."

22. **M9974SK, UM9975 - UM9976.** M9974SK is a skip flag.

M9974 value after first edit step	M9975 - M9976 values after first edit step	
	at least one NE -9	all EQ -9
2	3 (Invalid continuation)	1 (Valid skip)
1	2 (Valid continuation)	4 (Invalid skip)
-8, -9	-2 (Missing continuation)	-9 (Missing skip)

Codebook page for M9974SK should note:

"This is a skip flag indicating the result of checking the response on the parent (screening) item against the response(s) on the items within the skip pattern. See Table D-5, Note 22, in Appendix D."

UM9975 - M9976 is equal to M9975 - M9976, but is unedited for forward coding of non-applicable response values. After creating the unedited variables:

If M9974 = 2 then M9975 - M9976 = -6 (Not applicable)

23. **M9977HSK, UM9977A - UM9977G.** M9977HSK is a skip flag.

M9977H value after first edit step	M9977A - M9977G values after first edit step	
	at least one NE -9	all EQ -9
2 (Marked)	3 (Invalid continuation)	1 (Valid skip)
1 (Not Marked)	2 (Valid continuation)	4 (Invalid skip)

Codebook page for M9977HSK should note:

"This is a skip flag indicating the result of checking the response on the parent (screening) item against the response(s) on the items within the skip pattern. See Table D-5, Note 23, in Appendix D."

UM9977A - UM9977G is equal to M9977A - M9977G, but is unedited for forward coding of non-applicable response values. After creating the unedited variables:

If M9977H = 2 then M9977A - M9977G = -6 (Not applicable)

24. **M9978SK, UM9979A – UM9979F.** M9978SK is a skip flag.

M9978 value after first edit step	M9979A – M9979F values after first edit step	
	at least one NE -9	all EQ -9
1	3 (Invalid continuation)	1 (Valid skip)
2	2 (Valid continuation)	4 (Invalid skip)
-8, -9	-2 (Missing continuation)	-9 (Missing skip)

Codebook page for M9978SK should note:

"This is a skip flag indicating the result of checking the response on the parent (screening) item against the response(s) on the items within the skip pattern. See Table D-5, Note 24, in Appendix D."

For the mark-all-that-apply variable series M9979A – M9979F are coded as 1 (Not marked), 2 (Marked), or -99 (Missing Skip of Series).

UM9979A – UM9979F is equal to M9979A – M9979F, but is unedited for forward coding of non-applicable response values. After creating the unedited variables:

If M9979A – M9979F = -99 then M9979A – M9979F = -9 (No response)

If M9978 = 1 then M9979A – M9979F = -6 (Not applicable)

25. **M9981SK, UM9982A – UM9982L.** M9981SK is a skip flag.

M9981 value after first edit step	M9982A – M9982L values after first edit step	
	at least one NE -9	all EQ -9
1	3 (Invalid continuation)	1 (Valid skip)
2	2 (Valid continuation)	4 (Invalid skip)
-8, -9	-2 (Missing continuation)	-9 (Missing skip)

Codebook page for M9981SK should note:

"This is a skip flag indicating the result of checking the response on the parent (screening) item against the response(s) on the items within the skip pattern. See Table D-5, Note 25, in Appendix D."

For the mark-all-that-apply variable series M9982A – M9982L are coded as 1 (Not marked), 2 (Marked), or -99 (Missing Skip of Series).

UM9982A – UM9982L is equal to M9982A – M9982L, but is unedited for forward coding of non-applicable response values. After creating the unedited variables:

If M9982A – M9982L = -99 then M9982A – M9982L = 1 (Not marked)

If M9981 = 1 then M9982A – M9982L = -6 (Not applicable)

26. **M9982SP.** This is a specify flag variable.

M9982L value after first edit step	text in box	
	yes	no
1 (Not Marked)	3 (Invalid continuation)	1 (Valid skip)
2 (Marked)	2 (Valid continuation)	4 (Invalid skip)

Codebook page for M9982SP should note:

"This is a specify flag indicating the result of checking the write-in box for marks and checking the parent item to see if the *Other* response option was selected. See Table D-5, Note 26, in Appendix D."

27. **M9985SK, UM9986.** M9985SK is a skip flag.

M9985 value after first edit step	M9986 value after first edit step	
	NE -9	EQ -9
2	3 (Invalid continuation)	1 (Valid skip)
1	2 (Valid continuation)	4 (Invalid skip)
-8, -9	-2 (Missing continuation)	-9 (Missing skip)

Codebook page for M9985SK should note:

"This is a skip flag indicating the result of checking the response on the parent (screening) item against the response(s) on the items within the skip pattern. See Table D-5, Note 27, in Appendix D."

UM9986 is equal to M9986, but is unedited for forward coding of non-applicable response values. After creating the unedited variables:

If M9985 = 2 then M9986 = -6 (Not applicable)

28. **M9986**

Codebook page for M9986 should note: "Codes are too numerous to list here. The values for this variable range from < minimum value> to < maximum value>."

29. **M9987SP.** This is a specify flag variable.

M9987L value after first edit step	text in box	
	yes	no
1 (Not Marked)	3 (Invalid continuation)	1 (Valid skip)
2 (Marked)	2 (Valid continuation)	4 (Invalid skip)

Codebook page for M9987SP should note:

"This is a specify flag indicating the result of checking the write-in box for marks and checking the parent item to see if the *Other* response option was selected. See Table D-5, Note 29, in Appendix D."

30. **SRRACESP.** This is a specify flag variable.

SRRACEF value after first edit step	text in box	
	yes	no
1 (Not Marked)	3 (Invalid continuation)	1 (Valid skip)
2 (Marked)	2 (Valid continuation)	4 (Invalid skip)

Codebook page for SRRACESP should note:

"This is a specify flag indicating the result of checking the write-in box for marks and checking the parent item to see if the *Other* response option was selected. See Table D-5, Note 30, in Appendix D."

31. **M99105, M99105A-M99105H, M99105HI.** Although this item asks for one (highest grade or degree) response, respondents frequently mark multiple response. **M99105** is coded as a standard mark one item while M99105A-M99105H are coded as a mark-all-that-apply. **M99105A-M99105H** are coded as 1 (Not marked), 2 (Marked), or -99 if none of the items are marked. **M99105HI** equals M99105 except in those cases where M99105 has a value of -8 (multiple response error), M99105HI has the code of the highest education level that was marked.

Codebook pages for M99105, M99105A-M99105H, M99105HI should note: "Although this item asks for one (highest grade or degree) response, respondents frequently mark multiple responses. M99105 is coded as a standard mark one item while M99105A-M99105H are coded as a mark-all-that-apply. M99105HI equals M99105 except where M99105 has a multiple response error, M99105HI has the code of the highest education level that was marked. See Table D-5, Note 31, in Appendix D."

32. **SRED, SREDA-SREDH, SREDHI.** Although this item asks for one (highest grade or degree) response, respondents frequently mark multiple response. **SRED** is coded as a standard mark one item while **SREDA-SREDH** are coded as a mark-all-that-apply. **SREDA-SREDH** are coded as 1 (Not marked), 2 (Marked), or -99 if none of the items are marked. **SREDHI** equals **SRED** except in those cases where **SRED** has a value of -8 (multiple response error), **SREDHI** has the code of the highest education level that was marked.

Codebook pages for **SRED, SREDA-SREDH, SREDHI** should note: "Although this item asks for one (highest grade or degree) response, respondents frequently mark multiple responses. **SRED** is coded as a standard mark one item while **SREDA-SREDH** are coded as a mark-all-that-apply. **SREDHI** equals **SRED** except where **SRED** has a multiple response error, **SREDHI** has the code of the highest education level that was marked. See Table D-5, Note 32, in Appendix D."

33. **M99107SK.** This is a skip flag.

M99107 value after first edit step	SRSVC and SRGRADE values after first edit step	
	at least one NE -9	all EQ -9
4	3 (Invalid continuation)	1 (Valid skip)
any value in the range of 1-3	2 (Valid continuation)	4 (Invalid skip)
-8, -9	-2 (Missing continuation)	-9 (Missing skip)

Codebook page for **M99107SK** should note:

"This is a skip flag indicating the result of checking the response on the parent (screening) item against the response(s) on the items within the skip pattern. See Table D-5, Note 33, in Appendix D."

34. **M99110**

Codebook page for **M99110** should note: "Codes are too numerous to list here. The values for this variable range from < minimum value> to < maximum value>."

35. **SRDATE**

Codebook pages for **SRDATE** should note: "Codes are too numerous to list here. The values for this variable range from < minimum value> to < maximum value>."

36. **UM9903A-UM9903P, UM9910A-UM9910R, UM9923A-UM9923U, UM9948A-UM9948K, UM9984A-UM9984I, UM9987A-UM9987L, UM9996A-UM9996O.**

For the mark-all-that-apply variable series M9903A-M9903P, M9910A-M9910R, M9923A-M9923U, M9948A-M9948K, M9984A-M9984I, M9987A-M9987L, M9996A-M9996O, and SRRACEA-SRRACEF are coded as 1 (Not marked), 2 (Marked), or -99 (Missing Skip of Series).

UM9903A-UM9903P, UM9910A-UM9910R, UM9923A-UM9923U, UM9948A-UM9948K, UM9984A-UM9984I, UM9987A-UM9987L, and UM9996A-UM9996O are equal to M9903A-M9903P, M9910A-M9910R, M9923A-M9923U, M9948A-M9948K, M9984A-M9984I, M9987A-M9987L, and M9996A-M9996O but are unedited for forward coding of non-applicable response values. After creating the unedited variables:

If M9903A-M9903P = -99 then M9903A-M9903P = -9 (No response)

If M9910A-M9910R = -99 then M9910A-M9910R = 1 (Not marked)

If M9923A-M9923U = -99 then M9923A-M9923U = 1 (Not marked)

If M9948A-M9948K = -99 then M9948A-M9948K = -9 (No response)

If M9984A-M9984I = -99 then M9984A-M9984I = -9 (No response)

If M9987A-M9987L = -99 then M9987A-M9987L = 1 (Not marked)

If M9996A-M9996O = -99 then M9996A-M9996O = -9 (No response)

37. *COMMENT*

COMMENT has two codes.

2 *Text entered*
is assigned if something is written in the space provided for comments.

1 *No text entered*
is assigned if nothing is written in the space provided for comments.

Appendix E

Alphabetical Variable List for the Survey Analysis Files

In the alphabetical variable list, an asterisk indicates variables that appear only on the confidential dataset.

1999 Survey of Active Duty Personnel - Form A

VARIABLE NAME	ITEM NUMBER	LABEL	PAGE(S) IN APPENDIX G
AD1CL		Non-Response Adjust Cell	450
AD1F0		FS Unk Elig NonResponse Adj Factor	451
AD1W0		FS Unk Elig NonResponse Adj Weight	452
AD2F0		FS Elig NonRespondent Adj Factor	453
AD2W0		FS Elig NonRespondent Adj Weight	454
AGE_M*		Sample member's current age (as of 5/31/99)	1178-1179
ARVDATE*		Arrival date	1156-1158
BAQ*		Member's Bsc Allwnce for Qtrrs Status Code	1180
BATCH*		DRC Batch number applied for scanning	1159-1165
BLKREAS*		Reason Survey Returned Blank	1166
BSWGT0		Form A Base Weight	455
CCONUS*		Constructed location group/Conus/Oconus	1181
COMMENT	112.	Comments or concerns not answered	448
CPAYGRP1*		Constructed Pay Grade 1	1182
CPAYGRP2*		Constructed Pay Grade 2	1183
CPAYGRP3*		Constructed Pay Grade 3	1184
CQ39*		Questions Q39A-Q39KK Completeness Indicator	1223
CQ50*		Questions Q50A-Q50M Completeness Indicator	1224
CQ52*		Questions Q52A01-Q52B13 Completeness Indctr	1225
CRACECAT*		Constructed Race Ethnic Category 2	1185
CREGINS		Constructed location group/region	699
CSERVICE*		Sample Member's constructed service	1186
DEPLOY*		Sample Member Deployment Indicator	1188
DEPR*		Member's nmbr of dpndnts reported in DEERS	1189
DMDC_ID		Sample member identification number	449
DUPRET*		Multiple Returns -- Excludes Blanks	1167
DUPRET2*		Multiple Returns -- Includes Blanks	1168
D_ELIG*		Combined DEERS eligibility	1187
EDUC*		Sample member's education	1190-1191
EER_M*		DEERS End Eligibility Reason	1192
ELGCDE_M*		DEERS eligibility code	1193
ELIGFLGW		Eligibility Flag for Poststratification	456
ETH*		Sample member ethnic group code	1194
ETSDATE*		Sample member's ETS date	1195
FCODE		Sample member's form code	700
FILEFLG		File flag Active/Reservist	701
FLAG_FIN*		Final disposition flag	1226
INRECNO*		Master SCS ID number	1169
JOINT		Constructed marital stts/jnt svc marriage	702
LITHO*		Survey Mail Identification Number	1170
LOCATIN*		Constructed location group/territory	1196
M9901	1.	Past yr hrs/wk you worked	1
M9902	2.	Last workweek hours you worked	2

CONFIDENTIAL VARIABLES - SAMPLING & RECORD DATA

AGE_M		Sample member's current age (as of 5/31/99)	1178-1179
BAQ		Member's Bsc Allwnce for Qrtrs Status Code	1180
CCONUS		Constructed location group/Conus/Oconus	1181
CPAYGRP1		Constructed Pay Grade 1	1182
CPAYGRP2		Constructed Pay Grade 2	1183
CPAYGRP3		Constructed Pay Grade 3	1184
CRACECAT		Constructed Race Ethnic Category 2	1185
CSERVICE		Sample Member's constructed service	1186
D_ELIG		Combined DEERS eligibility	1187
DEPLOY		Sample Member Deployment Indicator	1188
DEPR		Member's nmbr of dpndnts reported in DEERS	1189
EDUC		Sample member's education	1190-1191
EER_M		DEERS End Eligibility Reason	1192
ELGCDE_M		DEERS eligibility code	1193
ETH		Sample member ethnic group code	1194
ETSDATE		Sample member's ETS date	1195
LOCATIN		Constructed location group/territory	1196
MARITAL		Member's marital status code	1197
MEMLOC		Member location	1198-1200
NSAMP_A		Member stratum level sample size	1201
NSTRAT_A		Member stratum level population count	1202
OCCGRP		Constructed Occupation Groups	1203-1208
ONOFF		Constructed on/off base living indicator	1209
PAYGRDE		Sample member's paygrade	1210
PILOT		Constructed Pilot	1211
RACECAT		Sample member's race code	1212
RETH		Sample Member's race ethnic code	1213
SERVICE		Sample Member Service	1214
SEX_M		Member's gender	1215
SHIP		Sample member's ship indctr code (MC only)	1216
SINGPAR		Constructed single parent indicator	1217
SOC		Member's Source of Commission (Officers only)	1218-1219
STRAT		Stratum Number	1220
TAFMS		Total Active Federal Military Service	1221
YOS		Member's years of active duty service	1222

Notes on Analysis of the 1999 Dataset

Notes on Analysis of the 1999 Survey of Active Duty Personnel Dataset

This section is focused on the analytic variables contained on the survey analysis files that were used by Helba et al. (2001) and Gaines, Deak, Helba, and Wright (2000a, 2000b) in reporting the results of the survey. The section describes basic crossing variables that were constructed, the race/ethnicity variables based on OMB guidelines, and variables constructed for sample design.

Analytic Variables

The most important variables constructed for analyses have been preserved on the survey analysis files. Where possible these variables are on the public-release file. In every case where a crossing of demographic variables would allow the isolation of one or two respondents, however, either a variable was collapsed into broader categories or some variable was set to missing in the public-release variables in order to preserve respondents' confidentiality.

Key Demographic Variables

Demographic data are obtained both from respondents' self-reports on the questionnaire and from the ADMF and RCCPDS for Active Duty and AGR/TAR personnel, respectively. Self-reported race/ethnicity, gender, Service, paygrade, and location were used when available in the analyses reported by Helba et al. (2001). Where self-reported data were missing, values were imputed through the use of master file data extracted from the May 1999 ADMF for active-duty personnel and from the May 1999 RCCPDS for AGR/TAR personnel. These imputed variables are referred to as X (crossing) variables. The only variables that were imputed are those crucial to the tabulation of data. Figure I.1 provides SAS code for the imputation and creation of the DMDC standard for reporting Federal data on race and ethnicity. Figures I.2 – I.7 contain either the SAS code or pseudo code of the crossing variables for location, Service, gender, paygrade and marital status. Code is also provided for the five- and seven-category race and ethnicity variables and the seven-category paygrade variable.

Race and Ethnicity. XRETH1 implements the U.S. Office of Management and Budget Bulletin 00-02 (2000) standards for reporting Federal data on race and ethnicity. XRETH1 groups the responses to SRRACEA-SRRACEF into racial/ethnic categories, which include multi-racial combinations. The categories are broken down by whether or not the respondent indicates Hispanic descent (from variable SRHISP). Each description in the "RACIAL CATEGORY" column of the chart below is preceded by an H for "Hispanic" if the respondent has a value greater than or equal of 2 for SRHISP, and by a NH for "Non-Hispanic" if SRHISP has the value of 1. The columns to the right of the descriptions show the Hispanic and race/ethnicity codes matching each description. The coding for XRETH1 follows the coding provided in the chart. For example, Hispanic single-race respondents who mark only one of SRRACEA-SRRACEF are assigned the corresponding code (1 to 6) from the racial/ethnic categories. Hispanics selecting more than one race are coded 7. The categories for Non-Hispanics are similar, except that some specific racial combinations form their own categories (codes 15-18). The remaining racial combinations reported by Non-Hispanics are coded 19.

This variable was imputed using values RETH and RACECAT from either the DMDC ADMF (for active-duty members) or the DMDC RCCPDS (for Reserve members). The variables R1XRETH1 and R2XRETH1 collapse XRETH1 into seven or five categories, respectively.

CODE	RACIAL CATEGORY (XRETH1)	SR-HISP	SR-RACEA	SR-RACEB	SR-RACEC	SR-RACED	SR-RACEE	SR-RACEF
1	H American Indian or Alaska Native	>=2	1	1	2	1	1	1
2	H Asian	>=2	1	1	1	2	1	1

Label xmimppc = "Constructed Paygrade: 7 groups";

```

Construction of Additional Variables

In anticipation of a demand for analyses by regional location, occupation, and marital status, several variables were constructed at the time of sample selection and are included in the public-release file. CREGINS was constructed to collapse duty locations into regions. Past demands to perform analyses based on duty occupation information required the inclusion of member duty occupation categories, OCCAREA. Additionally, JOINT, the variable indicating marital status of member (including whether member was married to an active duty military member or Guard/Reserve member in a full-time active duty program) is included for the convenience of future researchers. Figure I.8 contains the SAS code used for CREGINS, OCCAREA, and JOINT.

Editing

The edits presented in Figures I.9 through I.11 are those that were performed for analyses of the 1999 ADS Form A as reported by Helba et al. (2001) and Gaines et al. (2000a, 2000b). However, edits shown in Figures I.10 through I.11 are considered to be suggestions of how data editing might be approached but were not performed to permanently alter the variables. Please refer to the coding scheme (Appendix D) and the annotated questionnaire (Appendix C) when assessing the edits in Figures I.10 through I.11.

Program Use and Availability. These variables were derived from self-reported information to Question 52 and were recoded into two sets of variables. The first set of variables categorizes the availability of programs, services or facilities: *available or not available*. The second set of variables report the usage of the service, program, or facility if available.

Spouse Employment. This variable denotes the employment status of individuals married to military member. It was obtained from proxy reported information from Q55 (the standard DoD item for measure spouse employment). A series of priority rules were established to collapse multiple responses into one of the four mutually exclusive spouse employment statuses.

Figure I.10.
SAS Code for Spouse Employment Status

```

/***** Creation of SPO_EMPL *****/

Software Applications for the Analysis of the ADS Form A

Software Applications for the Analysis of the ADS Form A

Variance estimation procedures have been developed to account for the sample design and estimators employed in a complex survey. Using these procedures, factors such as the selection of sample in multiple stages and the use of differential sampling rates to oversample a targeted subpopulation can be appropriately reflected in estimates of sampling error. The two main methods for estimating variances from a complex survey are known as Taylor series variance estimation and replication. Wolter (1985) is a useful reference on the theory and applications of these methods. Shao (1996) is a more recent review paper that compares the methods.

Standard statistical software packages that always assume simple random sampling may not properly compute variance estimates from weighted data that were collected with a design other than simple random sampling. Analyzing the ADS datasets with the proper use of PSW0 as the weighting factor in standard statistical programs will result in accurate point estimates¹⁸ but will not result in accurate variance estimates.

This appendix gives guidance for the analysis¹⁹ of ADS by three software packages (WesVar, SUDAAN, and SAS) that take into account the variance structure of surveys. In general, SUDAAN, WesVar, and SAS all produce the same point estimates.²⁰ The differences are in the methods used to compute the variances. While WesVar only uses replication methods and SUDAAN can use both replication methods and Taylor series expansions, SAS only uses Taylor series expansions. While SAS has a more limited set of statistics available at this time, it can still produce most of the statistics typically reported from survey data. In version 7, SAS first introduced procedures for estimating variances in data with complex variance structures. However, in Version 8 an important option was added with the *DOMAIN* statement.

For reference, Table J-1 lists some of the features available in SUDAAN, SAS, and WesVar that are relevant to DMDC survey analysis. This list is not exhaustive, particularly for SUDAAN and WesVar. There are other analysis features in SUDAAN and WesVar that may also be of interest to some data users.

Structure of Datasets

Both the confidential file and public-release ADS files contain 66,040 records, one for every sampled individual. These 66,040 records can be divided into three subgroups which are used for different analytic purposes and may be required by different analytic packages. One subgroup (ELIGFLGW = 3) is composed of nonrespondents and these

¹⁸ Differences may occur in point estimates (e.g., means, percentages, and correlations) from different statistical packages as the result of different methods of handling missing data by some procedures.

¹⁹ While all three packages can handle at least some regression functions, this introduction is limited to percentages.

²⁰ Since programs may handle missing values differently, estimates may be different when missing values are present.

Table J-1.
Features of Three Software Packages for the Analysis of Survey Data.

Feature	SUDAAN	SAS	WesVar
Estimation features reflected in variance estimates			
Stratification	x	x	x
Ineligible cases in poststratification frame	x	x	x
Nonresponse adjustments	NA	NA	x
Poststratification	x	NA	x
Finite population correction factors	x	x	x
Tables			
Totals/standard errors	x	x	x
Means/standard errors	x	x	x
Proportions/standard errors	x	x	x
Multi-way tables	x	x	x
Differences of cell estimates/standard errors	x	NA	x
Ratios of cell estimates	x	NA	x
Linear regression			
Parameter estimates/standard errors	x	x	x
Confidence intervals for parameters	x	x	x
Logistic regression			
Parameter estimates/standard errors	x	NA	x
Confidence intervals for parameters	x	NA	x
Odds ratios/confidence intervals	x	NA	x
Multinomial logistic regression (unordered categories)			
Parameter estimates/standard errors	x	NA	x
Odds ratios/confidence intervals	x	NA	x
Multinomial logistic regression (ordered categories)			
Parameter estimates/standard errors	x	NA	NA
Odds ratios/confidence intervals	x	NA	NA

Note: NA= not available.

records are only needed to analyze response rates to the survey and need not be retained for any other analyses. The primary analytic subgroup (ELIGFLGW = 1) is comprised of eligible respondents and these records are typically all that are required for analyses.

The last subgroup (ELIGFLGW = 2) is known ineligible and these records were used along with the eligible respondents to develop weights that sum to the population total. Records for the respondents and for the known ineligible (ELIGFLGW = 1 and 2, respectively) can be used to compute variance estimates by the Taylor series linearization method implemented by SUDAAN and SAS Version 8. All 36,100 records with ELIGFLGW equal to 1 or 2 should be used in the analytic dataset for SUDAAN.²¹ The records for known ineligibles are not used in the point estimates, but they are used in computing variances.

While the effect of excluding just the ineligible records may be small on Taylor series

²¹ SUDAAN could also process all records. It would simply skip the 29,940 records with zero weights (PSW0 = 0).

variance estimates, other steps to further subset the dataset before passing it to SUDAAN may lead to more serious errors in variance estimates. For example, if the dataset were subset to just the DoD Services (excluding the Coast Guard) by keeping only records where XMIMPS is less than 5, SUDAAN would issue warnings.²² In this particular situation, SUDAAN could still estimate the variances though they would be very slightly different than estimates using the full dataset of 36,100 records.

Analysis of ADS Form A Using WesVar

This section describes the use of WesVar for the analysis of data for the 1999 ADS Form A survey in order to compute sample estimates and their corresponding standard errors.

WesVar is a package developed by Westat that uses replication methods to compute variance estimates. Through the use of replicates, adjustments made during weighting (e.g., nonresponse, poststratification) can be taken into account by making the same adjustments to each replicate separately. Replication is computer intensive, but powerful personal computers have largely eliminated this as an issue. However, it is still possible that for very large data sets, the computations will exceed the capacity of the machine or take a long time. Although replication can be used for most estimates, replication techniques are not necessarily appropriate for all sample statistics of interest. Special care is needed when trying to estimate median, quartiles, or other quantiles. Direct estimates of sampling errors for quantiles are not supported,²³ although alternative methods such as those of Woodruff (1952) are available in the software.

WesVar is an interactive program centered on sessions called “workbooks.” A workbook is a file linked to a specific WesVar dataset. In a workbook, the user can request descriptive statistics, as well as analyze and create new statistics. The information about the design is incorporated into the replicate weights when the data file is created. For descriptive statistics and analysis variables, “requests” are defined within a workbook. Regression requests support both linear and logistic models. Outputs include statistics such as the sum of weights, means, and percentages, along with their corresponding standard errors, design effects, coefficients of variation (CV), and confidence intervals.

Creation of WesVar Files

WesVar uses special files to compute statistics.²⁴ The first step is to transform the SAS files into a WesVar data file known as a VAR file. Prior to the creation of the file, it is recommended to subset the SAS file to include only the eligible records (ELIGFLGW=1). In this way, there is no need to use a subpopulation option to run statistics about the eligible population. Once the file has been subset, create an XPT file for importation into WesVar. The creation of the VAR file is a two step process. The first step is to open a new “WesVar Data

²² A sample warning is “There is a problem with nest variable TVSTR=74.000000 in record 19622. It has only one _OBSN_ whose value is 19623.000000. Standard fixup is to use the square of the taylorized deviation for _OBSN_=19623.000000 as the contribution to the variance.”

²³ Linearization and replication do not apply to quantiles because quantiles are not smooth functions (see Francisco & Fuller, 1991).

²⁴ These files are available on CD-ROM for the ADS (1999 Survey of Active Duty Personnel, 2001).

File” and select the XPT file. From the “Source variable” column, move the final weight variable, PSW0, into the cell labeled “Full Sample” and move DMDC_ID into the cell labeled “ID”. In the case of the ADS, the other information about the design (variance strata and weight adjustments) has been incorporated during the creation of the replicate weights. From the source variable column, move the replicate weights, PSW1—PSW170, into the column labeled “Replicates”. The remaining items in the source variable column can be moved into the column labeled “Variables” for analysis as independent and dependent variables and any items not moved to the “Variables” column will not be included in the new WesVar dataset. Select JK_n as the variance estimation method and save the file. The variance estimation method (JK_n) requires two additional files: 1) a file with the finite population factors (FPC.DAT) and 2) a file with the JK_n factors (JKN.DAT). Attaching these factors to the dataset constitutes the second step in creating a WesVar dataset. To attach the factors, select “Data” from the toolbar and “Attach factors” from the dropdown menu. In the “Attach factors” window, select the FPC factor column and open the FPC.dat file from “External FPC Factors”. Repeat the process for the JK_n Factor column to attach the JKN.dat file. Click “OK” to save the final WesVar dataset.

Specifying a Workbook and Running a Simple Table

To create a workbook, select “New WesVar Workbook” on the opening WesVar screen, which brings up the screen shown in Figure J-1.²⁵ The “Add Table Set (Single)” and “Add Table Set (Multiple)” buttons are alternative ways of defining tables. The first example discussed here will be to create a one-way table of the numbers of persons in each level of the computed service variable, XMIMPS.

To define this table, click the button “Add Table Set (Single)”, which brings up the screen in Figure J-2. From the Source Variables list in the right-hand panel, select and drag the variable XMIMPS to the Selected box. You then click the button “Add as New Entry” to add the table to the workbook tree on the left. In the column labeled “Sum of Weights”, the checks indicate that estimated totals (Value) and the cell percentages (Percent), associated with each cell total, will be printed in the output.

You can give more descriptive labels to nodes of the workbook tree if desired. For example, you can highlight the “Table Request One” node in the left-hand panel in Figure J-1 and change the Request Name to “Simple Tabulations” in the right-hand panel.

To run the XMIMPS table, select Requests/Run Workbook Requests from the menu or click the green triangle in the toolbar. When the calculation has been completed, the book icon in the toolbar will no longer be gray. You can then view the output by selecting Requests/View Output from the menu or by clicking the book icon. The output is shown in Listing J-1. The particular statistics to be printed are selected in the Options/Generated Statistics node in Figure J-2. The ones shown in Listing J-1 are the estimate, standard error, CV(%), numerator and denominator sample sizes for percentages (CELL_n and DENOM_n in the output), and design effect. Other choices are confidence intervals (computed using the *t* approximation or the Wilson method for percentages), the effective sample size (defined as the actual sample size divided by the design effect), and the *p*-values for testing whether parameters are zero.

²⁵ The examples and screenshots in this section were done using version 4 of WesVar. Version 3 is similar.

Comparing Two Subgroups Using WesVar

The second example discussed here will compare the percentages of two subgroups who reported choosing their current residence at their permanent duty station because they had no choice (Question 10A, variable M9910A). The two subgroups will be the Army and the Navy.

To compare two subgroups, specify a workbook as in the previous example. Then, create a two-way table comparing the service branches' (XMIMPS) responses to question M9910A. To define this table, click the button "Add Table Set (Single)" in Figure J-1, which brings up the screen in Figure J-2. From the Source Variable list in the right-hand panel, select the variables XMIMPS and M9910A and drag them to the Selected box. You then click "Add as New Entry" to add the table to the workbook tree on the left.

The levels of XMIMPS define the rows of the table while the levels of M9910A define the columns. The values XMIMPS = 1 and 2 are codes for the Army and Navy. The value M9910A = 1 means that a member reported choosing his or her current residence because there was no other choice. The following discussion illustrates how to compute the difference between the percentages of members of the Army and Navy who reported having no choice.

At this point, the workbook tree will have an entry labeled "XMIMPS*M9910A" as shown in Figure J-3. Notice there are three branches under the node XMIMPS*M9910A labeled "Cells", "Cell Functions" and "Standardized Rates." To calculate the desired difference in percentages, you must define the cells of the table that will be used and then combine the estimates for the cells with a cell function.

Click the node "Cells" in Figure J-3. From the XMIMPS list in the right-hand panel, select 1 for all Army active duty members and from the M9910A list select 1 for all members who answered "they had no choice in their current residence." A default name for the cell will appear in the Label box. By selecting the Label box, you can give the cell a more descriptive name (e.g., ArmyNoChoice) as shown in Figure J-3. You then click "Add as New Entry" to add the cell to the workbook tree. Repeat this step but instead of selecting 1 for Army active duty member in the XMIMPS list select 2 for Navy active duty members. From the M9910A list select 1 again and give the cell a more descriptive name (e.g., NavyNoChoice). Click the button "Add as New Entry" to add the cell to the workbook tree on the left.

To compare the new cells you have created, click the node "Cell Function" in the workbook tree, which brings up the screen in Figure J-4. In the Function Statistics box type "Diff =". "Diff" is a user-specified name that will be printed in the output. Then, from the Source Cells list, select and drag ArmyNoChoice into the Function Statistics box. Click (or type) the minus sign. Select and drag NavyNoChoice into the Function Statistics box and click the "Add as New Entry" button to add the function to the workbook tree. The screen should now look like Figure J-4.

In the "For" node under the "Function Statistic", SUM_WTS will have been selected by default, which is the appropriate choice in this example. With the For node selected, check the boxes for Value and Row Percent under Sum of Weights. By selecting the check box for Value, the differences in the estimated numbers in the Army and Navy who said they had no choice will

be computed and printed in the output along with its standard error. Selecting the check box for Row Percent will give the difference in the percentages for the Army and Navy and the standard error of the difference. Other statistics, like a confidence interval, can be requested in the Generated Statistics node of the workbook tree shown in Figure J-2.

To run the table, select Requests/Run Workbook Requests from the menu or click the green triangle in the toolbar. When the calculation has been completed, the book icon in the toolbar will no longer be gray. You can then view the output by selecting Requests/View Output from the menu or by clicking the book icon. The output is shown in Listing J-2. The last line of the listing gives the estimated difference to be -15.48 , with a 95% confidence interval of -17.41 to -13.55 and a t -test value of -15.844 .

Comparing Two Analysis Variables Using WesVar

The third example discussed here will compare the response to two questions within subgroups defined by branch of the service. The questions are (1) whether the active duty member felt that selling or renting his or her previous residence was a serious problem (Question 13D, variable M9913D) versus (2) whether or not purchasing or renting his or her current residence was a serious problem (Question 13E, variable M9913E). The subgroups will be the Army, the Navy, and the Air Force.

To compare two questions within subgroups, specify a workbook as in the previous two examples. Then define a three-way table comparing the two questions (M9913D and M9913E) within each branch of service (XMIMPS). The output will be three sub-tables, one for each subgroup, comparing the percentages of those who say they had a serious problem selling or renting previous residence but not current residence less those who said current but not previous was the problem. To define this table, click the button “Add Table Set (Single)” in Figure J-1, which brings up Figure J-2. From the Source Variable list in the right-hand panel, select the variables XMIMPS, M9913D and M9913E in that order and drag them to the Selected box. You then click “Add as New Entry” to add the table to the workbook tree on the left.

The levels of XMIMPS define the sub-tables while the levels of M9913D define the rows and M9913E define the columns. The values XMIMPS = 1, 2, and 4 are codes for the Army, Navy and Air Force. The value M9913D = 1 means that a member reported that selling or renting his or her previous residence was a serious problem. The value M9913E = 1 means that a member reported that purchasing or renting his or her current residence was a serious problem.

At this point, the workbook tree will have a node labeled “XMIMPS*M9913D*M9913E” as shown in Figure J-5. Notice there are three branches under XMIMPS*M9913D*M9913E labeled “Cells,” “Cell Functions” and “Standardized Rates.” To calculate the desired difference in percentages, you must define the cells of the table that will be used and then combine estimates for the cells with a cell function.

Click the node “Cells” in Figure J-5. From the XMIMPS list in the right-hand panel, select 1 for all the Army active duty members. From the M9913D list, select 1. From the M9913E list, select MARGINAL. The cell (M9913D, M9913E) = (1, MARGINAL) for the Army will be used in getting the percentage of the members of the Army who reported having serious problems selling or renting out their former residence. A default name for the cell will appear in the Label box. By selecting the Label box, you can give the cell a more descriptive name (e.g., AprobSellRent) as in Figure J-5. You then click the button “Add as New Entry” to add the cell to the workbook tree. Now, from the XMIMPS list in the right-hand panel, select 1 again for all the Army active duty members. From the M9913D list, select MARGINAL. From the M9913E list, select 1. The cell (M9913D, M9913E) = (MARGINAL, 1) will be used to get the percentage who reported having serious problems purchasing or renting their current residence. By selecting the Label box, you can also give this cell a more descriptive name (e.g., AprobPurchlRent) as in Figure J-5. You then click the button “Add as New Entry” to add the cell to the workbook tree. Repeat these steps for the Navy (XMIMPS = 2) and the Air Force (XMIMPS = 4).

To compare the new cells you have created, click the node “Cell Function” in the workbook tree. This brings up the screen in Figure J-6. In the Function Statistics box type “DArmy =”. “DArmy” is a user-specified name for the difference in the two questions for the Army and will be printed in the output. Then, from the Source Cells list, select and drag AprobSellRent into the Function Statistics box. Click (or type) the minus sign. Select and drag AprobPurchRent into the Function Statistics box and click the “Add as New Entry” button to add the function to the workbook tree. In the Function Statistics box, type “DNavy =.” Then, from the Source Cells list, select and drag NprobSellRent into the Function Statistics box. Click (or type) the minus sign. Select and drag NprobPurchRent into the Function Statistics box and click “Add as New Entry.” Finally, in the Function Statistics box, type “DAirForce =.” From the Source Cells list, select and drag AFprobSellRent into the Function Statistics box. Click (or type) the minus sign and then, select and drag AFprobPurchRent into the Function Statistics box. Click “Add as New Entry.” The screen should now look like Figure J-6.

In the “For” node under Function Statistic, the statistic SUM_WTS will have been selected by default. This is the appropriate choice in this example. With the For node selected, check the boxes for Value and Percent under Sum of Weights. By selecting Value, the differences in the estimated numbers in the two questions M9913D and M9913E will be computed and printed in the output along with their standard errors. Selecting the check box for Percent will give the difference in percentages for the two questions and the standard error of the difference. Other statistics, like a confidence interval, can be requested in the Generated Statistics node of the workbook tree shown in Figure J-2.

To run the table, select Request/Run Workbook Requests from the menu or click the green triangle in the toolbar. When the calculation has completed, the book icon in the toolbar will no longer be gray. You can then view the output by selecting Requests/View Output from the menu or by clicking the book icon. An extract of the output is shown in Listing J-3. In this example, a larger percentage of the members in each of the three services reported having more serious problems in selling or renting their former residence than they did purchasing or renting their current residence.

Comparing Estimates from Different Surveys Using WesVar

A t -statistic for independent samples can be used to compare an estimate obtained from one survey with an estimate obtained from an independently selected sample in another survey. The example discussed here will compare the *DMDC 1999 Survey of Active Duty Personnel (Form A)* and the *1999 Survey of Spouses of Active Duty Personnel (Form B)*, which are independent of one another. Each survey contains a questionnaire item where the respondents report how much of a problem they had selling or renting their former residence during their most recent PCS move. The questions are M9913D for the *1999 Survey of Active Duty Personnel* and S9910D for the *1999 Survey of Spouses of Active Duty Personnel*.

To compare the proportion of persons who report that it was a serious problem, first use WesVar to compute the proportions and standard errors for each of the surveys separately. For *Form A* there are two variables of interest, XMIMPM and M9913D. The variable XMIMPM indicates the marital status of the active duty members. The value of XMIMPM=1 indicates that the member reported being married. For question M9913D it is important to subset married members from non-married members. To do this, first create a workbook as shown in the previous examples. When creating a table request (Figure J-1) type “XMIMPM=1” in the input box labeled Subset. Then create a simple table for the variable M9913D as in the first WesVar example. The output lists the percent estimates and standard errors for all married active duty members. The percent estimate for married active duty member who reported having serious problems selling or renting their former residence during their most recent PCS move is 15.71 and the standard error is 0.496. Denote the estimated percentage and standard error by p_M and se_M .

Next, create a new workbook for *Form B*. Create another table for the variable S9910D. The output lists percent estimates and standard errors for all spouses of active duty members. The percent estimate for spouses of active duty members who reported having serious problems selling or renting their former residence during their most recent PCS move is 16.54 and the standard error is 0.637. Denote the estimated percentage and standard error for spouses by p_S and se_S .

To compare the proportions p_S and p_M , the following formula is used for computing the standard error of the difference:

$$se_{S-M} = \sqrt{se_S^2 + se_M^2} .$$

The t -statistic for testing whether the difference is zero or not is:

$$t = \frac{p_S - p_M}{se_{S-M}} .$$

In the example above $se_{S-M} = 0.8073$ and $t = 1.028$.

Analysis of ADS Form A Using SUDAAN

This section describes how to use SUDAAN for the analysis of the 1999 Form A ADS and details which options are appropriate to use.

SUDAAN (Software for the Statistical Analysis of Correlated Data) is a statistical package developed by Research Triangle Institute (RTI) to analyze data from complex sample surveys. Like WesVar, SUDAAN computes the standard errors of the estimates while taking the survey design into account. While SUDAAN can also use replication methods, it is most often used for first-order Taylor series approximation.

As mentioned above, all weighted cases are typically kept on the analysis file, even cases not in the subpopulation of interest, because all weighted cases should be used to estimate the variance structure. This applies in the general case of ineligibility but is most important for and analyses focused on a subgroup of the population. See below for the use of the design statement *SUBPOP*.

Required Variables

The variables that provide information about the design in SUDAAN are

- **Variable TVSTR** (Taylor's series variance strata). The variable TVSTR indicates the variance strata to be used for software that computes estimates of variance using the Taylor series method. The variable TVSTR was created using the design strata. Strata with less than 25 records with positive final weights were collapsed with adjacent strata.
- **Variable ELIGFLGW** (final eligibility indicator). The variable ELIGFLGW indicates the final eligibility of the member. Eligible members have ELIGFLGW =1 while ineligibles have ELIGFLGW=2. Records with zero final weight have ELIGFLGW=3.
- **Variable PSW0** (final poststratified full sample weight). The variable PSW0 contains the final poststratified full sample weight. This weight is positive for all the records where ELIGFLGW = 1 or 2.
- **Variable POPTVSTR** (total population in variance strata). The variable POPTVSTR contains the total population for the variance strata (variable TVSTR). It is required to compute the finite population correction factor (*fpc*) for the estimates of variance.
- **Variable PSTSTR** (final poststratification cell). The variable PSTSTR indicates the final poststratification cell. The value of this variable is a sequential number from 1 to 35. In SUDAAN, the control totals are hardcoded in the program and correspond to totals for cells 1 to 35 in this order.

SUDAAN Keywords

The statements and keywords required to run SUDAAN are:

- **DESIGN=STRWOR** (required). The 1999 ADS Form A is a stratified simple random sample selected without replacement. In some strata the sampling fraction is so large that the *fpc* used in the variance estimation formula is not negligible.
- **NEST TVSTR/ MISSUNIT** (required). The keyword NEST lists the variable whose values identify the design stages. In this case, the sample was drawn within strata. The Option /MISSUNIT instructs SUDAAN to compute the variance contribution of stratum with only one PSU using the difference of that unit's value and the overall mean value of the population. Note the dataset must be sorted by the variable listed in the NEST statement. In the following examples, the datasets are already sorted by the TVSTR variable.
- **WEIGHT PSW0** (required). The keyword WEIGHT lists the weight to be used in the analysis. In this case, the weight is the final poststratified full sample weight PSW0.
- **TOTCNT POPTVSTR** (required if DESIGN=STRWOR). The keyword TOTCNT lists the variable containing the total population count of the strata. In this case, the variable POPTVSTR contains the population count for the variance stratum TVSTR.
- **SUBPOP ELIGFLGW=1** (typically required). The keyword SUBPOP lists the variables and conditions that define the population of interest. In the FORM A ADS, there are ineligible members with a final positive weight. To compute the correct *fpc*'s these members should be included in the file. Analyses, however, should be limited to eligible members (ELIGFLGW=1). Additional conditions can be included. For example if members in the Coast Guard (XMIMPS=5) are to be excluded, the statement should be SUBPOP ELIGFLGW=1 & XMIMPS<5.
- **POSTVAR PSTSTR** (required but valid only in PROC DESCRIPT and PROC RATIO). The keyword POSTVAR lists the variable that indicates the cells for poststratification. SUDAAN performs an internal poststratification of the weight. If the data does not have any missing values, the point estimate obtained in SUDAAN will be the same as the one obtained in WesVar. If there are missing values, SUDAAN will compute a new weight different than the final weight given in the WEIGHT statement. This statement cannot be used in the PROC CROSSTAB. Also, when the statement POSTVAR is used, the design effect cannot be computed.
- **POSTWGT** 196520 137708 70732 22513 19543 5100 17671 5606 7454 147041 128695 41436 19987 9755 12962 4842 94292 37634 5576 10074 8601 5281 2632 131913 113946 41768 14873 24029 6018 19514 6575 9469 13292 6466 3905 (required if POSTVAR is used). This statement follows the statement POSTVAR and lists the control totals for the cells indicated by the variable PSTSTR;

Point Estimates Using SUDAAN

Listing J-4 shows an example of running SUDAAN's PROC CROSSTAB to compute totals and percentages for XMIMPS. The procedure CROSSTAB produces weighted frequencies and percentages distributions for univariate and multivariate (single variable or multiple variable) tabulations. The statements POSTVAR and POSTWGT cannot be used in the PROC CROSSTAB. As a result, the estimates do not reflect the reduction of variance due to the poststratification. The only reduction included is due to the use of the *fpc*. The following statements were used to produce the output in Listing J-4:

```
PROC CROSSTAB DATA=TEMP
FILETYPE=SAS DESIGN=STRWOR DEFT2;
WEIGHT PSW0; /*FS FINAL POSTSTRATIFIED WEIGHT */
NEST TVSTR /MISSUNIT; /*TAYLOR STRATA */
TOTCNT POPTVSTR; /*TOTAL POPULATION IN TAYLOR SERIES */
SUBPOPN ELIGFLGW=1; /*ELIGIBLES ONLY */
SUBGROUP XMIMPS;
LEVELS 5;
TABLES XMIMPS;
PRINT NSUM WSUM SEWGT DEFFWGT TOTPER SETOT DEFFTOT /STYLE=NCHS ;
```

Listing J-5 shows an example of running SUDAAN's PROC DESCRIPT to compute totals and percentages for XMIMPS.²⁶ In this procedure, the statements POSTVAR and POSTWGT can be used and the estimates will reflect the reduction in variance due to poststratification. The standard errors estimated by DESCRIPT are smaller than the CROSSTAB estimates (Listing J-4) and are close to those estimated by WesVar (Listing J-1). If poststratification is ignored, PROC DESCRIPT's estimates of variance are identical to those from PROC CROSSTAB. The output in Listing J-5 was produced by the following statements:

```
PROC DESCRIPT DATA=temp
FILETYPE=SAS DESIGN=STRWOR;
WEIGHT PSW0; /*FS FINAL POSTSTRATIFIED WEIGHT */
NEST TVSTR /MISSUNIT; /*TAYLOR STRATA */
TOTCNT POPTVSTR; /*TOTAL POPULATION IN TAYLOR SERIES */
SUBPOPN ELIGFLGW=1; /*ELIGIBLES ONLY */
POSTVAR PSTSTR;
POSTWGT
196520 137708 70732 22513 19543 5100 17671 5606 7454
147041 128695 41436 19987 9755 12962 4842 94292 37634
5576 10074 8601 5281 2632 131913 113946 41768 14873
24029 6018 19514 6575 9469 13292 6466 3905 ;
SUBGROUP XMIMPS PSTSTR _ONE_;
LEVELS 5 35 1;
VAR XMIMPS XMIMPS XMIMPS XMIMPS XMIMPS;
CATLEVEL 1 2 3 4 5 ;
TABLE _ONE_;
PRINT / STYLE = NCHS;
```

²⁶ The procedure DESCRIPT was designed to produce descriptive statistics for continuous variables, but it can also be used for discrete (categorical) variables through combinations of the statements CATLEVEL and VAR and the use of SUDAAN's variable _ONE_.

  5100   17671  5606   7454  147041
  128695  41436  19987  9755  12962
  4842   94292  37634  5576  10074
  8601   5281  2632   131913 113946
  41768  14873  24029  6018  19514
  6575   9469  13292  6466  3905
;
SUBGROUP M9910A XMIMPS PSTSTR _ONE_;
  LEVELS 2 5 35 1;
VAR M9910A ;
CATLEVEL 1 ;
/* The catlevel statement acts as a where statement restricting
   the analysis to the first level (in this case) */
CONTRAST XMIMPS = ( 1 -1 0 0 0) / name = "Army vs Navy";
TABLE _ONE_;
PRINT ;
```

As can be seen in comparing Listings J-2 and J-6, the estimate of the difference is the same at -15.48, although the t -test values, which depend on variances, differ slightly. For example, the WesVar using JK_n replication estimates $t = -15.84$ while SUDAAN using linearization estimates $t = -17.39$. In this example the poststratification has little effect. When poststratification is ignored,²⁷ the t estimated by SUDAAN is -17.35.

²⁷ To ignore poststratification, drop the POSTVAR and POSTWGT statements and remove variable PSTSTR from the SUBGROUP statement.

Comparing Two Analysis Variables Using SUDAAN

To compare two questions within subgroups will require that you work with the data to compute the statistical test. SUDAAN does not have an option that will easily allow the user to compare two analysis variables. If the missing data patterns are the same for the two variables then the user can use SAS to create a new variable containing the differences between the two questions and, by using the new variable on the VAR statement of the SUDAAN PROC DESCRIPT, produce the t -statistic in SAS.

To illustrate this, we use the same questions shown in the WesVar example listing J-3, Question 13D, variable M9913D versus Question 13E, variable M9913E. In addition, we limit our analysis to the Army, Navy, and the Air Force subgroups. The SAS code to compute the differences between the two variables (those who say they had a serious problem selling or renting previous residence but not current residence less those who said current but not previous was the serious problem) consists of the following statements:

```
IF M9913D=1 THEN A=1; ELSE IF M9913D GT 0 THEN A=0;
IF M9913E=1 THEN B=1; ELSE IF M9913E GT 0 THEN B=0;
DIFF=A-B;

IF XMIMPS IN (1) THEN RXMIMPS =1;
ELSE IF XMIMPS IN (2) THEN RXMIMPS =2;
ELSE IF XMIMPS IN (4) THEN RXMIMPS =3;
**recodes Air Force to 3 because SUDAAN requires no breaks in codes;
```

To obtain the total and mean differences between the two variables of each subgroup and their standard errors, use the following statements:

```
PROC DESCRIPT DATA=TEMP
FILETYPE=SAS DESIGN=STRWOR;
WEIGHT PSW0; /*FS FINAL POSTRATIFIED WEIGHT */
NEST TVSTR /MISSUNIT; /*TAYLOR STRATA */
TOTCNT POPTVSTR; /*TOTAL POPULATION IN TAYLOR SERIES */
SUBPOPN ELIGFLGW=1; /*ELIGIBLES ONLY*/
POSTVAR PSTSTR;
POSTWGT
  196520 137708 70732 22513 19543
  5100 17671 5606 7454 147041
  128695 41436 19987 9755 12962
  4842 94292 37634 5576 10074
  8601 5281 2632 131913 113946
  41768 14873 24029 6018 19514
  6575 9469 13292 6466 3905
;
SUBGROUP RXMIMPS PSTSTR ;
LEVELS 3 35 ;
TABLES RXMIMPS;
VAR DIFF; /*COMPUTED DIFFERENCE-M9913E VS M9913E*/

PRINT TOTAL SETOTAL MEAN SEMEAN/
MEANFMT=F10.7 SEMEANFMT=F10.7;

/*OUTPUT TOTAL AND MEAN DIFFERENCES BY SUBGROUPS*/
OUTPUT TOTAL SETOTAL MEAN SEMEAN/MEANFMT=F10.7 SEMEANFMT=F10.7
FILENAME = MEANS FILETYPE = SAS ;
```

The mean and standard error of the mean produced by SUDAAN are written to a SAS dataset to facilitate analysis. Next, to compute the *t*-value, i.e., the difference in the proportions:

```
MEAN2 = MEAN * 100;
SEMEAN2 = SEMEAN * 100;
LABEL MEAN2 = "% ESTIMATE";
LABEL SEMEAN2 = "% STDERROR";
TDIFF = MEAN2 / SEMEAN2;
LABEL TDIFF = "T VALUE";
PROC PRINT LABEL;
VAR RXMIMPS TOTAL SETOTAL MEAN2 SEMEAN2 TDIFF;
```

As shown in listing J- 7, the estimated total and percentage differences match output from the WesVar listing J-3. Standard error estimates and *t*-values are very close.

Listing J-7.

Comparing Estimates from Different Surveys Using SUDAAN

As in the earlier discussion for WesVar, to compare the proportions of persons in two surveys who report that in selling or renting their former residence was *a serious problem*, the proportions and standard errors for each of the surveys should be computed in SUDAAN separately. For *Form A*, there are two variables of interest, XMIMPM and M9913D. First, include in the SUBPOPN statement of the CROSSTAB procedure (with the design options described earlier in this appendix) XMIMPM=1 (as well as ELIGFLGW=1) to subset married members from non-married members. The listing will provide the percent estimates and standard errors for all married members. An alternative method is to create a SAS dataset containing the SUDANN output of percent estimates and standard errors, and then use M9913D=1 to limit further processing on respondents who report experiencing a serious problem in selling or renting their former residence (see Listing J-8.). In either case, the percent estimate for married active duty member who reported having serious problems selling or renting their former residence during their most recent PCS move is 15.71 and the standard error is 0.481. Denote the estimated percentage and standard error by p_M and se_M .

Similarly, compute the corresponding estimates from *Form B* using the variable S9910D (see Listing J-8); denote the estimated proportion and standard error by p_S and se_S . The percent estimate for spouses who reported having serious problems selling or renting their former residence during their most recent PCS move is 16.54 and the standard error is 0.643.

To compare the proportions p_S and p_M , the following formula is used for computing the standard error of the difference:

$$se_{S-M} = \sqrt{se_S^2 + se_M^2}.$$

and this formula to compute the t -statistic for testing the difference:

$$t = \frac{p_S - p_M}{se_{S-M}}.$$

In the example above $se_{S-M}=0.8029$ and $t = 1.041$. Again, the t -value is slightly higher using SUDAAN.

The SAS code to compute the differences between two variables in two surveys consists of the following statements:

```

Analysis of ADS Form A Using SAS

This appendix describes how to use Version 8.0 and later of SAS for the analysis of the 1999 Form A ADS.²⁸ As mentioned above, because all weighted cases should be used to estimate the variance, all weighted cases should be kept on the analysis file, even cases not in the subpopulation of interest. This applies both in the general case of ineligibility and specific cases of analyses focused on a part of the population. See below for the use of the *DOMAIN* statement.

Required Variables

The variables that provide information about the design in SAS are

- **Variable TVSTR** (Taylor's series variance strata). As for SUDAAN, the variable TVSTR indicates the variance strata to be used for computation of variance using the Taylor series method.
- **Variable ELIGFLGW** (final eligibility indicator). The variable ELIGFLGW indicates the final eligibility of the member. Eligible members have ELIGFLGW =1 while ineligibles have ELIGFLGW=2. Records with zero final weight have ELIGFLGW=3.
- **Variable PSW0** (final poststratified full sample weight). The variable PSW0 contains the final poststratified full sample weight. This weight is positive for all the records where ELIGFLGW = 1 or 2.
- **Variable _TOTAL_**. SAS requires that the specific variable name _TOTAL_ be used for the variable that was saved on the dataset as POPTVSTR. This variable contains the population counts for the variance strata (variable TVSTR). It is required to compute the *fpc* for the estimates of variance.

The following statements²⁹ are available in PROC SURVEYMEANS:

```
PROC SURVEYMEANS < options > < statistic-keywords > ;  
CLASS variables ;  
DOMAIN variables < variable*variable variable*variable*variable ... > ;  
STRATA variables < / option > ;  
VAR variables ;  
WEIGHT variable ;
```

²⁸ Examples given in this report were produced using SAS Version 8.01 TS Level 01M0 with an additional fix replacing SASQSMEA.DLL with an updated file. Without this fix, SAS variance estimates may not match those in this report and, in fact, could be negative.

²⁹ A CLUSTER statement can also be used to specify cluster identification variables in a clustered sample design. A BY statement can be used with PROC SURVEYMEANS to obtain separate analyses for groups defined by the BY variables. Note that using a BY statement provides completely separate analyses of the BY groups unlike the variance estimates when using a DOMAIN statement that takes into account the full variance structure. When a BY statement appears, the procedure expects the input data sets to be sorted in order of the BY variables. The variables are one or more variables in the input data set. If you specify more than one BY statement, the procedure uses only the latest BY statement and ignores any previous ones.

The PROC SURVEYMEANS statement invokes the procedure. It optionally names the input data sets and specifies statistics for the procedure to compute. The PROC SURVEYMEANS statement is required.

The VAR statement identifies the variables to be analyzed. The CLASS statement identifies those numeric variables that are to be analyzed as categorical variables. The STRATA statement lists the variables that form the strata in a stratified sample design. The DOMAIN statement lists the variables that define domains for subpopulation analysis. The WEIGHT statement names the sampling weight variable. All statements can appear multiple times except the PROC SURVEYMEANS statement and the WEIGHT statement, which can appear only once.

In order to take into account finite population corrections, a dataset has to be named that includes the variable `_TOTAL_`. This can either be the same dataset as the one containing the variables to be analyzed, or a condensed dataset can be created to speed processing. The following statements can be used to create a working dataset (main) and a condensed dataset (tots4fpc) with the stratum population counts. Note that in creating this condensed dataset, the class statement has to contain the stratification variable (i.e., TVSTR) and any variables used in a WHERE statement (e.g., ELIGFLGW).³⁰

```
data main ; set libname.Ads99pub
    (KEEP = ELIGFLGW TVSTR POPTVSTR XMIMPS PSW0 M9910A ); *Limited variables kept to speed
    processing ;
IF ELIGFLGW IN (1 2) ; *Keeps all weighted records ;
_TOTAL_ = POPTVSTR ; * Creates the variable with the SAS required name ;

proc means data = main noprint;
    var _TOTAL_;
    output out=tots4fpc max=;
    class TVSTR ;
run;
```

³⁰ It also has to contain any variables to appear in a BY statement to be used in PROC SURVEYMEANS.

Point Estimates Using SAS

The following statements can be used to compute the proportions of the Services using the variable XMIMPS.

```
PROC SURVEYMEANS DATA = main TOTAL = tots4fpc MEAN STDERR;  
STRATA TVSTR;  
VAR XMIMPS;  
CLASS XMIMPS;  
DOMAIN ELIGFLGW;  
WEIGHT PSW0 ;
```

The output is shown in Listing J-9. SURVEYMEANS produces proportions and standard errors of proportions, both of which can be converted to percentages by multiplying by 100. The percentages for eligibles match those produced by WesVar (Listing J-1) and SUDAAN (Listings J-5 and J-6). The standard errors of percentages are similar to those produced by SUDAAN PROC CROSSTAB (Listing J-5), which is also a Taylor series estimate that does not take advantage of the variance reduction from taking into account poststratification. Because SAS does not take this into account, it will give higher, more conservative, estimates than those that can be obtained from SUDAAN procedures that do take poststratification into account.

As mentioned above, the dataset could be subset to just those who are eligible in a data step or by using a WHERE statement. The following statements can be used to compute the proportions of the Services using the variable XMIMPS.³¹

```
PROC SURVEYMEANS DATA = main TOTAL = tots4fpc MEAN STDERR;  
STRATA TVSTR;  
VAR XMIMPS;  
CLASS XMIMPS;  
WHERE ELIGFLGW=1;  
WEIGHT PSW0 ;
```

The output is shown in Listing J-10. The percentages match those produced by the other procedures, but the variances are smaller than those estimated by SAS when the DOMAIN statement is used so that all weighted cases are used to estimate the variance structure. This method of using the WHERE statement is not optimum because it does not take into account the complete probability structure—it is not equivalent to using the SUBPOPN statement in SUDAAN.

³¹ ELIGFLGW would have to have appeared on the CLASS statement of the PROC MEAN that produced the tots4fpc file.

Comparing Two Subgroups Using SAS

For comparing two subgroups within a survey (e.g., Army vs. Navy), SAS can be used to estimate the difference and variance components but the t-test has to be manually calculated since there is no way to request a contrast. The following statements were used to produce the output in Listing J-11.

```
PROC SURVEYMEANS DATA = main TOTAL= tots4fpc MEAN STDERR;  
STRATA TVSTR;  
DOMAIN XMIMPS*ELIGFLGW;  
VAR M9910A ;  
CLASS M9910A;  
WEIGHT PSW0 ;
```

The difference between the Army and the Navy is -15.48 . To compare the proportions p_{Army} and p_{Navy} , the following formula is used for computing the standard error of the difference:

$$se_{Army-Navy} = \sqrt{se_{Army}^2 + se_{Navy}^2}$$

and this formula to compute the t -statistic for testing the difference:

$$t = \frac{P_{Army} - P_{Navy}}{se_{Army-Navy}}.$$

In the example above $se_{Army-Navy} = 0.8873$ and $t = -17.45$ which is very close to the SUDAAN estimate of -17.35 . Again, the t -value using linearization is slightly higher using replication methods (WesVar).

Comparing Two Analysis Variables Using SAS

To compare two questions overall or within subgroups will require that you work with the data to compute the statistical test. If the missing data patterns are the same for the two variables then the user can use SAS to create a new variable containing the differences between the two questions and produce the *t*-statistic in SAS.

To illustrate this, we use the same questions shown in the WesVar example Listing J-3 and SUDAAN example Listing J-7, Question 13D, variable M9913D versus Question 13E, variable M9913E. We do not limit our analysis to the Army, Navy, and the Air Force subgroups as was done for WesVar and SUDAAN because SAS needs all the weighted cases for variance computation but does not have a SUBPOPN statement like SUDAAN. The SAS code to compute the differences between the two variables (those who say they had a serious problem selling or renting current residence but not former residence less those who said former but not current residence was the problem) consists of the following statements:

```
IF M9913D=1 THEN A=1; ELSE IF M9913D GT 0 THEN A=0;
IF M9913E=1 THEN B=1; ELSE IF M9913E GT 0 THEN B=0;
DIFF=A-B;

PROC SURVEYMEANS DATA = main TOTAL = tots4fpc MEAN STDERR DF T;
STRATA tvstr;
DOMAIN XMIMPS*ELIGFLGW ;
VAR DIFF ;
WEIGHT PSW0 ;
RUN;
```

The output is shown in Listing J-12. The percentages match those produced by the other procedures (Listings J-3 and J-7), with the variances very close to those produced by SUDAAN and WesVar.

Comparing Estimates from Different Surveys Using SAS

As in the earlier discussion for SUDAAN, to compare the proportions of persons in two surveys who report that in selling or renting their former residence was *a serious problem*, the proportions and standard errors for each of the surveys should be computed in SURVEYMEANS separately. For *Form A*, there are two variables of interest, XMIMPM and M9913D. The SAS code to get the percentage and standard error for members consists of the following:

```
PROC SURVEYMEANS DATA = main TOTAL = tots4fpc MEAN STDERR;  
STRATA tvstr;  
DOMAIN XMIMPM*ELIGFLGW ;  
VAR M9913D ;  
CLASS M9913D;  
WEIGHT PSW0 ;  
RUN;
```

The output is shown in Listing J-13. The output lists the proportion estimates and standard errors for all married active-duty members. The percent estimate for married active-duty member who reported having serious problems selling or renting their former residence during their most recent PCS move is 15.71 (as in WesVar and SUDAAN) and the standard error is 0.479, slightly lower than estimated by WesVar or SUDAAN. Denote the estimated percentage and standard error by p_M and se_M .

The spouse variable S9910D has been recoded to four levels to match M9913D. The SAS code to get the percentage and standard error for spouses consists of the following:

```
PROC SURVEYMEANS DATA=main TOTAL=tots4fpc MEAN STDERR;  
STRATA tvstr;  
VAR S9910D;  
CLASS S9910D;  
DOMAIN ELIGFLGW;  
WEIGHT PSW0 ;
```

The output is shown in Listing J-14. The percent estimate for spouses of active-duty members who reported having serious problems selling or renting their former residence during their most recent PCS move is 16.54 (as in WesVar and SUDAAN) and the standard error is 0.642. Denote the estimated percentage and standard error for spouses by p_S and se_S .

To compare the proportions p_S and p_M , the following formula is used for computing the standard error of the difference:

$$se_{S-M} = \sqrt{se_S^2 + se_M^2} .$$

The t -statistic for testing whether the difference is zero or not is:

$$t = \frac{p_S - p_M}{se_{S-M}} .$$

In the example above $se_{S-M} = 0.8009$ and $t = 1.044$, very close to the t -tests calculated from WesVar at 1.028 and from SUDAAN at 1.041.

13. SUPPLEMENTARY NOTES						
14. ABSTRACT The 1999 Active Duty Surveys (ADS) gather information on military assignments, retention issues, personal and military background, preparedness, mobilizations and deployments, family composition, use of military programs and services, housing, perceptions of military life, family and child care concerns, spouse employment, financial information, and other quality of life issues. Information derived from the survey will be used to assess military personnel issues for Service members and their families. This report documents the procedures used to develop the instrument, design the sample, conduct the survey, process the data and prepare analysis weights. In addition, appendices address issues in the analysis of the survey data.						
15. SUBJECT TERMS dataset, survey results, codebook, military families, personnel, family programs, career intentions, retention

INSTRUCTIONS FOR COMPLETING SF 298

1. REPORT DATE. Full publication date, including day, month, if available. Must cite at least the year and be Year 2000 compliant, e.g. 30-06-1998; xx-06-1998; xx-xx-1998.

2. REPORT TYPE. State the type of report, such as final, technical, interim, memorandum, master's thesis, progress, quarterly, research, special, group study, etc.

3. DATES COVERED. Indicate the time during which the work was performed and the report was written, e.g., Jun 1997 - Jun 1998; 1-10 Jun 1996; May - Nov 1998; Nov 1998.

4. TITLE. Enter title and subtitle with volume number and part number, if applicable. On classified documents, enter the title classification in parentheses.

5a. CONTRACT NUMBER. Enter all contract numbers as they appear in the report, e.g. F33615-86-C-5169.

5b. GRANT NUMBER. Enter all grant numbers as they appear in the report, e.g. AFOSR-82-1234.

5c. PROGRAM ELEMENT NUMBER. Enter all program element numbers as they appear in the report, e.g. 61101A.

5d. PROJECT NUMBER. Enter all project numbers as they appear in the report, e.g. 1F665702D1257; ILIR.

5e. TASK NUMBER. Enter all task numbers as they appear in the report, e.g. 05; RF0330201; T4112.

5f. WORK UNIT NUMBER. Enter all work unit numbers as they appear in the report, e.g. 001; AFAPL30480105.

6. AUTHOR(S). Enter name(s) of person(s) responsible for writing the report, performing the research, or credited with the content of the report. The form of entry is the last name, first name, middle initial, and additional qualifiers separated by commas, e.g. Smith, Richard, J, Jr.

7. PERFORMING ORGANIZATION NAME(S) AND ADDRESS(ES). Self-explanatory.

8. PERFORMING ORGANIZATION REPORT NUMBER. Enter all unique alphanumeric report numbers assigned by the performing organization, e.g. BRL-1234; AFWL-TR-85-4017-Vol-21-PT-2.

9. SPONSORING/MONITORING AGENCY NAME(S) AND ADDRESS(ES). Enter the name and address of the organization(s) financially responsible for and monitoring the work.

10. SPONSOR/MONITOR'S ACRONYM(S). Enter, if available, e.g. BRL, ARDEC, NADC.

11. SPONSOR/MONITOR'S REPORT NUMBER(S). Enter report number as assigned by the sponsoring/monitoring agency, if available, e.g. BRL-TR-829; -215.

12. DISTRIBUTION/AVAILABILITY STATEMENT. Use agency-mandated availability statements to indicate the public availability or distribution limitations of the report. If additional limitations/ restrictions or special markings are indicated, follow agency authorization procedures, e.g. RD/FRD, PROPIN, ITAR, etc. Include copyright information.

13. SUPPLEMENTARY NOTES. Enter information not included elsewhere such as: prepared in cooperation with; translation of; report supersedes; old edition number, etc.

14. ABSTRACT. A brief (approximately 200 words) factual summary of the most significant information.

15. SUBJECT TERMS. Key words or phrases identifying major concepts in the report.

16. SECURITY CLASSIFICATION. Enter security classification in accordance with security classification regulations, e.g. U, C, S, etc. If this form contains classified information, stamp classification level on the top and bottom of this page.

17. LIMITATION OF ABSTRACT. This block must be completed to assign a distribution limitation to the abstract. Enter UU (Unclassified Unlimited) or SAR (Same as Report). An entry in this block is necessary if the abstract is to be limited.
